## Preface

## Chapter 1: Steel and Alloys

|                                                                                                                                                                                                                                                                          |    |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| <b>Assessment of Mechanical Strength of A36 Steel with Flux Cored Arc Welding Process</b><br>R.A.S. Cabural, F.M.J. Garcia, P.G.I. Rivera, D.G.F. Valentino, R.G. Tayactac, E.B.O. Ang, R.D. Umali and G.M. Escalona                                                     | 3  |
| <b>Influence of Reinforcing nano-Al<sub>2</sub>O<sub>3</sub> Particles on Microstructure and Hardness Properties of HVOF Sprayed 80Ni20Cr Coatings</b><br>S. Pokwitidkul, S. Chaleawlerl-umpon, P. Thongyoug, K. Kamonsuangkasem, S. Wannapaiboon and J. Tungtrongpairoj | 10 |

## Chapter 2: Polymers and Composites

|                                                                                                                                                                                                                         |    |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| <b>Optimize the Operational Efficiency and Performance of Resistive Photomemory by Adjusting the Molecular Chain Ratio in the Polyimide Film</b><br>I.M. Tseng, P.E. Hsu, P.Y. Jiang, W.C. Ou, C.H. Chang and W.L. Yang | 19 |
| <b>Electrically Conductive Rubber by Modified Acetylene Black via Admicellar Polymerization</b><br>T. Pukird, B. Methachan and T. Pongprayoon                                                                           | 26 |
| <b>Enhancement of Dielectric Properties and Energy Storage Density in PVDF-Based and Graphene-Nanoplatelets</b><br>S. Chaipo and C. Putson                                                                              | 32 |
| <b>Characteristics of Crosslinked Gelatin Film with Dialdehyde Cellulose Influenced by Plasticizer Type</b><br>S. Kirdponpattara, R. Muangnamsuk and S. Chueter                                                         | 38 |
| <b>Performance of Thermally Stable Diamond Composite as Rock Cutting Tips under Varied Depth of Cut</b><br>Y. Sun, X.S. Li and H. Guo                                                                                   | 45 |
| <b>Prediction of Stress Relaxation Behavior of Polymer Foam Using Artificial Neural Network</b><br>P. Aengchuan, P. Boonpuek and J. Klinsuk                                                                             | 51 |
| <b>Temperature-Dependence of Energy Storage and Electrocaloric Performances of Ternary PVDF-HFP/PU/PMMA Composites</b><br>P. Itsaradamkoeng and C. Putson                                                               | 57 |

## Chapter 3: Synthesis and Applications of Nanomaterials

|                                                                                                                                                                                                                        |    |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| <b>Structure-Mechanical Property Relationships in Carbon Nanotube Yarns</b><br>R.A. Ramadhan, C. Yu, A. Kunitomo, N. Shigemitsu, T. Shindo and G. Yamamoto                                                             | 65 |
| <b>Synthesis and Characterization of Cu<sub>2</sub>O/ CuO Quantum Dots as Photocatalyst for Lignin Depolymerization via Reactive Oxygen Species: A Preliminary Study</b><br>P.R. Pratama, F.A. Hutomo and A.D. Pramata | 72 |
| <b>Low-Cost Fabrication of Visible-Light Sensitive PAN/Cu<sub>2</sub>O QDs Nanofibers</b><br>F.A. Hutomo, P.R. Pratama, N.L. Hamidah and A.D. Pramata                                                                  | 78 |
| <b>Chemical Constituents and their Nanoemulsion Properties of Ethyl Acetate Crude Extract from Black Galingale Rhizome</b><br>N. Boonkert, C. Sonklin, C. Laongtiparos, S. Pranee, S. Seeyangnok and N. Trongsirawat   | 85 |
| <b>The Investigation of Phase Transformation Process of Nano-Citrogypsum via Recycling Saline Solution</b><br>S. Seeyangnok, N. Boonsuwan, T. Sirimahasal, S. Pranee and N. Trongsirawat                               | 91 |

## Chapter 4: Ceramics

|                                                                                                                                                                                                                                                                                                                     |     |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Study of Phase Composition and Microstructure of Porous Alumina Ceramics Derived from Hydrothermal Powders</b><br>R.I. Shakirzyanov, Y.A. Garanin, A.L. Kozlovskiy, D.I. Shlimas, M.V. Zdorovets and D.K. Zhamikhanova                                                                                           | 99  |
| <b>Effect of Bi<sub>2</sub>O<sub>3</sub>, B<sub>2</sub>O<sub>3</sub> and V<sub>2</sub>O<sub>5</sub> Sintering Additives on Phase Composition, Microstructure and Electrical Resistivity of SrAlFe<sub>11</sub>O<sub>19</sub> Ceramics</b><br>N. Volodina, S. Maznykh, D. Vinnik, A.V. Trukhanov and A.L. Kozlovskiy | 105 |

