

CONTENTS

THEORY OF SUPERCONDUCTING PHASE COUPLING

Theory of phase coherence in SQUID's.	
H. Lübbig.....	1
Investigation of the validity of generalizations of the adiabatic Josephson equation for a local junction by asymptotic expansions. W.A. Schlup.....	29
A self-consistent model of the Josephson junction.	
H. Ohta.....	35
Order parameter relaxation and Josephson effects in superconducting weak links. A. Baratoff, L. Kramer....	51

JUNCTION FABRICATION TECHNIQUES

Junction fabrication techniques. T. Van Duzer.....	63
Preparation of variable thickness microbridges using electron beam lithography and ion etching.	
R.D. Sandell, G.J. Dolan, J.E. Lukens.....	93

REAL JUNCTION PROPERTIES

Properties of real junctions. J.E. Mercereau.....	101
Some properties of long superconducting threads formed in monocrystalline silicon. Š. Beňačka, Ľ. Bezáková, Š. Gaži, J. Palaj.....	133
AC Josephson effect in long superconducting threads in static magnetic field. Š. Beňačka, S. Takács, Ľ. Bezáková, Š. Gaži.....	147

VIII

Voltage current characteristics of superconducting to normal metal point contacts in an rf-field.	
U. Kaiser-Dieckhoff.....	165
Measurement of the $\cos\phi$ term in Josephson tunneling.	
M.R. Halse, J.C. Taunton.....	171
Effects in high critical current density Josephson tunnel junctions. J. Niemeyer, V. Kose.....	179
Supercurrent interference patterns in a tunneling junction structure. E.P. Balsamo, G. Paternò, A. Barone, M. Russo, R. Vaglio.....	193
Anomalous thermoelectric effects in point contact tunnel junctions. N.K. Welker, F.D. Bedard.....	199

LOW FREQUENCY APPLICATIONS

Current performance of superconducting quantum interference devices. J. Clarke.....	213
A variable temperature high sensitivity SQUID magnetometer. J.A. Good.....	225
Flux creep of superconductors measured with a SQUID system. W. Ludwig, H. Gessinger.....	239
A magnetic excited state in oxy haemoglobin A detected with an rf-SQUID-magnetometer. H.E. Hoenig, K. Gersonde.....	249
High temperature application of SQUID voltmeter. M. Konishi, T. Fujita, T. Ohtsuka.....	255
Use of persistent supercurrents in SQUID current stabilisers and their application to a resistivity measurement on niobium and a portable voltage standard. J.C. Gallop.....	267
The use of resistive SQUIDs for calorimetry. J.G. Park.....	277

Possible cryocoolers for SQUID magnetometers.	
J.E. Zimmerman, R. Radebaugh, J.D. Siegwarth.....	287
On limiting magnetic field sensitivity of superconducting quantum interferometer with two Josephson junctions. S.I. Bondarenko.....	297
An integrated thin film gradiometer based on a dc SQUID. G.B. Donaldson, M.B. Ketchen, J. Clarke, W. Goubau.....	303
A cryodevice for induction monitoring of dc electron or ion beams with nano-ampere resolution. K. Grohmann, D. Hechtfisher, J. Jakschik.....	311
A SQUID comparator bridge for low- T_c -cryoresistor measurements. D. Andreone, E. Arri, G. Boella, G.C. Marullo, E.P. Balsano, U. Michi.....	317
HIGH FREQUENCY APPLICATIONS	
Superconducting devices for millimeter and submillimeter wavelengths. P.L. Richards.....	323
A closed loop broadband microwave operated SQUID. H. Rogalla, C. Heiden.....	339
A numerical treatment of the lumped model of an rf biased SQUID by means of a hybrid computer. S.N. Ern�, H. Luther.....	349
Rf power measurements using quantum interference in superconductors. D.B. Sullivan, N.V. Frederick, R.T. Adair.....	355
An analysis of the low inductance ac-SQUID operated as a dc-magnetometer in a mixing mode. O.H. Soerensen.	365
High frequency properties of stable Nb-Nb oxide-Pb Josephson tunnel junctions. T.F. Finnegan, J. Wilson, J. Toots.....	381

X

NOISE

Noise limitations of rf SQUIDs. R.A. Buhrman.....	395
Optimum response and damping of Josephson junctions. C.D. Andriesse.....	433

COMMUNICATION SYSTEMS

SQUID magnetometers for submarine communications at extremely low frequencies. J.R. Davis, M. Nisenoff....	439
---	-----

SIGNAL PROCESSING

Complete linear equivalent circuit for the SQUID. G.J. Ehnholm.....	485
Two junction SQUID using a sampling technique. P. Gutmann.....	501
Rf SQUID in the non hysteretic mode: the phase modulation of the tank voltage. S.N. Ern�.....	511

COMPUTER ELEMENTS

SQUIDs as computer elements. P. Wolf.....	519
Switching between two different vortex modes in Josephson junctions. S. Hasuo, T. Imamura, K. Dazai...	541
Switching dynamics of Josephson junction logic circuits. H.W. Chan, B.T. Ulrich, T. Van Duzer.....	555
Superconducting neuromime: a Josephson junction model neuron. B.T. Ulrich.....	567
Dynamics of flux transitions in the SQUID for the hysteretic case. S.N. Ern�, H. L�bbig.....	579

SUMMARY AND CONCLUSIONS

Summary and conclusions. J. Clarke.....	587
Subject Index.....	595
Author Index... ..	605
