Antibiotics	122
Corticosteroids	123
4 Incisions and Approaches	124
General	124
Terminology	124
Incisions, Approaches, and Techniques	124
Misnomers	124
External vs Internal Incisions	124
Basic Principles	124
Main Incisions	125
Caudal Septal Incision (Hemitransfixion)	125
Intercartilaginous Incision	126
Vestibular Incision	127
Infracartilaginous Incision	128
As used in the External Approach	128
As used in the Luxation Technique	129
Limited Infracartilaginous Incisions	129
Transcolumellar Inverted-V Incision	130
Special Incisions—External	131
Labiogingival Incision	131
Sublabial Incision	131
Paranasal Incision	131
Lateral Columellar Incision	131
Rim Incision	132
Alarfacial Incision (Long-Arm-U Incision; Alotomy)	132
V Incision of the Columellar Base	134
Dorsal Incisions—Horizontal Dorsal and Dorsal Reversed-V Incision	134
Special Incisions—Endonasal	135
Transfixion	135
Transcartilaginous Incision	135
Incisions in the Turbinate Mucosa	136
Incisions in the Septal Mucosa	136
Horizontal Basal Incision	136
Vertical and L-Shaped Incision	136
Stab Incisions	137
Vestibular Stab Incision	137
Paranasal Stab Incision	137
Nasion (Glabellar) Stab Incision	137
Alarfacial Stab Incision	137
Incisions to Avoid	138
5 Septal Surgery	140
Septal Surgery—An Essential Element of Functional Reconstructive Nasal Surgery	140
Sequence of Surgical Steps in Functional Reconstructive Nasal Surgery	140
1. Endonasal Approach	140
2. External Approach	140
Basics of Septal Surgery—The Six Phases of Septal Surgery	141
Phase 1: Approach	141
Caudal Septal Incision (Hemitransfixion)	141
Exposure of the Caudal Septal End	141
Phase 2: Mobilization	143

The Four Septal Tunnels	144	Septal Surgery in Children	171
The Different Methods	144	Indications	171
How to Create the Different Tunnels	146	Impaired Nasal Breathing	171
Connecting an Inferior with a Superior Tunnel .	148	Disturbance of Nasal Growth	171
Chondrotomies	148	Acute Nasal Trauma	171
Dissecting the Cartilaginous Septum from its Base ("Swinging Door" Technique)	151	Septal Hematoma and Abscess	171
Phase 3: Resection	151	Age Factor	171
Vertical Strips	151	Most Common Deformities	172
Horizontal strips	152	Vertical Fracture	172
Bony and Cartilaginous Crest	152	Horizontal Fracture	172
Bony and Cartilaginous Deviation	152	Defective Anterior Septum	172
Bony Spur	152	Surgical Techniques	173
Phase 4: Repositioning	152	Long-Term Effects	173
Phase 5: Reconstruction	153	Septal Hematoma and Abscess	175
Reconstruction of the Posterior Septum	153	Septal Hematoma	175
Reconstruction of the Anterior Septum	154	Symptoms	175
Phase 6: Fixation	154	Diagnosis	175
Internal Dressings	154	Prevention	175
Sutures and Splints	155	Treatment	175
Special Problems of Septal Surgery	157	Septal Abscess	177
1. Dislocated (Fractured) Caudal End	157	Symptoms	177
2. Missing Caudal End	158	Diagnosis	177
3. Basal Crest	160	Prevention	177
4. High Deviation	160	Treatment	177
5. Vomer Spur	161	Septal Perforation	180
6. Vertical Fracture	162	Classification	180
7. Horizontal Fracture	164	Prevention	181
8. Anterior Convexity	166	Guidelines	181
9. Missing Septum: (Sub)total Septal Recon- struction	167	Treatment Options	182
Approach	167	Surgical Closure	183
Methods	167	Dissecting the Perforation	183
Materials	167	Direct Closure	184
Surgical Techniques	169	Rotation-Flap Technique	184
6 Pyramid Surgery	192	Bridge-Flap (Advancement) Technique	185
Osteotomies—Mobilizing and Repositioning the Bony Pyramid	192	Buccogingival-Flap Technique	187
Mobilizing the Bony Pyramid	192	Prosthesis (Septal Button, Obturator)	188
Repositioning and Fixation of the Bony Pyramid .	192	Wedge Resection	206
Types of Osteotomy	192	Principles	206
Repositioning the Bony Pyramid	194	Surgical Technique	207
Bilateral Infracture	194	Adjusting the Lobule to the New Pyramid by Bilateral Resection of Soft-Tissue Wedges at the Alar Base	210
Bilateral Outfracture	194	Shortening Nasal Length to Adjust the Lobule to the New Pyramid	211
Rotation by Unilateral Infracture and Outfracture on the Opposite Side	194	Complications	211
Rotation by Unilateral Wedge Resection	195		
Push-Down with Bilateral Infracture	195		
Let-Down Following Bilateral Wedge Resection	196		
Push-Up	196		
Instruments Used for Osteotomies	196		
Saw	196		
Osteotome	197		

