

Contents

Contributors	xvii
Section I: Measurement in Communities	1
1 Review of Simple Measuring Techniques	
<i>F.G.R. Fowkes</i>	3
Definition of Atherosclerotic Peripheral Vascular Disease	3
Questionnaire for Intermittent Claudication	4
Palpation of Peripheral Pulses	5
Ankle-Brachial Systolic Pressure Ratio	6
Stress Tests	8
Exercise	8
Reactive Hyperaemia	9
Toe Pulse Reappearance Time	11
Conclusion: Measurement in Epidemiological Research ..	11
2 Non-invasive Tests	
<i>M. Horrocks and D.J.A. Scott</i>	17
Exercise Testing	18
Segmental Pressures	18
Doppler Ultrasonography	19
Plethysmography	22
Transcutaneous Oxygen Tension	23
Laser Doppler	23
Magnetic Resonance Spectroscopy	24
Biochemical Parameters	24
3 Questionnaires	
<i>G.C. Leng</i>	29
Development of a Questionnaire	29
Types of Question	30
Wording, Sequence, Layout	31
Evaluation of a Questionnaire	31
Validity	31
Reliability	32
Pre-test	33
Administered or Self-Administered Questionnaires	33
WHO/Rose Questionnaire for Intermittent Claudication .	34

Development of WHO/Rose Questionnaire	34
Validation	35
Reliability	37
Modified Classification	37
Edinburgh Claudication Questionnaire	38
4 Duplex Ultrasound	
<i>P.L.P. Allan</i>	41
History	41
Basic Principles	42
High Resolution Imaging	42
Doppler Information	43
Ultrasound as a Screening Technique	44
Advantages of Ultrasound	44
Disadvantages of Ultrasound	45
Applications of Duplex as a Screening Technique	45
Carotids	45
Abdominal Aortic Aneurysms	46
Peripheral Vascular Disease	49
Venous Disease	51
The Future	52
5 Magnetic Resonance Imaging	
<i>S.R. Underwood and R. H. Mohiaddin</i>	55
The Assessment of Atherosclerosis	55
Chemical Shift Imaging	55
Velocity Mapping	56
The Assessment of Sclerosis	62
Aortic Compliance	62
Aortic Flow Wave Velocity	63
Clinical Importance of Sclerosis	64
Section II: Descriptive Epidemiology	67
6 Historical Perspectives and the Basle Study	
<i>L.K. Widmer and A. da Silva</i>	69
The Basle Study	69
Population Screening Methods	71
Incidence and Prevalence	73
Relationship to Coronary Heart Disease	74
Risk Factors	75
Course of the Disease	78
Conclusion	80
7 Large Vessel and Isolated Small Vessel Disease	
<i>M.H. Criqui, R.D. Langer, A. Fronck, H.S. Feigelson and M.R. Klauber</i>	85
Pathophysiology	85
Non-invasive Measurement Criteria	86
Symptomatology	87

Physical Findings	88
Prevalence	89
Risk Factors	90
Natural History	92
Morbidity and Mortality	92
Future Research	94
8 Symptomatic and Asymptomatic Disease	
<i>C.V. Ruckley</i>	97
Difficulties in Assessing Severity of Disease	97
Edinburgh Artery Study: Methods	100
Study Population	100
Clinical Examination	100
Data Analysis	101
Edinburgh Artery Study: Symptomatic and Asymptomatic Disease	102
Prevalence	102
Age and Sex Distribution	103
Relationship with Ischaemic Heart Disease	103
Possible Bias in Estimating Prevalence of Disease	105
Surveys of Symptomatic and Asymptomatic Disease	106
9 Prevalence in General Practice	
<i>H.E.J.H. Stoffers, V. Kaiser and J.A. Knottnerus</i>	109
Importance of Peripheral Vascular Disease in General Practice	109
Methods of Estimating Prevalence	110
The Limburg Peripheral Arterial Occlusive Disease (PAOD) Study	110
Comparison of Prevalences in Different Studies	111
Questions for Further Study	113
10 Intermittent Claudication in Scotland	
<i>W.C.S. Smith, M. Woodward and H. Tunstall-Pedoe</i>	117
The Scottish Heart Health Study	117
Prevalence of Intermittent Claudication	118
Risk Factors for Intermittent Claudication	119
Intermittent Claudication in Epidemiological Studies	121
Summary: Scottish Heart Health Study	122
Section III: Vascular Risk Factors	125
11 Risk Factors and Cardiovascular Outcome	
Calf Pain on Walking, Risk Factors and Cardiovascular Outcome in Middle-aged British Men	
<i>A.G. Shaper, S.G. Wannamethee and M.K. Walker</i>	127
British Regional Heart Study: Methods	127
Measurement of Calf Pain on Walking	129
Follow-up of Subjects	129
British Regional Heart Study: Calf Pain on Walking	129

