

Contents

Structural and Functional Discrimination of Membrane Proteins	1
M. Michael Gromiha, Yu-Yen Ou, and Shu-An Chen	
Pharmacology of Hyperpolarization-Activated Cyclic Nucleotide-Gated (HCN) Channels	33
Patrick Bois, Aurelien Chatelier, Jocelyn Bescond, and Jean-François Faivre	
Advanced Molecular Modeling Techniques Applied to Ion Channels Blockers	53
Supa Hannongbua, Witcha Treesuwan, and Warabhorn Boonyarat	
Advances in Design and Development of Sodium Channel Blockers	79
Valentina Zuliani, Laura Amori, and Mirko Rivara	
Potassium Channel Blockers as Antiarrhythmic Agents	117
Qidong You, Qian Yang, and Xiaojian Wang	
hERG Potassium Channels in Drug Discovery and Development	149
Jitendra N. Singh and Shyam S. Sharma	
Prediction of hERG Channel Inhibition Using In Silico Techniques	191
Andrea Schiesaro and Gerhard F. Ecker	
Advances in Structure–Activity Relationship Studies on Potassium Channel Modulators	241
Brij K. Sharma, Prithvi Singh, and Yenamandra S. Prabhakar	

Calcium Ion Channels and Their Blockers	265
Dimitra Hadjipavlou-Litina	
Therapeutic Potential of N-Type Voltage-Gated Ca^{2+} Channel	289
C. Gopi Mohan, Ashish Pandey, and Jignesh Mungalpara	
Chloride Ion Channels: Structure, Functions, and Blockers	309
Satya P. Gupta and Preet K. Kaur	
Index	341
