

Contents - Volume II*

Survey Paper

Volume II: Physico-Chemical Processes and Nonequilibrium Flows -
An Introductory Survey

John H. Kiefer 3

Plenary Lectures

The Role of Lasers in Shock Tube Studies of Chemical Kinetics

R.K. Hanson 7

Experimental Verification of Real Gas Effects in High-Enthalpy Flows

G. Eitelberg 15

Part 1: Chemical Kinetics

Vibrational Temperature Measurements in a Shock Layer Using Laser Induced
Predissociation Fluorescence

D.J. Sutton, A.F.P. Houwing, P.C. Palma and R.J. Sandeman 27

Semiconductor Laser Diagnostics of Kinetic and Population Temperatures in High-
Enthalpy Flows

H. Andrew Chang, Douglas S. Baer and Ronald K. Hanson 33

A Laser Photolysis Shock Tube Study of the Reaction of OH with NH₃

John D. Mertens, Margaret S. Wooldridge and Ronald K. Hanson 37

Pressure Influence on the Rate of NF₃ Decomposition Behind Shock Waves

N.N. Koudriavtsev, A.M. Sukhov and D.P. Shamshev 43

A Shock Tube Study of the Oxidation of Silicon Atoms by NO and CO₂

Hans Jürgen Mick and Paul Roth 47

On the Formation of S(³P) and S(¹D) During the Thermal Decomposition of COS
Behind Shock Waves

D. Woiki and P. Roth 53

Experiments on Shock-Heated Ozone Dissociation in Oxygen/Air Using UV Laser
Spectroscopy

M.L. Thoma and F.J. Hindelang 59

High-Temperature Reactions of Ozone with Bromine Behind Shock Waves.

Rate Constant for the Reaction BrO+BrO→2Br+O₂

Kazuo Takahashi, Junichi Honda, Tadaaki Inomata and Hiroshi Jinno 65

High-Temperature Reaction of O(³P)+H₂S

Kentaro Tsuchiya, Hiroyuki Matsui, Masaaki Oya and Gabrielle Dupré 71

Direct Measurement of the Reaction H+CO₂ at Elevated Temperatures

K. Wintergerst and P. Frank 77

A Shock Tube Study of Nitric Acid Decomposition

Margaret S. Wooldridge, Ronald K. Hanson and Craig T. Bowman 83

* The Contents of the other volumes are given at the end of the book.

The Reaction of CN with NO at High Temperatures in Shock Waves Y. He, C.H. Wu, M.C. Lin and C.F. Melius	89
A Shock Tube Study of the Reaction $\text{CH} + \text{NO} \rightleftharpoons \text{Products}$ Using a Perturbation Method Michael W. Markus and Paul Roth	95
Kinetics of the Decay of CH_3 Radicals in Shock Waves Joseph Zhichun Su and Heshel Teitelbaum	101
Thermal Reactions of Oxiran, Methyloxiran and Dimethyloxiran. Single-Pulse Shock Tube Investigation Assa Lifshitz	107
Reactions of $\text{C}_3\text{H}_3\text{Cl}$ with H_2 , C_3H_4 , C_2H_2 and C_2H_4 Behind Reflected Shock Waves R.D. Kern, H. Chen, Z. Qin and K. Xie	113
High-Temperature Unimolecular Decomposition of Ethyl Chloroformate: Comparison of the Secondary Competing Steps with Ethyl Formate K. Saito, A. Oda and K. Tokinaga	119
Single-Pulse Shock Tube Studies on the Reactions of Hydrogen Atoms with Acetone and Dimethylether Wing Tsang and J.P. Cui	125
Studies on the Reactions of Atomic Oxygen(3P) with C_2 - C_6 Alkanes at High Temperatures: Examination of the Transition State Theory Akira Miyoshi, Kentaro Tsuchiya, Atsumu Tezaki and Hiroyuki Matsui	131
Nonlinear Effects of Ultrasonic Cavitation in a Catalyst Production Process V.Yu. Borodyllin, N.V. Malykh and V.M. Petrov	137

