Contents	V
Authors	IX
Abbreviations	X
Preface to the first edition	XII
Preface to the second edition	XIII

1 Introduction

1.1 Hormones	3
1.1.1 Chemical nature of hormones	3
1.1.2 Storage, release, and transport	4
1.1.3 Action, metabolism, and elimination	5
1.2 Genes encoding hormones	6
1.2.1 DNA regions	6
1.2.2 Protein factors	6
1.2.3 RNA processing	7
1.2.4 Translation	7
1.2.5 Posttranslational processing	7
1.3 Endocrine disorders	8
1.4 Clinical assessment	10
1.4.1 History and physical examination	10
1.4.2 Laboratory testing	10
1.4.3 Diagnostic imaging	12

2 Hypothalamus-Pituitary System

2.1 Introduction	13
2.2 Anterior lobe	14
2.2.1 Somatotropin and lactotropin	18
2.2.1.1 Pituitary growth hormone	18
2.2.1.2 Mammary growth hormone	19
2.2.1.3 Prolactin	20
2.2.2 Congenital growth hormone deficiency	21
2.2.3 Acquired growth hormone deficiency	24
2.2.4 Growth hormone excess	25
2.2.4.1 Excessive pituitary growth hormone	25
2.2.4.2 Excessive mammary growth hormone	27
2.2.5 Prolactin and pseudopregnancy	30
2.2.6 Pituitary tumors	31
2.2.6.1 Hormone deficiency	31
2.2.6.2 Mass effects	32

2.3 Posterior lobe	35
2.3.1 Oxytocin	35
2.3.2 Vasopressin	35
2.3.3 Diabetes insipidus	37
2.3.3.1 Central diabetes insipidus	37
2.3.3.2 Nephrogenic diabetes insipidus	41
2.3.3.3 Primary polydipsia	42
2.3.3.4 Algorithm for polyuria / polydipsia	44
2.3.4 Vasopressin excess; Syndrome of inappropriate antidiuresis (SIAD)	44

3 Thyroids

3.1 Introduction	55
3.1.1 Hormone synthesis and secretion	55
3.1.2 Hormone transport, tissue delivery, and metabolism	58
3.1.3 Regulation of thyroid function	58
3.1.4 Thyroid hormone action	59
3.2 Hypothyroidism in young animals	60
3.2.1 Acquired juvenile hypothyroidism	60
3.2.2 Thyroid dysgenesis	61
3.2.3 Defective thyroid hormone synthesis	62
3.2.4 Central hypothyroidism	64
3.3 Hypothyroidism in adult animals	64
3.3.1 Primary hypothyroidism	64
3.3.2 Central hypothyroidism	71
3.4 Hyperthyroidism and thyroid tumors	73
3.4.1 Hyperthyroidism in cats	73
3.4.2 Thyroid tumors and hyperthyroidism in dogs	79

4 Adrenals

4.1 Introduction	93
4.1.1 Synthesis and secretion of corticosteroids	94
4.1.2 Transport and metabolism	94
4.1.3 Regulation of glucocorticoid secretion	96
4.1.4 Regulation of mineralocorticoid secretion	99
4.1.5 Glucocorticoid action	101
4.1.6 Mineralocorticoid action	102
4.1.7 Adrenal androgens	103
4.2 Adrenocortical insufficiency	103
4.2.1 Primary adrenocortical insufficiency	103
4.2.2 Secondary adrenocortical insufficiency	109
4.2.3 Relative adrenocortical insufficiency	110
4.3 Glucocorticoid excess	111
4.3.1 Pituitary-dependent hypercortisolism	116
4.3.2 Hypercortisolism due to adrenocortical tumor	125

