Preface: The History of this Translation: Paul Rosbaud, Friend and Publisher of Wolfgang Pauli. By Charles P. Enz	1
<i>Robert Schlapp</i> (1899–1991). By Nicholas Kemmer	7
<i>Wolfgang Pauli</i> (1900–1958): A Biographical Introduction. By Charles P. Enz	13

Wolfgang Pauli

1. Matter	27
2. The Philosophical Significance of the Idea of Complementarity	35
3. Probability and Physics	43
4. Niels Bohr on His 60th Birthday	49
5. Sommerfeld's Contributions to Quantum Theory	59
6. Arnold Sommerfeld †	69
7. Rydberg and the Periodic System of the Elements	73
8. Paul Ehrenfest †	79
9. Einstein's Contribution to Quantum Theory	85
10. Space, Time and Causality in Modern Physics	95
11. The Theory of Relativity and Science	107
12. Impressions of Albert Einstein	113
13. Albert Einstein and the Development of Physics	117
14. Theory and Experiment	125
15. Phenomenon and Physical Reality	127
16. Science and Western Thought	137
17. Ideas of the Unconscious from the Standpoint of Natural Science and Epistemology	149
18. Exclusion Principle and Quantum Mechanics	165
19. The Violation of Reflection Symmetries in the Laws of Atomic Physics	183

20. On the Earlier and More Recent History of the Neutrino	193
21. The Influence of Archetypal Ideas on the Scientific Theories of Kepler	219