Hump Removal	212	Surgical Techniques	222
Types of Hump	212	1. Repositioning and/or Reconstructing the Septum	222
Surgical Techniques	213	2. Narrowing and Push-Up of the Bony Pyramid	222
1. Correcting a Bony Hump with Rasp and File	213	3. Augmentation by Dorsal Transplant (Implant)	223
2. Resecting a Bony and/or Cartilaginous Hump	214	4. Increasing Lobular Projection and Narrowing Lobular Width	227
Resecting a Bony Hump (or the Bony Part of a Combined Bony and Cartilaginous Hump)	215	5. Lengthening the Columella and Correcting Columellar Retraction	227
Resecting a Cartilaginous Hump (or the Cartilaginous Part of a Combined Bony and Cartilaginous Hump)	216	Complications	228
3. Let-Down (Push-Down)	217	Valve Surgery	228
Complications	219	Pathology of the Valve Area	228
Saddle Nose Correction	219	Surgical Techniques	228
Types of Saddling and Sagging	220	1. Septal Surgery	229
1. Bony and Cartilaginous Saddle Nose	220	2. Inferior Turbinate Surgery	229
2. Low-Wide Pyramid Syndrome	220	2. Triangular Cartilage Surgery	229
3. Bony Saddle	220	Widening the Valve Area	230
4. Cartilaginous Saddling and Sagging	221	Narrowing the Valve Area	236
		Prosthesis	237
		Complications	238
7 Lobular Surgery	239		
Approaches to the Lobule	239	Alar Surgery	259
The Four Main Approaches: Advantages, Disadvantages, and Indications	239	Deformities, Abnormalities, and Variations of the Ala and Their Surgical Correction	259
1. Retrograde (or Inversion) Technique	239	Surgical Techniques	259
2. Luxation (or Delivery) Technique	239	1. Reinforcing the Ala	259
3. External (or Open) Approach	239	2. Resecting a Protruding End of the Lateral Crus	262
4. Cartilage-Splitting (or Transcartilaginous) Technique	240	3. Reducing Alar Convexity	263
Techniques	240	4. Reducing Alar Concavity	264
1. Retrograde (or Inversion) Technique	240	5. Shortening the Ala by Wedge Resection at its Base	264
2. Luxation (or Delivery) Technique	241	6. Displacing the Alar Base	265
3. External Approach	243	7. Thinning the Ala	265
4. Cartilage-Splitting (or Transcartilaginous) Technique	245	8. Narrowing the Lobular Base	266
		9. Reconstructing the Ala	266
Tip Surgery	246	Columellar Surgery	268
Characteristics of the Tip	246	Deformities, Abnormalities, and Variations of the Columella and Their Surgical Correction	268
Definition	246	Surgical Techniques	269
Projection	246	Narrowing the Columella	269
Position	246	Reinforcing the Columella	270
Mechanics of the Tip	246	Correcting a Retracted Columella	271
Deformities, Abnormalities, and Variations of the Tip and Their Surgical Correction	248	Correcting a Hanging Columella	272
Surgical Techniques	249	Lengthening the Columella	272
Narrowing the Tip and Supratip Area	249	Shortening the Columella	273
Increasing Tip Projection	252	Vestibular Surgery	273
Reducing Tip Projection	254	Correcting an Oblique Columella	273
Upward Positioning (Rotation) of the Tip	256	Deformities	274
Downward Positioning of the Tip	258	Surgical Techniques	274
Shortening Nasal Length and Lifting the Tip by Resecting a Double Triangle of Skin from the Nasal Dorsum ("Tip Lift")	258	Widening the Vestibule	274
		Prosthesis	275

8 Surgery of the Nasal Cavity	276		
Turbinate Surgery	276	Conservative Treatment	287
General	276	Surgical Treatment	287
Types of Turbinate Pathology	276	Historical Development	287
Function-Preserving Treatment	276	Surgical Technique	287
Inferior Turbinate	276	Technique of Narrowing the Nasal Cavity	288
Pathology	276		
Treatment	277	Endonasal Surgery of the Infundibulum,	
Surgical Techniques	277	Ethmoid Bone, and Maxillary Sinus	290
Middle Turbinate	282	Pathology of the Infundibulum and