Cardiovascular Risk Factors and Calf Pain	130
Prevalence of Ischaemic Heart Disease and Calf Pain ..	131
Cardiovascular Mortality and Morbidity and Calf Pain .	131
Discussion: Calf Pain on Walking	135
Prevalence	135
Risk Factors	136
Outcome	137
Summary	138
12 Smoking	
<i>J.T. Powell</i>	141
Introduction	141
Smoking: The Risk Factor for Peripheral Vascular Disease	142
How Does Smoking Cause Peripheral Vascular Disease? .	147
Smoking and Progression of Peripheral Vascular Disease	149
Conclusions: Stop Smoking	151
13 Lipids: Outstanding Questions	
<i>M.F. Oliver</i>	155
Areas of Agreement	155
Outstanding Questions	156
Cholesterol and Atheroma	156
Regression of Atheroma	157
Cholesterol as a Risk Factor	158
Reduction of Hypercholesterolaemia	158
Cholesterol and Women	159
Age and Cholesterol	160
Other Lipids as Risk Factors	160
Fatty Acids	161
Lipids and Thrombosis	161
Education	161
14 Lipids: Epidemiology	
<i>G.C. Leng and F.G.R. Fowkes</i>	165
Possible Role of Lipids in Atherogenesis	165
Lipids and Peripheral Vascular Disease: Epidemiological	
Studies	167
Triglycerides	167
Cholesterol	169
HDL Cholesterol	170
Apolipoproteins	171
Essential Fatty Acids	172
Lipid Peroxides	173
Effect of Modifying Lipid Profiles on Peripheral Vascular	
Disease	173
Peripheral Vascular Disease and Ischaemic Heart Disease	174
15 Blood Pressure	
<i>C.J. Bulpitt</i>	181
Measurement of Peripheral Vascular Disease	181

Relationship between Intermittent Claudication and Blood Pressure	182
Lack of Foot Pulses and Brachial Pressure	184
Low Systolic Pressure in the Foot and Brachial Pressure ..	184
Causal Association?	184
16 Diabetes Mellitus	
<i>R.J. Jarrett</i>	187
Diabetes and Clinical Manifestations of Peripheral Vascular Disease	187
Intermittent Claudication	187
Pulse Deficits	188
Lower Extremity Amputations	188
Diabetes and Pathological Manifestations of Peripheral Vascular Disease	189
Atheroma	189
Medial Calcification	189
Risk Factors for Peripheral Vascular Disease in Diabetes	190
Conclusions	191
Section IV: Social and Life Style Factors	195
17 Social Factors	
<i>C.C.A. Macintyre and V.D.L. Carstairs</i>	197
Social Factors and Health	197
Social Deprivation and Peripheral Vascular Disease: Mortality and Hospital Discharges	198
Measurement of Social Factors in Edinburgh Artery Study	199
Statistical Analysis	199
Ankle-Brachial Pressure Index and Social Class, Education, and Deprivation	200
Individual Social Factors	200
Combinations of Social Factors	200
Effect of Cardiovascular Risk Factors	202
Explaining Associations of Social Factors and Peripheral Vascular Disease	203
18 Diet and Alcohol	
<i>P.T. Donnan and M. Thomson</i>	207
Dietary Survey Methodology	207
Range of Methods	208
Food Frequency Questionnaires	208
Edinburgh Artery Study and Diet: Methods	209
Selection of Cases and Controls	209
Dietary Analysis	210
Diet in Cases vs. Controls	210
Food Frequencies	210
Nutrients and Energy	212
Interpreting Dietary Differences	213

19	Personality	
	<i>I.J. Deary</i>	217
	Personality and Coronary Heart Disease	217
	Type A Behaviour Pattern	217
	Hostility	219
	Personality and Peripheral Vascular Disease	219
	Measurement of Personality in Edinburgh Artery Study	220
	Type A Behaviour Pattern (Bortner)	221
	Personal Deviance (Foulds and Bedford)	222
	The Disease-Prone Personality?	224
20	Exercise	
	<i>E. Housley</i>	227
	Exercise and Ischaemic Heart Disease	227
	Exercise and Peripheral Vascular Disease	228
	Edinburgh Artery Study: Exercise	229
	Interpreting Associations of Exercise and Cardiovascular Disease	229
21	Economics of Prevention and Treatment	
	<i>J.F. Forbes</i>	235
	Economic Costs of Peripheral Vascular Disease	235
	The Role of Economic Evaluation	237
	Competing Interventions	237
	Primary Prevention	237
	Secondary Prevention	238
	New Technology	240
	Paying for Peripheral Vascular Care	241
	Priorities for Spending on Peripheral Vascular Disease ...	242
	Section V: Genetics, Development and Haemostasis	245
22	Maternal and Fetal Origins of Cardiovascular Disease	
	<i>D.J.P. Barker</i>	247
	Animal Studies	247
	Geographical Studies	247
	Follow-up Studies	249
	Fetal Growth	251
	Conclusion	252
23	Genetic Analysis	
	<i>J.M. Connor</i>	255
	Background to "Old" Genetic Analyses	255
	Vascular Disease and "Old" Genetic Analyses	256
	Background to "New" Genetic Analyses	257
	Vascular Disease and "New" Genetic Analyses	259
24	Fibrinogen	
	<i>T.W. Meade</i>	263
	Coagulability	263