4.3.3.	Hypersecretion of sex hormones by adrenocortical tumor	130	6.1.3.1	Genes essential for development of Wolffian and Müllerian ducts.	188
4.3.4	Ectopic ACTH syndrome	130	6.1.4	Establishment of the phenotypic sex	189
4.3.5	Food-dependent glucocorticoid excess . .	130	6.2	Abnormal sexual differentiation	189
4.3.6	Iatrogenic hypercorticism and iatrogenic secondary hypoadrenocorticism	131	6.2.1	Disorders of chromosomal sex	190
4.3.6.1	Glucocorticoids as pharmacological agents	132	6.2.1.1	Chimerism and mosaicism of sex chromosomes	190
4.3.6.2	Iatrogenic hypercorticism	132	6.2.1.2	XO syndrome (gonadal dysgenesis)	191
4.3.6.3	Iatrogenic secondary hypoadreno- corticism	132	6.2.1.3	XXY syndrome	191
4.3.6.4	Withdrawal from glucocorticoids	134	6.2.1.4	XXX syndrome (X trisomy, triple X syndrome)	192
4.3.6.5	Alternate-day glucocorticoid therapy . . .	134	6.2.2	Disorders of gonadal sex	192
4.4	Mineralocorticoid excess	134	6.2.2.1	XY sex reversal syndrome (XY SRS) . . .	193
4.4.1	Primary mineralocorticoid excess	134	6.2.2.2	XX sex reversal syndrome (XX SRS) . . .	193
4.5	Adrenal medulla	139	6.2.3	Disorders of phenotypic sex	195
4.5.1	Introduction	139	6.2.3.1	Female pseudohermaphroditism (pseudohermaphroditismus femininus) . .	195
4.5.2	Pheochromocytoma	140	6.2.3.2	Male pseudohermaphroditism (pseudohermaphroditismus masculinus) .	196
5	Endocrine Pancreas		7	Ovaries	
5.1	Introduction	155	7.1	Introduction	203
5.1.1	The endocrine pancreas	155	7.2	Estrous cycle, anestrus, pregnancy, and parturition	204
5.1.2	Insulin synthesis and structure	156	7.2.1	Estrous cycle, anestrus, pregnancy, and parturition in the dog	204
5.1.3	Regulation of insulin secretion	156	7.2.1.1	Estrous cycle	204
5.1.4	Actions of insulin	158	7.2.1.2	Follicular phase	204
5.2	Diabetes mellitus	159	7.2.1.3	Preovulatory luteinization and ovulation .	207
5.2.1	Classification	159	7.2.1.4	Luteal phase	208
5.2.2	Metabolic disturbances	160	7.2.1.5	Anestrus	210
5.2.3	Diabetes mellitus in dogs	161	7.2.1.6	Pregnancy and parturition	211
5.2.4	Diabetes mellitus in cats	167	7.2.2	Estrous cycle, anestrus, pregnancy, and parturition in the cat	213
5.2.5	Problems associated with the regulation of diabetes in dogs and cats	172	7.2.2.1	Estrous cycle and anestrus	214
5.2.6	Diabetic ketoacidosis (DKA) and hyperglycemic hyperosmolar state (HHS)	172	7.2.2.2	Pregnancy and parturition	217
5.3	The hypoglycemic syndrome	173	7.3	Medical pregnancy termination	217
5.3.1	Insulinoma	174	7.4	Induction of parturition	219
5.3.2	Nonpancreatic tumors associated with hypoglycemia	178	7.5	Persistent estrus	219
5.3.3	Juvenile hypoglycemia	179	7.6	Split heat	220
5.4	Other endocrine tumors associated with the pancreas	179	7.7	Hypoluteoidism	221
5.4.1	Gastrinoma	179	7.8	Prolonged anestrus	221
5.4.2	Glucagonoma	180	7.9	Estrus induction	222
6	Gonadal Development and Disorders of Sexual Differentiation		7.10	Estrus prevention	222
6.1	Introduction	187	7.11	Cystic endometrial hyperplasia- endometritis	226
6.1.1	Establishment of the chromosomal sex . .	187	7.12	Fertility disorders in the bitch due to breeding management problems . .	228
6.1.2	Establishment of the gonadal sex	187	8	Testes	
6.1.2.1	Genes essential for gonadal development .	187	8.1	Introduction	235
6.1.3	Development of the Wolffian and Müllerian ducts	188	8.1.1	Hormone synthesis and secretion	236
			8.1.2	Regulation of testis function	237
			8.2	Hypogonadism	237

