ICASE and the History of High-Resolution Schemes	
<i>B. van Leer</i>	1
A Brief Introduction to High-Resolution Schemes	
<i>P. Roe</i>	9

Chapter I. Riemann Solvers and Upwind Schemes

Annotation	31
1. On the Relation Between the Upwind-Differencing Schemes of Godunov, Engquist–Osher and Roe	
<i>B. van Leer</i>	33
2. On Upstream Differencing and Godunov-Type Schemes for Hyperbolic Conservation Laws	
<i>A. Harten, P.D. Lax, and B. van Leer</i>	53
3. Flux-Vector Splitting for the Euler Equation	
<i>B. van Leer</i>	80

Chapter II. Second-Order Total-Variation Diminishing Schemes

Annotation	93
1. A Comparative Study of Computational Methods in Cosmic Gas Dynamics	
<i>G.D. van Albada, B. van Leer, and W.W. Roberts, Jr.</i>	95
2. High Resolution Schemes and the Entropy Condition	
<i>S. Osher and S. Chakravarthy</i>	104
3. Convergence of Generalized MUSCL Schemes	
<i>S. Osher</i>	134
4. A Simplified TVD Finite Difference Scheme Via Artificial Viscosity	
<i>S.F. Davis</i>	149
5. On Central-Difference and Upwind Schemes	
<i>R.C. Swanson and E. Turkel</i>	167

Chapter III. Essentially Non-oscillatory Schemes

Annotation	185
1. Uniformly High-Order Accurate Nonoscillatory Schemes. I <i>A. Harten and S. Osher</i>	187
2. Uniformly High Order Accurate Essentially Non-oscillatory Schemes, III <i>A. Harten, B. Engquist, S. Osher, and S.R. Chakravarthy</i>	218
3. ENO Schemes with Subcell Resolution <i>A. Harten</i>	291
4. Efficient Implementation of Essentially Non-oscillatory Shock-Capturing Schemes, II <i>C.-W. Shu and S. Osher</i>	328
5. Essentially Nonoscillatory Spectral Fourier Methods for Shock Wave Calculations <i>W. Cai, D. Gottlieb, and C.-W. Shu</i>	375
6. Cell Averaging Chebyshev Methods for Hyperbolic Problems <i>W. Cai, D. Gottlieb, and A. Harten</i>	397

Chapter IV. Multidimensional Schemes

Annotation	421
1. A Rotationally Biased Upwind Difference Scheme for the Euler Equations <i>S.F. Davis</i>	423
2. Discrete Models for the Numerical Analysis of Time-Dependent Multidimensional Gas Dynamics <i>P.L. Roe</i>	451
3. Discontinuous Solutions to Hyperbolic Systems Under Operator Splitting <i>P.L. Roe</i>	470
4. High Resolution Finite Volume Methods on Arbitrary Grids Via Wave Propagation <i>R.J. LeVeque</i>	491
5. Design of an Essentially Nonoscillatory Reconstruction Procedure on Finite-Element-Type Meshes <i>R. Abgrall</i>	519
6. A Contribution to the Great Riemann Solver Debate <i>J.J. Quirk</i>	550
7. An Approximate Riemann Solver for Magnetohydrodynamics (That Works in More Than One Dimension) <i>K.G. Powell</i>	570
 Papers Reprinted	 585
