

Contents

1	Learners Ideas and Misconceptions	1
1.1	Scientific Ideas: Theories of Science History	3
1.2	Learner: Empirical References of Student Conceptions	8
1.3	Teaching Processes: Considering Students' Conceptions	17
1.4	Human Element: Students' Conceptions and Everyday Language	22
	References	38
2	Motivation	41
2.1	Learner: Development, Attitudes, and Preconcepts	42
2.2	Teaching Processes: Opportunities to Create Intrinsic Motivation	44
2.3	Scientific Ideas: Experimental Skills	49
2.4	Human Element: Motivation Through Everyday Language and Media	50
	References	58
3	Teaching Aims	61
3.1	Scientific Ideas: Teaching Goals and Their Dimensions	62
3.2	Human Element: Guidelines and Curricula	67
	3.2.1 Germany	67
	3.2.2 USA	71
	3.2.3 England and the United Kingdom	75
3.3	Learner: Cognitive Development, Preconceptions, Attitudes, Interests	78
3.4	Teaching Processes: Variety of Methods for Realizing Teaching Goals	81
	References	90

4	Media	93
4.1	Teaching Processes: Variety of Media for Chemistry Lessons	96
4.2	Scientific Ideas: Appropriateness of Media	103
4.3	Learner: Media and the Ability for Abstract Thinking	105
4.4	Human Element: Mass Media	111
	References	117
5	Experiments	119
5.1	Scientific Ideas: Experiments, Experimental Skills, Safety	121
5.2	Teaching Processes: Purpose, Selection Criteria, and Forms of Experiments	129
5.3	Learner: Play Instinct, Curiosity, Experimental Skills	135
5.4	Human Element: Environmental, Everyday Life, and Historical Aspects	136
	References	151
6	Structural and Mental Models	153
6.1	Scientific Ideas: Thinking in Models	155
6.2	Teaching Processes: Models and Their Functions	165
6.3	Learner: Experience with Models	176
6.4	Human Element: Interdisciplinary Mental Models	177
	References	185
7	Scientific Terminology and Symbols	189
7.1	Scientific Ideas: Parameters, Units, Terms, Symbols	190
7.1.1	International System and Derived Units	190
7.1.2	Parameters and Units at School	191
7.1.3	Terminology at School	193
7.2	Teaching Processes: From Everyday to Expert and Symbol Language	197
7.2.1	Connecting Everyday Language and Scientific Terminology	199
7.2.2	Chemical Symbols	202
7.2.3	Deduction of Chemical Symbols at School	207
7.3	Learner–Student Concepts of Structures and Symbols	210
7.4	Human Element: Laymen’s Understanding of Scientific Terminology	213
	References	215
8	Everyday Life and Chemistry	217
8.1	Learner: Curiosity and Interest	218
8.2	Scientific Ideas: Chemistry Systematic Versus Everyday Life Chemistry	222
8.2.1	Hygiene: Example “Bathroom Chemicals”	223

8.2.2	Personal Hygiene: Example “Deodorants”	224
8.2.3	Health: Example “Mineral Tablets”	224
8.2.4	Nutrition: Example “Table Salt”	225
8.2.5	Household: Example “Baking Process”	225
8.2.6	Habitation: Example “Fuels for Heating”	225
8.2.7	Clothing: Example “Textile Dye Remover”	226
8.2.8	Leisure: Example “Black and White Photography”	226
8.2.9	Working World: Example “Metal Processing”	227
8.2.10	Electric Power Supply: Example “Accumulators”	227
8.2.11	House Building: Example “Hardening of Mortar”	228
8.2.12	Service: Example “Fire Fighting”	228
8.2.13	Motoring: Example “Alcohol Test”	229
8.2.14	Manufacturing: Example “Fertilizer”	229
8.2.15	Air: Example “Smog”	230
8.2.16	Water: Example “Sterilizing Drinking Water”	230
8.2.17	Soil: Example “Soil Acidification”	230
8.3	Teaching Processes: Systematic Chemistry Plus Everyday Life Chemistry	231
8.4	Human Element: Role Play and Environmental Education	237
	References	241

9	Students Discover Organic Chemistry: A Phenomena-Oriented and Inquiry-Based Network Concept (PIN-Concept)	245
9.1	The Criteria in Relation	248
9.2	Sorting Unknown Substances with Unknown Reagents	248
9.3	Interconnection of Substances by Means of Chemical Synthesis	250
9.4	Analysis of Household Substances	252
9.5	Discovery of Other Synthesis Relations	255
9.6	Leaping to the Particle Level	256
9.7	Use of Formulae (“Combining Structure and Properties”)	260
9.8	Integration of Other Substances	262
	9.8.1 Analysis of a Natural Substance	262
	9.8.2 Development of the Term “Homologous Series”	262
	9.8.3 Many Ways Lead to Acetic Acid	265
9.9	Other Associable Experiments and Concepts	267
9.10	The PIN-Concept for Teacher Training	269
9.11	The PIN-Concept for Grammar Schools	270
	9.11.1 Evaluation by the Teachers	271
	9.11.2 Evaluation by the Students	271
	9.11.3 Pretest Results of the Students	272
	9.11.4 Posttest Results of the Students	275
9.12	Conclusion	278
