

CONTENTS

Past, present and future of photosensitisers

R.H. Pottier.....1

Primary photochemical processes

M.A.J. Rodgers.....11

Continuous irradiation and emission methods

R.H. Pottier.....19

Fluorescence lifetimes of chromophores interacting with biomolecules

A. Andreoni.....29

Pulse radiolysis

T.G. Truscott.....39

The photophysics and photochemistry of some dye sensitisers

R.S. Sinclair, J. McLearnie and J.N. Chacon.....53

Spectral properties of hypericin-metal complexes

A.G. Golard and S.S. Brody.....63

Photolysis of the photosensitisers biotionol and fentichlor

A.S.W. Li and C.F. Chignell.....65

Laser flash photolysis and singlet oxygen quantum yields of anthracyclines

E.J. Land, A.J. McLean and T.G. Truscott.....69

Characterization of the anthralin radical by pulse radiolysis and laser photolysis

J.M. Bruce, A.A. Gorman, I. Hamblett, C.W. Kerr, C. Lambert
and S.P. McNeeney.....73

IX

Photophysical and photodynamic properties of new photosensitisers P.A. Firey, T.W. Jones, H-Y. Chang, M.E. Kenney and M.A.J. Rodgers.....	77
Photoacoustic spectroscopy in biomedical sciences C.N. N'soukpoé-Kossi and R. Leblanc.....	81
Absolute determination of quantum yields of Photosensitisation by time resolved thermal lensing R.W. Redmond and S.E. Braslavsky.....	93
Hematoporphyrin-manganese: a contrast agent for tumors in magnetic resonance imaging P. Poulet, M. Ouzafe, J. Steilbel, Y. Mauss and J. Chambron.....	97
Interactions of light with biological tissue L.I. Grossweiner.....	101
Optical measurements on tissue layers J.L. Karagiannes and L.I. Grossweiner.....	111
The optical properties of tissues at 633 nanometers as related to light dosimetry in photodynamic therapy B.C. Wilson, S.T. Flock and M.S. Patterson.....	117
Applications of the change in tissue optical properties caused by the prescence of photosensitisers M.S. Patterson, B.C. Wilson and R. Graff.....	121
Meehanistic characterization of photosensitised reactions C.S. Foote.....	125
Singlet oxygen involvement in membrane photomodification D.P. Valenzeno.....	145
Standards for singlet oxygen sensitisation A.A. Gorman, I. Hamblett, C. Lambert and A.L. Prescott.....	149

Biological and chemical photoproduction of hydrogen peroxide	
J.A. Navarro, M. Roncell and M.A. De la Rosa	153
Cell models	
T.M.A.R. Dubbelman, M. Smeets and J.P.J. Boegheim.....	157
Biological target molecules and cell structures in mammalian cell photosensitisation	
G. Moreno.....	171
Porphyrin photosensitisation of mitochondria	
C. Salet.....	183
Nuclear damage in mammalian cell photosensitisation	
G. Moreno.....	189
Biological implications of lesions introduced into DNA by singlet oxygen	
J. Piette, D. Decuyper-Debergh and A. Van de Vorst.....	201
Damage to DNA repair in Murine L929 fibroblasts induced by the photodynamic action of HPD	
J.P.J. Boegheim, T.M.A.R. Dubbelman and J. van Steveninck.....	211
Photoinactivation of cells studied by ^{31}P -NMR	
B. Kjeldstad, A. Johnsson and J. Krane.....	215
Sunlight, melanogenesis, and free radicals in the skin	
M.R. Chedekel.....	219
Pulsed irradiation studies of some reactions of melanin precursors	
J.N. Chacon, M.R. Chedekel, E.J. Land and T.G. Truscott.....	231
Melanin and photoprotection	
N. Kollias and A. Baqer.....	235
Pigmentogenic effects of psoralens	
P.E. Forlot.....	241

Melanogenesis and light regulated experimental carcinogenesis	
P. Janiaud.....	245
Role of melanins and drugs in cutaneous photosensitivity	
I.A. Menon, N.S. Ranadive, S. Shirwadkar, S. Persad	
and H.F. Haberman.....	249
Skin and related photoreactions	
B.E. Johnson.....	253
Phototherapy for pruritus in primary biliary cirrhosis	
S. Schauder and H. Koch.....	265
Psoralens: a review	
F. Dall'Acqua.....	269
Mutagenesis of psoralens on eukaryotic cells	
D. Averbeck.....	279
Bichromophoric systems to study the base-psoralen photoreactions	
J.L. Decout and J. Lhomme.....	293
Photophysical behaviour of 5-methoxypsoralen in different solvent systems	
T. Sa e Melo, A. Macanita, M. Prieto, M. Bazin,	
J.C. Ronfard-Haret and R. Santus.....	297
Furocoumarin photosensitised reations with fatty acids	
K.G. Specht, P. Bhan, M.R. Chedekel and W.R. Midden.....	301
Furocoumarin photosensitisation: wavelength dependence of monoadduct and crosslink formation in yeast	
S. Baydoun and A.R. Young.....	305
The use of animal models for human risk assessment of psoralen photocarcinogenesis	
A.R. Young.....	311