8.3	Cryptorchidism	239
8.4	Testicular neoplasia	243
8.5	Male infertility	246

9 Calcitropic Hormones

9.1	Introduction	253
9.1.1	Parathyroid hormone	255
9.1.1.1	Development of the parathyroid glands	255
9.1.1.2	PTH synthesis and secretion	255
9.1.1.3	Regulation of PTH secretion	256
9.1.1.4	PTH action	257
9.1.2	Vitamin D	258
9.1.2.1	Vitamin D sources and synthesis	258
9.1.2.2	Vitamin D metabolism	259
9.1.2.3	Regulation of vitamin D metabolites	259
9.1.2.4	Vitamin D action	261
9.1.3	Calcitonin	261
9.1.3.1	CT synthesis and action	261
9.1.4	Calcitropic hormones and bone metabolism	262
9.2	Hypoparathyroidism	264
9.3	Hyperparathyroidism	266
9.3.1	Primary hyperparathyroidism	266
9.3.2	Renal secondary hyperparathyroidism	269
9.3.3	Nutritional secondary hyperparathyroidism	271
9.4	Hypercalcemia of malignancy	272
9.5	Vitamin D-related disorders	275
9.5.1	Hypovitaminosis D	275
9.5.2	Hypervitaminosis D and vitamin D intoxication	277
9.6	Calcitonin-related disorders	278
9.6.1	Nutritional secondary hypercalcitoninism	278
9.6.1.1	Decreased osteoclasia	279
9.6.1.2	Osteochondrosis	280
9.7	Miscellaneous	282
9.8	Puerperal tetany	284

10 Tissue Hormones and Humoral Manifestations of Cancer

10.1	Introduction	291
10.2	Natriuretic peptides	291
10.3	Erythropoietin	293
10.4	Humoral manifestations of cancer	294

11 Obesity

11.1	Introduction	297
11.2	Pathophysiology	297
11.2.1	Appetite regulation	297
11.2.2	Hormonal and metabolic changes	298

Protocols and Algorithms

12 Protocols for Function Tests

12.1	Pituitary anterior lobe	305
12.1.1	CRH-stimulation test	305
12.1.2	GHRH-stimulation test	305
12.1.3	Combined anterior pituitary function test	305
12.1.4	Sample handling	306
12.2	Pituitary posterior lobe	306
12.2.1	Serial measurements of urine osmolality	306
12.2.2	Modified water deprivation test	306
12.2.3	Vasopressin measurements during hypertonic saline infusion	307
12.3	Thyroid	307
12.3.1	TSH-stimulation test	307
12.3.2	TRH-stimulation test	307
12.4	Adrenal cortex	308
12.4.1	ACTH-stimulation test	308
12.4.2	Low-dose dexamethasone suppression test (iv-LDDST)	308
12.4.3	High-dose dexamethasone suppression test (iv-HDDST)	309
12.4.4	Urinary corticoid:creatinine ratios with high-dose suppression test (UCCR + o-HDDST)	309
12.4.5	Urinary corticoid:creatinine ratios with low-dose suppression test (UCCR + o-LDDST)	310
12.5	Ovary and Testis	310
12.5.1	GnRH-stimulation test	310

13 Treatment Protocols

13.1	Pituitary	315
13.1.1	Hypophysectomy	315
13.2	Adrenal cortex	316
13.2.1	Primary hypoadrenocorticism	316
13.2.2	Treatment of hypercortisolism with trilostane	316
13.3	Endocrine pancreas	317
13.3.1	Treatment of diabetes mellitus in dogs and cats	317
13.3.2	Management of diabetic ketoacidosis	318
13.3.3	Treatment of hypoglycemia	320

14 Algorithms

14.1	Endocrine alopecia	323
14.2	Polyuria and polydipsia	323
14.3	Breeding management of the bitch	323
14.4	Weight loss in spite of good appetite	323

Index	333
