Acknowledgments

I am deeply indebted to my supervisors whose help, stimulating suggestions, and encouragement helped me in the researching and writing of this book. I would like to express my deep and sincere gratitude to my main supervisor, Professor Shujiro Urata. His wide knowledge and logical way of thinking have been of great value for me. His understanding, encouragement, and guidance have provided a robust basis for the book.

I am also deeply grateful to Professor Nobuhiko Fuwa for his detailed and constructive comments and for his support throughout this work.

I wish to express my warm and sincere acknowledgments to Professor Kazuhiko Yokota and Professor Takeshi Iida whose ideas and concepts have had a remarkable influence on my research.

I owe my most sincere gratitude to Professor Bambang Brodjonegoro from the University of Indonesia who revealed to me the opportunity to study at Waseda University and offered his tireless assistance during my difficult moments, thereby helping me finish the book.

During this work I have collaborated with many colleagues for whom I have great regard and to whom I want to extend my warmest appreciation. I thank them for all their help, support, interest, and valuable suggestions. I am especially obliged to Kiki Verico who furnished his constructive ideas. I am also indebted to my Zemi friends for providing a stimulating and fun environment. My sincere appreciations go to my best friend Surjo Ganesha whose editing effort has been exemplary.

I owe my loving thanks to my wife Sa'idah, my daughters Aisha Rihana Hastiadi, Nadhira Thafana Hastiadi, and my son Asy-Syawqi Ramadhan Hastiadi. They have lost a lot due to my research overseas. Without their encouragement and understanding it would have been impossible for me to complete this work.

Lastly, and most importantly, I would like to thank my parents, Hasnah Abas and Suryadi. They gave birth to me, raised me, supported me, taught me, and loved me. To them I dedicate this book.