Part 2: Combustion Kinetics

Combustion and Shock Waves in H_2 - O_2 -Steam Systems A.Yu. Kusharin, O.E. Popov and G.L. Agafonov	143
Comparison Between the Ignition of H_2 -Air- CO_2 and H_2 -Air- H_2O Mixtures by a Hot Gas Jet N. Djebaili, R. Lisbet, C. Paillard and G. Dupré	149
Reduced Chemical Reaction Mechanism of Shock-Initiated Ignition of Methane and Ethane Mixtures with Oxygen W.C. Gardiner, Jr., V.V. Lissianski and V.M. Zamanski	155
Comparison of Shock-Tube Ignition Characteristics of Various Fuel-Air Mixtures at High Pressures K. Fieweger, H. Ciezki and G. Adomeit	161
Investigation on Soot Formation of n-Heptane-Oxygen-Argon Mixtures in a High Pressure Shock Tube J. Yao, K. Fieweger, M. Kleppel and G. Adomeit	167
Shock-Tube Study of High-Temperature Oxidation of Phenyl Radical N. Fujii, H. Muratake, K. Okamura, T. Kobayashi and Y. Nosaka	173
Shock Tube Combustion of Liquid Hydrocarbon Sprays at High Temperatures P. Cadman	179
Spray Combustion of Methanol in Reflected Shock Waves T. Tsuboi and R. Katoh	185

Numerical Simulation of Shock Waves Through Combustible Two-Phase Media A. Koichi Hayashi, Takayuki Fuyuto and Toshi Fujiwara	191
Ignition Delay-Times of n-Pentane in a Shock Tube Alexander Burcat and Michael Dvinyaninov	197
A Shock Tube Study of the Reaction $\text{CH}_3 + \text{O}_2$ M. Braun-Unkhoff, C. Naumann and P. Frank	203
Shock-Controlled Chemical Processing A.T. Mattick, D.A. Russell, A. Hertzberg and C. Knowlen	209

Part 3: Non-Equilibrium Flow

Hypervelocity Carbon Dioxide Flow Simulation R.G. Morgan, A.J. Neely and M.L. Scott	217
Experiments on Hypervelocity Dissociating Flow over Spheres Chihyung Wen and Hans Hornung	223
Raman Scattering Measurements of Vibrational Relaxation in Expanding Nitrogen W.D. Gillespie and S.P. Sharma	229
Comparisons of CFD with CARS Measurements in Hypervelocity Nitrogen Flows R.R. Boyce, D.R.N. Pulford, A.F.P. Houwing, Ch. Mundt and R.J. Sandeman	235
Research on Nonequilibrium Phenomena at NASA Ames's E.A.S.T. Facility Surendra P. Sharma	241
Numerical Simulation of Reacting Flows Related to the HEG K. Hannemann, S. Brück and G. Brenner	251
Measurement of Heterogeneous Recombination Probabilities in Shock-Tube Simulation of Space Shuttle-Type Reentry N.N. Koudriavtsev	257
Front Structures of Strong Shock Waves in Air J. Koreeda, H. Yanagisawa, K. Maeno, H. Honma, S.A. Bystrov, V.I. Ivanov and F.V. Shugaev	263
Non-Equilibrium Flow Behind Strong Shock Waves in Air A. Viviani, R. Savino and S. Cozzolino	269
Level Kinetics of the Dissociation and Vibrational Relaxation Behind Shock Waves E. Nagnibeda	275
Vibration-Dissociation Relaxation Phenomena in Shock-Heated Nitrogen J.G. Méolans, M. Mouti, F. Lordet and A. Chauvin	279
Two-Temperature Chemical Kinetics. Dissociation of Diatomic Molecules Behind a Strong Shock Wave Stalii A. Losev and Oleg P. Shatalov	285
Experimental Investigation of Non-Equilibrium Temperatures in a Plane Shock Wave Yury V. Romanenko, Oleg P. Shatalov and Igor E. Zabelinsky	289