Phototherapy and PUVA therapy

C.A. Ramsay.....321

Ocular phototoxicity

J.E. Roberts.....325

Ocular protection for patients undergoing PUVA or photodynamic * therapy

B.R. Chou and A.P. Cullen.....331

Diseases associated with defective tetrapyrrole metabolism: porphyria and hyperbilirubinemia

A.F. McDonagh.....335

Photophysical and related aspects of haematoporphyrin and related systems

T.G. Truscott.....345

Photophysical properties of chlorin derivatives of haematoporphyrin

R. Cubeddu, W.F. Keir, R. Ramponi and T.G. Truscott.....355

Insoluble polymer-supported porphyrins as photosensitisers

J.M. Ribó, M.L. Sesé and F.R. Trull.....361

Water-soluble metal naphthalocyanines as potential photosensitisers

N.C. Yates.....365

HPD: chemical and biophysical studies

D. Kessel.....369

Studies of Photofrin II - induced photosensitisation of human red blood cells: variability between blood samples

J. Wright, J.W. Feather and S.B. Brown.....379

In vitro uptake and photodynamic action of tetra (3-hydroxyphenyl) porphyrin in cells

P.B. Jacobson and J. Moan.....383

Quantitative aspects of the interaction of porphyrins with cells	
M. Dellinger, D. Brault and C. Véver-Bizet.....	387
Uptake of the anticancer porphyrin mixture Photofrin II by human fibroblasts from low density lipoprotein, high density lipoprotein and albumin	
C. Candide, P. Morlière, J.C. Mazière, R. Santus, S. Goldstein, J. P. Reyftmann and L. Dubertret.....	391
Parameters influencing photodynamic selectivity of normal progenitors vs leukemia cells	
T. Patrice, M.T. Foultier, D. Cloarec and L. Le Bodic.....	395
Porphyrin-protein interaction	
T.M.A.R. Dubbelman.....	399
Photomodification of porphyrins in biological systems	
J. Moan, A. Western and C. Rimington.....	407
Photoradiation therapy of rodent tumors	
J. Moan and J. F. Evensen.....	419
Targets of porphyrins photodynamic action in vivo	
T. Sicuro and I. Cozzani.....	431
Phthalocyanines as sensitisers for photodynamic therapy of cancer	
J.E. van Lier, M. Brasseur, B. Paquette, J.R. Wagner, H. Ali R. Langlois and J. Rousseau.....	435
Pulsed laser studies of aluminium phthalocyanine derivatives	
R. Svensen, S. Fery-Forgues, A.J. MacRobert and D. Phillips.....	445
Zn-phthalocyanine as a possible phototherapeutic agent for tumors	
R. Biolo and E. Menegaldo.....	449
Photochemotherapy - clinical aspects	
J.C. Kennedy.....	453

In vivo fluorescence from mouse skin: spectral evidence for the presence of chlorophyll derivatives	
P.E. Paterson, G. Weagle, R. Pottier and J.C. Kennedy.....	465
DHE uptake and PDT response in an in vitro tumor model	
W.P. Jeeves, B.C. Wilson, P. Spiegl and P. Smith.....	469
Fluorescence diagnosis and photodynamic therapy evaluation of sensitisers by comparison of their pharmacokinetics	
E. Unsöld, C. Ell, R. Sroka, S. Stocker.....	473
In vivo aspects of PDT	
M.T. Foultier, T. Patrice, M.F. Le Bodic and L. Le Bodic.....	479
Alternative synthesis of "DHE" analogues	
R.W. Boyle and A.H. MacLennan	483
New photosensitisers for PDT	
A.R. Morgan, S. Nonis, R.W. Keck and S.H. Selman.....	487
A dose response study of two purpurins on the AY-27 rat bladder tumor	
A.R. Morgan, G.M. Garbo, R.W. Keck and S.H. Selman.....	491
In vivo cytotoxicity of metallopurpurins to bladder tumors	
A.R. Morgan, G.M. Garbo, R.W. Keck and S.H. Selman.....	495
Potential phototoxicity in the photosensitive patient	
C.L. Tanser.....	499
Participants.....	503
Index.....	511
