

Table of Contents

INVITED TALK:

Well behaved search and the Robbins problem	1
<i>W. McCune (Argonne National Laboratory)</i>	

Session 1: Theorem Proving and Rewriting

Goal-directed completion using SOUR graphs	8
<i>C. Lynch (Clarkson University)</i>	
Shostak's congruence closure as completion	23
<i>D. Kapur (State University of New York at Albany)</i>	
Conditional equational specifications of data types with partial operations for inductive theorem proving	38
<i>U. Kühler and C.-P. Wirth (University of Kaiserslautern)</i>	

Session 2: String Rewriting

Cross-sections for finitely presented monoids with decidable word problems	53
<i>F. Otto (University of Kassel), M. Katsura (Kyoto Sangyo University) and Y. Kobayashi (Toho University)</i>	
New undecidability results for finitely presented monoids . .	68
<i>A. Sattler-Klein (University of Kaiserslautern)</i>	
On the property of preserving regularity for string-rewriting systems	83
<i>F. Otto (University of Kassel)</i>	

Session 3: Rewriting in Algebraic Theories

Rewrite systems for natural, integral, and rational arithmetic	98
<i>E. Contejean, C. Marché and L. Rabehasaina (University of Paris-Sud)</i>	
D-bases for polynomial ideals over commutative Noetherian rings	113
<i>L. Bachmair and A. Tiwari (State University of New York at Stony Brook)</i>	
On the word problem for free lattices	128
<i>G. Struth (MPI, Saarbrücken)</i>	

Session 4: Termination

A total ground path ordering for proving termination of AC rewrite systems	142
<i>D. Kapur (State University of New York at Albany) and G. Sivakumar (Indian Institute of Technology, Bombay)</i>	

Proving innermost normalisation automatically	157
<i>T. Arts (Utrecht University) and J. Giesl (TH Darmstadt)</i>	
Termination of context-sensitive rewriting	172
<i>H. Zantema (Utrecht University)</i>	

Session 5: Confluence and Termination

A new parallel closed condition for Church-Rosser of left-linear term rewriting systems	187
<i>M. Oyamauchi and Y. Ohta (Mie University)</i>	
Innocuous constructor-sharing combinations	202
<i>N. Dershowitz (Hebrew University, Jerusalem)</i>	
Scott's conjecture is true, position sensitive weights	217
<i>S. Perlo-Freeman (University of Warwick) and P. Pröhle (Eötvös Loránd University, Budapest and University of St. Andrews)</i>	

INVITED TALK:

Two dimensional rewriting	228
<i>Y. Lafont (CNRS, Marseille)</i>	

Session 6: Logic and Rewriting

A complete axiomatisation for the inclusion of series-parallel partial orders	230
<i>D. Bechet, P. de Groote and C. Retoré (INRIA Lorraine)</i>	
Undecidability of the first order theory of one-step right ground rewriting	241
<i>J. Marcinkowski (University of Wrocław)</i>	
The first-order theory of one step rewriting in linear Noetherian systems is undecidable	254
<i>S. Vorobyov (MPI, Saarbrücken)</i>	

Session 7: Unification and Constraint Solving

Solving linear Diophantine equations using the geometric structure of the solution space	269
<i>A.P. Tomás and M. Filgueiras (University of Porto)</i>	
A criterion for intractability of E-unification with free function symbols and its relevance for combination of unification algorithms	284
<i>K. Schulz (CIS, University of Munich)</i>	

Session 8: Higher-Order Rewriting

Effective reduction and conversion strategies for combinators 299
R. Statman (Carnegie Mellon University)

Finite family developments 308
V. van Oostrom (Vrije University, Amsterdam)

System Descriptions

**Prototyping combination of unification algorithms with the
ELAN rule-based programming language** 323
C. Ringeissen (INRIA Lorraine)

The invariant package of MAS 327
M. Göbel (University of Tübingen)

Opal: A system for computing noncommutative Gröbner bases
331
*E. Green (VPI & SU, Blacksburg), L. Heath (VPI & SU, Blacksburg)
and B. Keller (Montana Tech, Butte)*

**TRAM: an abstract machine for order-sorted conditional term
rewriting systems** 335
K. Ogata (JAIST), K. Ohhara (Sharp Corp.) and K. Futatsugi (JAIST)

Author Index 339
