

Table of Contents

Preface

Chapter 1: Structural Alloys

Tribological Properties of Spark Plasma Sintered Ti48Al48Cr2Nb2 Alloy M.R. Mphahlele, P.A. Olubambi and E. Olevsky	3
A Study on Alloy Characterizations for Long Term Service Based Effects on Materials A. Alduaij and H. Sundaram	11
Effect of Adding Minor Cu Amounts on Stability of Constituent Phases in Al_xCrFeMnNi High Entropy Alloy Microstructure M. Navazani, S.R. Kada, D. Fabijanic and M.R. Barnett	19

Chapter 2: Friction Stir Welding of Dissimilar Materials

Friction Stir Welding between Marine Grade Aa 5083 and HSLA Steel M. Sahu and S. Ganguly	29
Microstructure and Mechanical Characteristics of Friction Welded Joint between Alumina and Aluminum Casting Alloy T. Takahashi, S.T. Nguyen and M. Kimura	35

Chapter 3: Polymers and Composites

Surface Finish Optimization of Vapor Smoothened PLA Fabricated Parts with Microstructural Analysis C.E. Alviar and B.A. Basilia	45
Investigation of the Mechanical Properties of Urethane Dimethacrylate (UDMA) Reinforced with Abaca Cellulose for Vat Photopolymerization (VP) C.A. Dela Cruz, J.A.M. Medenilla and B.A. Basilia	51
TiO₂- Polyurethane Copoly Blend Nanocomposites as an Anticorrosion Coating for Mild Steel A.G. Ruda, M.T. Bonilla, K.S.M. Ubas, A.C. Tilendo, D.J.E. Estrada, R. Capangpangan, R.M.T. Cumba, J.P. Labis, N.L.B. Sayson and A.C. Alguno	57

Chapter 4: Functional Materials

Thermoelectric Properties of Spray Coated n-Type PEDOT:PSS Film C.O. Ugwuoke, A. Abd El-Moneim and M. Ghali	67
Synthesis and Fabrication of Luminescence of CsPbBr₃/PAN Nanocomposite Fiber T.G. De Yonarosa, A.D. Pramata, F.A. Hutomo and D. Susanti	73

Chapter 5: Materials Physics and Computational Materials Science

Non-Arrhenius Transport Properties of Glass-Forming Materials in a Wide Temperature Range: A Systematic Study Based on the BSCNF Model M. Ikeda and M. Aniya	83
--	----

Chapter 6: Wastewater Treatment and Waste Recycling

Evaluation of Recycled Polypropylene (PP) Made from Plastic Cups as Filaments for Additive Manufacturing R.G.P. Abdon, S.F. Barbastro, K.J.C. Francisco and C.J.D. Quicay	91
---	----

Synthesis, Characterization, and Utilization of Water Hyacinth (<i>Eichhornia crassipes</i>) Magnetic Biochar for Nitrate Removal from Simulated Wastewater T.R.L. Panaligan, A.K.S. Lee, C.J. Petareal and J.R. Tadena	97
---	----

Chapter 7: Green Building Materials

Mitigation of Efflorescence and Alkali Leaching in Activated Slag Using Foundry Sand N.T. Sithole	105
Synthesis of Acid-Based Fly Ash Geopolymer with Pure Phosphoric Acid Compare with P-Leachate Activator E. Mkhonto, T. Mashifana and N.T. Sithole	113

Chapter 8: Heat and Mass Transfer in Engineering Objects

Influence of Shape and Bubble Diameter on Marangoni Convection in Gold Nanoparticles J. Fernandes and S. Kang	123
Simulation of the Heat Transfer during the Casting Process by Mirror U-Net Models J.W. Kang, Q.C. Zhao, J.W. Wang, X. Han and Y.H. Yang	129
Investigation of Convective Heat Transfer of a Multi-Story Building and its Effect to the Comfort of Residents in Metro Manila C.D. Eguita and R.G. Tayactac	137
