

Contents

Part I Introduction

- 1 Computational Finance: An Introduction** 3
Jin-Chuan Duan, James E. Gentle, and Wolfgang Karl Härdle

Part II Asset Pricing Models

- 2 Modeling Asset Prices** 15
James E. Gentle and Wolfgang Karl Härdle
- 3 Diffusion Models of Asset Prices** 35
Jérôme Detemple and Marcel Rindisbacher
- 4 Jump-Diffusion Models Driven by Lévy Processes** 61
José E. Figueroa-López
- 5 Multivariate Time Series Models for Asset Prices** 89
Christian M. Hafner and Hans Manner
- 6 Option Data and Modeling BSM Implied Volatility** 117
Matthias R. Fengler
- 7 Interest Rate Derivatives Pricing with Volatility Smile** 143
Haitao Li
- 8 Volatility Investing with Variance Swaps** 203
Wolfgang Karl Härdle and Elena Silyakova

Part III Statistical Inference in Financial Models

- 9 Evaluation of Asset Pricing Models Using Two-Pass
Cross-Sectional Regressions** 223
Raymond Kan and Cesare Robotti

10	Parametric Estimation of Risk Neutral Density Functions	253
	Maria Grith and Volker Krätschmer	
11	Nonparametric Estimation of Risk-Neutral Densities	277
	Maria Grith, Wolfgang Karl Härdle, and Melanie Schienle	
12	Value at Risk Estimation	307
	Ying Chen and Jun Lu	
13	Volatility Estimation Based on High-Frequency Data	335
	Christian Pigorsch, Uta Pigorsch, and Ivaylo Popov	
14	Identifying Jumps in Asset Prices	371
	Johan Bjursell and James E. Gentle	
15	Simulation-Based Estimation Methods for Financial Time Series Models.....	401
	Jun Yu	
 Part IV Computational Methods		
16	Filtering Methods	439
	Andras Fulop	
17	Fitting High-Dimensional Copulae to Data	469
	Ostap Okhrin	
18	Numerical Methods for Nonlinear PDEs in Finance	503
	Peter A. Forsyth and Kenneth R. Vetzal	
19	Numerical Solution of Stochastic Differential Equations in Finance.....	529
	Timothy Sauer	
20	Lattice Approach and Implied Trees	551
	Rüdiger U. Seydel	
21	Efficient Options Pricing Using the Fast Fourier Transform	579
	Yue Kuen Kwok, Kwai Sun Leung, and Hoi Ying Wong	
22	Dynamic Programming and Hedging Strategies in Discrete Time	605
	Shih-Feng Huang and Meihui Guo	
23	Approximation of Dynamic Programs	633
	Michèle Breton and Javier de Frutos	
24	Computational Issues in Stress Testing	651
	Ludger Overbeck	
25	Portfolio Optimization	675
	Jérôme Detemple and Marcel Rindisbacher	

26	Low-Discrepancy Simulation	703
	Harald Niederreiter	
27	Introduction to Support Vector Machines and Their Applications in Bankruptcy Prognosis	731
	Yuh-Jye Lee, Yi-Ren Yeh, and Hsing-Kuo Pao	
 Part V Software Tools		
28	MATLAB® as a Tool in Computational Finance	765
	James E. Gentle and Angel Martinez	
29	R as a Tool in Computational Finance	781
	John P. Nolan
