Foreword	vii
---------------------------	-----

Invited Addresses

P. M. Higgins

<i>Ramsey's Theorem in algebraic semigroups</i>	1
---	---

A. A. Mikhalev

<i>Combinatorial aspects of the theory of Lie superalgebras</i>	37
---	----

A. V. Mikhalev

<i>Isomorphisms and anti-isomorphisms of endomorphism rings of modules</i>	69
--	----

Contributed Papers

V. A. Artamonov

<i>Algorithmic solution of quantum Serre conjecture</i>	123
---	-----

K. I. Beidar, Y. Fong and W.-F. Ke

<i>On the simplicity of centralizer nearrings</i>	139
---	-----

K. I. Beidar, Y. Fong, U. Knauer, A. V. Mikhalev and K. P. Shum

<i>Semigroups with generalized polynomial identities</i>	147
--	-----

A. Belov and T. Gateva-Ivanova

<i>Radicals of monomial algebras</i>	159
--	-----

G. M. Brodskii

<i>Lattice anti-isomorphisms of modules and the AB5* condition</i>	171
--	-----

M. A. Chebotar

<i>On certain subrings and ideals of prime rings</i>	177
--	-----

B. Chen

<i>The induced linear maps on Minkowski algebras of convex sets</i>	181
---	-----

S.-J. Cheng	
<i>Superconformal algebras and affine algebras with extended symmetry</i>	199
M. I. Gekhtman and A. Stolin	
<i>Orbits of the coadjoint representation and Yang–Baxter equation</i>	207
A. V. Grishin	
<i>On the finite basis property of T-spaces over a field of finite characteristic . . .</i>	225
N. Lam	
<i>On the conjecture of the resolution of a finite set of points in projective space. .</i>	229
V. N. Latyshev	
<i>Lie nilpotency: recognition and word problem</i>	237
T.-K. Lee and T.-C. Lee	
<i>Annihilators of power values of a derivation</i>	241
V. T. Markov	
<i>Modules with Krull and Gabriel dimensions over rings and algebras with polynomial identities</i>	249
A. A. Mikhalev, U. U. Umirbaev and A. A. Zolotykh	
<i>A Lie algebra with cohomological dimension one over a field of prime characteristic is not necessarily free</i>	257
V. A. Mushrub	
<i>Extended centroid of Ore extensions and injective ring endomorphisms</i>	265
A. A. Nechaev	
<i>Polylinear recurring sequences over modules and quasi-Frobenius modules</i>	283
L. S. Shiao and C. S. Wang	
<i>On semi-endomorphism near-rings of non-abelian groups of order pq</i>	299
A. Slinko	
<i>Local structure of linearly compact algebras and local finiteness of coalgebras</i>	307

G. Szeto and Y.-F. Wong	
<i>Azumaya algebras in skew group rings</i>	317
A. A. Tuganbaev	
<i>On distributive rings and modules</i>	323
B.-Y. Yang and Y.-N. Yeh	
<i>Chains of motley gems—and their Wiener indices</i>	329