Ischaemic Heart Disease and Stroke	264
Peripheral Vascular Disease	267
Implications and Future Research	268
25 von Willebrand Factor, Beta-Thromboglobulin and Platelet Activation	
<i>F.B. Smith</i>	271
Role of Platelets in Atherosclerosis and Thrombosis	271
Platelet Activation	272
Endothelial Injury	272
Platelets in Lesion Initiation and Thrombosis	273
von Willebrand Factor	274
Synthesis and Function of vWF	274
Role of vWF in Thrombosis	275
vWF and Vascular Disease	276
Beta-Thromboglobulin	277
Age, Sex, Smoking and β -TG	278
β -TG and Coronary Heart Disease	278
β -TG and Peripheral and Cerebrovascular Disease	279
26 Blood Rheology	
<i>G.D.O. Lowe</i>	285
Blood Rheology Factors in the Circulation	288
Blood Rheology in Peripheral Vascular Disease	291
Blood Rheology in Critical Limb Ischaemia	293
Blood Rheology and Peripheral Arterial Graft Occlusion	294
Rheological Therapy in Peripheral Vascular Disease	294
Section VI: Natural History and Prevention	299
27 Natural History of Femoral Atheromatous Lesions	
<i>M.R. Whyman</i>	301
Symptoms of the Lesion	301
The Lesion "Under the Microscope"	303
Plaque, Stenosis, and "Critical Stenosis"	303
Effects of Stenosis	305
Occlusion	306
Regression of Atherosclerosis	307
Progression of Atherosclerosis in Clinical Studies	308
Predicting Progression of Disease	310
28 Prognosis of Intermittent Claudication	
<i>G. Davey Smith, M.J. Shipley and M.G. Marmot</i>	315
Peripheral Vascular Disease: Another Manifestation of Atherosclerosis?	315
Whitehall Study: Methods	316
Intermittent Claudication in Whitehall Study	316
Relation between Claudication and Ischaemic Heart Disease	317
Intermittent Claudication and Coronary Risk Factors ..	317

	Intermittent Claudication and Subsequent Mortality	317
	Implications: Intermittent Claudication	319
	What is the Nature of Possible Claudication?	322
29	Factors Affecting Clinical Progression and Mortality	
	<i>J.A. Dormandy</i>	325
	Progression of Local Disease	326
	Factors Affecting Progression of Local Disease	327
	Overall Fate and Mortality of Claudicants	327
	Factors Affecting Overall Fate and Mortality of Claudicants	328
	Fate of the Amputee	329
	Conclusions	330
30	Asymptomatic Carotid Stenosis in Peripheral Vascular Disease	
	Prevalence, Incidence and Natural History	
	<i>P.J. Franks, M.R. Ellis, R. Cuming, J.T. Powell and R.M. Greenhalgh</i>	333
	Non-Invasive Assessment	334
	Prevalence of Asymptomatic Carotid Stenosis	334
	Charing Cross Asymptomatic Carotid Study	335
	Incidence of Asymptomatic Carotid Stenosis	335
	Natural History of Patients with Asymptomatic Carotid Stenosis	336
	Future Research in Asymptomatic Carotid Disease	340
31	Prevention of Vascular Events in Claudicants	
	<i>L.U.CH. Janzon</i>	343
	Intermittent Claudication: Indicator of Generalised Atherosclerosis	343
	Value of Interventions in Claudicants	343
	Anti-thrombotic Treatment	345
	Swedish Ticlopidine Multicentre Study (STIMS)	345
	Ketanserin Trial (PACK)	346
32	Secondary Prevention of Ischaemic Heart Disease	
	<i>P.C. Elwood</i>	349
	Fatty Fish	350
	Dietary Fibre	351
	Reduced Dietary Fat	352
	Exercise	353
	Drug Prophylaxis	354
	Need for Further Research	355
	Subject Index	359