Nonequilibrium Flow Around an Injection Jet into a Hypersonic Flow Yumiko Inoue and A. Koichi Hayashi	293
Propagation Behaviour of Strong Shock Waves with Chemical Reactions in a Shock Tunnel Nozzle M. Nishida and M.G. Lee	301
Studies of Nonequilibrium Effects in Nozzle Flow Under High Reservoir Conditions Le Jialing and Dong Weizhong	307
Chemically Reacting Multi-Nozzle Plume Flows T.P. Roberts	313
Nonequilibrium Hypersonic Flow Around a Blunt Body E. Schall and D. Zeitoun	321
A New Model for Rotation-Vibration-Dissociation Coupling in a Multi-Component Viscous Shock Layer Sergey V. Zhukotov and Gennadiy D. Smekhov	327
Viscous Shock Layer Analysis Using a Three-Temperature Model Y. Sakamura and M. Nishida	333
Huygens Probe Radiative Environment Marc Baillion, Gilles Taquin and Jacques Soler	339
DSMC Computation of Radiative Heat Flux During Huygens Entry into the Titan Atmosphere Torkil S. Mogstad	347
Radiation from Air Shock Layers with Chemical and Ionizing Reactions M.A. Gallis and J.K. Harvey	355
Weak Shock Waves Passing over a Hemicylinder in Carbon Dioxide H. Honma, K. Maeno, M. Itabashi and N. Watanabe	361

Part 4: Plasmas, Astrophysics

Exact Hydrodynamic Equations and Transport Coefficients in Higher-Order Approximations for Partially-Ionized Gases G.A. Tirskey	369
Reaction Kinetics Accounting for Carbon Impurities in Krypton Shock Waves Dieter Klages and Frank Demmig	375
Electron Driven Shock Waves: Antiforce Class II Waves Mostafa Hemmati	381
Modelling of Shock Wave Propagation in a Developing Discharge in Nitrogen N.Yu. Babaeva, A.Kh. Mnatsakanyan and G.V. Naidis	387
Shock Wave Structure in a High-Frequency Discharge Plasma S.A. Bystrov, E.N. Fomenko, F.V. Shugaev and G.I. Shved	391
Shock Waves and Flows in UV Laser-Produced Plasmas Th. Sarnet, J.E. Montagne, G. Inglesakis and M. Autric	395

Influence of Shock Waves on the Beam Quality of a High Pulse Repetition Frequency XeCl Laser O.P. Uteza, M.L. Sentis, Ph.C. Delaporte, B.M. Forestier and B.L. Fontaine	401
Shock Wave Study in a VUV Formed-Ferrite Plasma Source M.L. Sentis, F. Chazaud, L.H. Chinh, Ph. Delaporte and S. Moulins	407
Numerical Modelling of the Internal Ballistics of Electrothermal-Chemical Guns Edward Figura	413
Experimental Study of a Supersonic Low Pressure Nitrogen Plasma Jet B.G. Cheron, L. Robin and P. Vervisch	419
Shock Tube Conjugated with Nanosecond Discharge Gap for Investigating Shock Wave Propagation in Plasma A.A. Alyapin, I.V. Filiouguine, S.V. Kostiouchenko and N.N. Koudriavtsev	425
Intensive Beam Source of Fast Neutral Atoms Generated by an Electromagnetic Shock Tube N.N. Koudriavtsev, O.A. Maziar and A.M. Sukhov	429
Interaction of Strong Discontinuities in Magnetized Conducting Media A.A. Barmin and E.A. Pushkar'	433
Oblique Interaction of Strong Solar Wind Discontinuities in the Vicinity of the Terrestrial Magnetosphere E.A. Pushkar' and S.A. Grib	439
Author Index	445
Contents - Volumes I, III, IV	453
