

Table of Contents**Preface**

Nomenclature	V
---------------------------	----------

Abbreviations for Plastics	X
---	----------

Other Abbreviations	XII
----------------------------------	------------

1 Economic Development – Market Review and Predictions	1
---	----------

1.1 Literature	12
-----------------------------	-----------

2 General Characteristics of Polymeric Materials	13
---	-----------

2.1 Principles of Structure	13
--	-----------

2.2 Material States and Transition Regions	16
---	-----------

2.3 Deformation Behavior	20
---------------------------------------	-----------

2.4 Literature	24
-----------------------------	-----------

3 Molecular Structure and Synthesis of Polymers	25
--	-----------

3.1 Macromolecular Structure	25
---	-----------

3.2 Primary and Secondary Valence Bonds	31
--	-----------

3.2.1 Primary Valence Bonds (Covalent Bonds).....	32
---	----

3.2.2 Secondary Valence Bonds	34
-------------------------------------	----

3.2.2.1 Dipole-Dipole Forces.....	34
-----------------------------------	----

3.2.2.2 Induction Forces.....	35
-------------------------------	----

3.2.2.3 Dispersion Forces	35
---------------------------------	----

3.2.2.4 Hydrogen Bonds.....	35
-----------------------------	----

3.3 Reactions from Monomers to Polymers	36
--	-----------

3.3.1 Chain Polymerization	40
----------------------------------	----

3.3.2	Step Reaction Polymerization.....	42
3.3.3	Polymerization Processes	46
3.3.4	Comparison between Chain Reaction Polymerization and Step Reaction Polymerization	49
3.3.5	Molecular Weight.....	50
3.3.5.1	Molecular Weight Distribution.....	50
3.3.5.2	Molecular Weight Averages	51
3.3.5.3	Influence of Various Factors on Properties	52
3.4	Literature	58
4	Structure of Polymeric Materials	61
4.1	Homogeneous Polymeric Materials.....	61
4.1.1	The Amorphous State.....	61
4.1.2	The Crystalline State	63
4.1.2.1	Formation of Crystallization Nuclei.....	67
4.1.2.2	Crystal Growth.....	72
4.1.2.3	Crystalline Superstructures	77
4.1.2.4	Melting and Crystallization Temperature	89
4.1.3	Cross-Linked Polymer Materials.....	92
4.1.3.1	Thermosets	92
4.1.3.2	Elastomers	97
4.2	Heterogeneous Polymeric Materials	98
4.2.1	Rubber-Modified Polystyrene.....	99
4.2.1.1	Structure.....	99
4.2.1.2	Craze Formation.....	102
4.2.1.3	Mechanism of Polymer Toughening	107
4.2.2	Plasticization.....	112
4.2.2.1	External Plasticization	112
4.2.2.2	Internal Plasticization	115
4.3	Heterogeneous Composites	116
4.3.1	Fiber-Reinforced Composites	116
4.3.2	Fillers and Reinforcing Agents (co-authored by Prof. J. Kabelka).....	122
4.3.2.1	Loading of the Composite in the Fiber Direction	126
4.3.2.2	Loading of the Composite Perpendicular to the Fiber Direction	133
4.3.3	Nanocomposites	138
4.3.4	Electrically Conductive Composites.....	139
4.4	Literature	140

5 Thermomechanical Properties.....	143
5.1 Glassy or Energy-Elastic Region.....	146
5.2 Rubbery or Entropy-Elastic Region.....	148
5.3 Glass Transition Range.....	152
5.4 Flow Region	157
5.5 Dependence of Softening and Melting Temperatures on Molecular Structure	159
5.6 Literature	165
 6 Mechanical Behavior	 167
6.1 General Deformation Behavior	167
6.1.1 Mechanical Properties	169
6.1.1.1 Linear Viscoelastic Behavior	173
6.1.1.2 Strength Properties	176
6.1.1.3 Deformation Properties	179
6.1.1.4 Temperature.....	183
6.1.1.5 Water Absorption.....	186
6.1.1.6 Toughness	189
6.1.2 Long-Term Deformation Behavior.....	192
6.1.3 Nonlinear Deformation Behavior.....	196
6.1.3.1 Amorphous Thermoplastics.....	197
6.1.3.2 Semi-Crystalline Thermoplastics	198
6.1.4 Multiaxial Loading (co-authored by Prof. J. Kabelka).....	205
6.1.4.1 Non-Reinforced Plastics.....	205
6.1.4.2 Reinforced Plastics.....	209
6.2 Orientation and Residual Stress.....	214
6.2.1 Orientation	214
6.2.1.1 Frozen, Irreversible Molecular Orientation	215
6.2.1.2 Shrinkage Forces	219
6.2.1.3 Filler Orientation	221
6.2.2 Residual Stress.....	222
6.2.2.1 Thermal Residual Stress	223
6.2.2.2 Residual Stress due to Holding Pressure.....	225
6.2.2.3 Internal-Residual Stress with Inserts	226
6.2.2.4 Structure-Dependent Residual Stress	226
6.3 Literature	227

7	Aging and Stabilization	229
7.1	Aging	229
7.2	Exposure to Heat	231
7.2.1	Heat Distortion Temperature	231
7.2.2	Heat Resistance	232
7.2.3	Temperature-Time Limits.....	234
7.2.4	Degradation during Processing.....	236
7.3	Stabilization	238
7.4	Literature	240
8	Overview of Selected Polymeric Materials.....	241
9	Guide Values of the Physical Properties of Plastics	260
	Subject Index.....	269
