

Table of contents

Preface	v
Table of contents	vii
List of participants	xi
The average behaviour of the number of solutions of a Diophantine equation and an averaging technique <i>Sukumar Das Adhikari</i>	1
Pisot numbers and greedy algorithm <i>Shigeki Akiyama</i>	9
Upper bounds for the resultant and Diophantine applications <i>Francesco Amoroso</i>	23
Logarithmic forms and the <i>abc</i> -conjecture <i>A. Baker</i>	37
Local-global principles and linear algebraic groups <i>Eva Bayer-Fluckiger</i>	45
Diophantine approximation and quadratic fields <i>József Beck</i>	55
On a problem of P. Turán concerning irreducible polynomials <i>A. Bérczes and L. Hajdu</i>	95
On products of the terms of linear recurrences <i>Béla Brindza, Kálmán Liptai and László Szalay</i>	101
On the Kronecker–Györy specialization <i>B. Brindza and Á. Pintér</i>	107
On the greatest prime factor of $ax^m + by^n$ <i>Yann Bugeaud</i>	115
The Euclidean algorithm in cubic number fields <i>Stefania Cavallar and Franz Lemmermeyer</i>	123
A problem of Diophantus and Dickson’s conjecture <i>Andrej Dujella</i>	147

Transcendence of Jacobi's theta series and related results <i>Daniel Duverney, Keiji Nishioka, Kumiko Nishioka and Iekata Shiokawa</i>	157
Some of my new and almost new problems and results in combinatorial number theory <i>Paul Erdős</i>	169
Lower bounds for resultants II <i>Jan-Hendrik Evertse</i>	181
Distribution of binomial coefficients modulo p <i>Zachary M. Franco</i>	199
The distribution of the zeros of the Riemann zeta function and Baker's theorems <i>Akio Fujii</i>	211
θ -congruent numbers <i>Masahiko Fujiwara</i>	235
Computing power integral bases in algebraic number fields <i>István Gaál</i>	243
Recent bounds for the solutions of decomposable form equations <i>K. Győry</i>	255
On a generalization of the Maillet determinant <i>S. Kanemitsu and T. Kuzumaki</i>	271
An approximation problem concerning linear recurrences <i>Péter Kiss</i>	289
Elementary definability from Pascal's triangle modulo p and the set of e -th powers <i>Ivan Korec</i>	295
New methods in algebraic independence <i>Michel Laurent</i>	311
On the arithmetic of simplest sextic fields and related Thue equations <i>Günter Lettl, Attila Pethő and Paul Voutier</i>	331
Algebraic constructions of lattices; isodual lattices <i>Jacques Martinet</i>	349

Real roots of Fibonacci-like polynomials <i>Ferenc Mátyás</i>	361
On some modular identities <i>Giuseppe Melfi</i>	371
Complete resolution of some families of Diophantine equations <i>Maurice Mignotte</i>	383
Experiments on a problem of D. Shanks concerning quadratic fields <i>Toru Nakahara</i>	401
Squares in binary recurrence sequences <i>Ken Nakamura and Attila Pethő</i>	409
Algebraic curves over finite fields with many rational points <i>Harald Niederreiter and Chaoping Xing</i>	423
On a Shintani decomposition for a cubic field defined by $X^3 + kX - 1 = 0$ <i>Ryotaro Okazaki</i>	445
Klein polyhedra for complete decomposable forms <i>V.I. Parusnikov</i>	453
Arithmetical progressions formed by Lucas pseudoprimes <i>A. Rotkiewicz</i>	465
Reducibility of polynomials over Kroneckerian fields <i>A. Schinzel</i>	473
A note on certain exponential Diophantine equations <i>Nobuhiro Terai</i>	479
The fundamental lemma of Kubilius and the model of Kubilius in number fields <i>Jörg M. Thuswaldner</i>	489
Diophantine properties of digital expansions <i>R.F. Tichy</i>	501
Exponential diophantine equations 1986–1996 <i>R. Tijdeman</i>	523
Basic algorithms for elliptic curves <i>Horst G. Zimmer</i>	541
