List of Contributors	xi
1 The Nature of Metastatic Bone Disease	
<i>R.D. Rubens</i>	1
Biology of Bone Metastases	1
Patterns of Bone Metastases	3
Morbidity from Bone Metastases	7
Assessment of Skeletal Disease	8
2 Normal Bone Remodelling and Its Disruption in Metastatic Bone Disease	
<i>B.F. Boyce</i>	11
Introduction	11
Normal Bone Structure	11
Normal Bone Modelling	12
Normal Bone Remodelling	13
Regulation of Bone Remodelling	17
Effects of Tumours on Bone	21
Osteosclerosis	24
Effects of Some Specific Tumour Cell Types in Bone	26
Summary	27
3 The Bone Scan in Metastatic Disease	
<i>I. Fogelman and J.H. McKillop</i>	31
Introduction	31
Pathophysiology of Skeletal Uptake of Diphosphonate ...	31
Bone Scan Imaging	32
Breast Cancer	45
Prostatic Cancer	48
Other Genito-urinary Tract Tumours	51
Lung Cancer	53
Neuroblastoma	54
Other Tumours	55
4 Radiology	
<i>Sheila Rankin</i>	63
Skeletal Survey	63

Distribution and Routes of Spread	63
Radiographic Appearances	66
Computed Tomography	70
Radiological Appearances at Specific Sites	74
Radiological Appearance of Specific Metastases	75
Comparison of Skeletal Survey and Isotope Bone Scans	76
Response to Treatment	77
Summary	80
5 Magnetic Resonance Imaging	
<i>M.A. Richards</i>	83
Introduction	83
Principles of Magnetic Resonance Imaging	83
Technical Considerations	85
MRI of Normal Bone Marrow	86
MRI of Pathological Bone Marrow	86
Comparison of Malignant and Osteoporotic Vertebral Collapse	87
Patterns of Vertebral Metastases	87
Sensitivity of MRI	89
Spinal Cord Compression	92
Monitoring Response to Treatment	93
Conclusions	95
6 Assessment of Response to Treatment	
<i>R.E. Coleman</i>	99
Imaging of Bone Metastases	99
Biochemical Monitoring	107
Subjective Assessment	114
Tumour Markers	115
Suggestions for Future Study	117
7 The Systemic Treatment of Bone Metastases	
<i>D.J. Dodwell and A. Howell</i>	121
Introduction	121
Systemic Therapy	123
Direct Anti-tumour Therapy	123
Inhibitors of Tumour Effects on Host Cells	131
Conclusions and Prospects	142
8 Pathogenesis and Management of Cancer-Associated Hypercalcaemia	
<i>S.H. Ralston</i>	149
Pathogenesis of Cancer-Associated Hypercalcaemia	149
Introduction	149
Classification	149
Mediators of Hypercalcaemia	150
Mechanisms of Hypercalcaemia: Summary	155

	Management of Cancer-Associated Hypercalcaemia	157
	Clinical Assessment	157
	Indications for Treatment	157
	Principles of Medical Management	158
	Specific Management Problems	158
9	Radiotherapy in the Management of Bone Metastases	
	<i>P.J. Hoskin</i>	171
	Principles of External Beam Irradiation	171
	Radiotherapy Treatment Techniques for Bone Metastases	172
	Biological Effects of Ionising Radiation	172
	Pathological Changes after Bone Irradiation	173
	Clinical Use of Radiotherapy for Bone Metastases	174
	Conclusion	184
10	Isotope Therapy for Bone Metastases	
	<i>Susan E.M. Clarke</i>	187
	Introduction	187
	Characteristics of Radionuclides Used for Therapy	187
	The Criteria for Selection	189
	Mechanisms for Localisation	191
	The Use of Radionuclides for Therapy	193
	Radiopharmaceuticals for Therapy	194
	Monoclonal Antibodies	195
	Radionuclide Therapy for Bone Metastases: Current Status	197
	The Future	201
11	The Role of the Orthopaedic Surgeon in the Treatment of Skeletal Metastases	
	<i>C.S.B. Galasko</i>	207
	Introduction	207
	Impending Fractures	207
	Pathological Fractures	210
	Non-pathological Fracture in a Patient with Malignant Disease	215
	Spinal Instability	215
	Compression of the Spinal Cord or Cauda Equina	217
	Non-metastatic Orthopaedic Conditions in Patients with Malignant Disease	220
12	Symptomatic and Supportive Care	
	<i>C. Terrell and J.R. Wedley</i>	223
	Introduction	223
	The Use of Drugs to Control Pain from Bone Metastases	223
	Orthopaedic Surgical Treatment	230
	Radiotherapy	230
	Transcutaneous Nerve Stimulation	231
	Acupuncture	231
	Intercostal Nerve Block	231

Paravertebral Block	232
Dorsal Root Ganglion Rhizolysis	232
Percutaneous Cervical Cordotomy	232
Pituitary Alcohol Injection	233
The Place of the Support Team	233
Conclusion	238
Subject Index	243