## Chapter 5: Chemical Engineering

|                                                                                                                                                                                                               |     |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Textile Wastewater Treatment Using Activated Graphene-Like Biochar Derived from Onion Peel Biomass</b><br>F.A. Kwarteng, M.A. Hassan, H. Ohashi and A.S.G. Khalil                                          | 113 |
| <b>Modification of the Chitosan Spray Coating on Pineapple Pulp as Adsorbent for Copper Ion Adsorption from Aqueous Solution</b><br>P. Charnkeithkong, W. Jonglertjunya and X.S. Feng                         | 122 |
| <b>Chemical Constituents of Black Galingale Rhizome from Hexane Crude Extract and its Nanoemulsion Preparation</b><br>A. Wongcharu, C. Sonklin, C. Laongtiparos, S. Pranee, S. Seeyangnok and N. Trongsirawat | 128 |
| <b>Particle Characteristics of Diatomite Activated by Alkaline Solution</b><br>T. Yann, C. Winotapun, P. Yos, L.H. Voon and O. Boondamnoen                                                                    | 134 |
| <b>Experimental Evaluation of Rheological Properties of Water-Based Drilling Fluid with Fly Ash Additive</b><br>S.K. Dewangan, N. Nathwani and A. Kawade                                                      | 141 |

## Chapter 6: Additive Manufacturing

|                                                                                                                                                                                                                                                                                      |     |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Polyhydroxybutyrate/Polylactic Acid/Polybutylene Succinate Blend Filaments for 3D Printing Applications</b><br>K. Passarapark, C. Aumnate, O. Boondamnoen and P. Potiyaraj                                                                                                        | 149 |
| <b>3D Printing of Urethane Dimethacrylate with Nanoclay for Enhanced Curing Properties via Stereolithography</b><br>B.A. Basilia, A.J.C. Boniel, G.S.B. Borilla III and P.A.N. de Yro                                                                                                | 155 |
| <b>Optimization of Multi-Objective Response of FDM Fabricated PLA Parts with Morphological Investigation on the Effects of 3D Printing Parameters</b><br>C.E.L. Alviar and B.A. Basilia                                                                                              | 161 |
| <b>Comparison of the Mechanical, Thermal and Structural Properties of Gamma-Irradiated and Conventional SLA 3D Printed Methacrylate-Based Photo-Curable Resin for Biomedical Application</b><br>J.A.C. Sy, B.A. Basilia, C.T. Aranilla, C.S. Emolaga, V.U. Lagura and M.T. Margarito | 167 |

## Chapter 7: Building Materials and Structures

|                                                                                                                                                                                                   |     |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Experimental and Numerical Study on the Blast Resistant Performance of Geopolymer Concrete</b><br>J.W. Wu, H.J. Syu, Y.K. Tsai, Y.F. Li, W.H. Lee, C.Y. Kuo, C.C. Chen, W.C. Lin and Y.W. Wang | 175 |
| <b>Effect of Cross-Section Stiffness on Strength of Rectangular Steel</b><br>H.T. Wu, C.H. Liu and W.T. Hsu                                                                                       | 183 |
| <b>Time-Variant Chloride Ingress Models for Probabilistic Assessment of Concrete Bridge Decks with De-Icing Salt Attack</b><br>P. Aruz and P. Koonnamas                                           | 189 |
| <b>Analyzing the Combined Effects of Axial Loads and Bending Moments on Unequal-Angle Steel Members</b><br>W.T. Hsu and S.T. Chung                                                                | 195 |
| <b>Analysis of the Effect of Slenderness Ratio on Axial Force in T-Section</b><br>W.H. Hsu, H.C. Chung and W.T. Hsu                                                                               | 201 |

|                                                                                                                                 |     |
|---------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Investigation of the Relationship between Concrete Cylinder Dimensions and Compressive Strength</b><br>Y.F. Lin and C.H. Liu | 208 |
|---------------------------------------------------------------------------------------------------------------------------------|-----|

## **Chapter 8: Modelling in Mechanical Engineering**

|                                                                                                                                                                                                         |     |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Analysis of Vibration Model to Study the Effect of Defect Sizes and Load on Stiffness, Contact Deformation, and Contact Force Variation in Deep Groove Ball Bearing</b><br>A.K. Verma and P.K. Saini | 217 |
| <b>CFD Simulation of a Circulating Fluidized Bed Boiler to Improve Air Distribution for Satisfactory Fluidization</b><br>B. Gonzales, R.G. Tayactac, R.D. Umali, J. Honra and A.D. Calderon             | 225 |
| <b>Extended Finite Element Simulation of Axial Semi Elliptical Surface Crack in Bi-Material Pipe</b><br>S. Bhattacharya and V. Sonkar                                                                   | 231 |
| <b>Optimization of Helical Gear Plunge Shaving Cutting Parameters for Cutter Life Using Taguchi Method</b><br>A.A. Tolentino, M.C.E. Manuel and R.G. Tayactac                                           | 237 |
| <b>Combined Influence of a Liner Deformation and Couple Stresses on the Partial Bearing Aspect Ratios</b><br>V. Kumar, S.K. Lambha and R. Verma                                                         | 243 |
