Abstract	iv
Acknowledgements	iv
Introduction: Environmental Change, Paleolimnology, and Diatoms	1
Methods	2
(a) Diatom preparation and analysis	2
(b) Statistical analyses	3
(i) Ordination	3
(ii) Estimation of the optima and tolerances of taxa to environmental gradients	3
Chapter 1: Diatoms as Indicators of Salinity and Brine Composition	6
1.1 Introduction	6
1.2 Study area	7
1.3 Methods	10
1.3.1 Sampling methods	10
1.3.2 Laboratory methods	12
1.3.3 Statistical analyses	13
(a) Ordination	13
(b) Development of diatom-based salinity inference models	14
1.4 Distributions of diatom taxa along gradients of salinity, ionic composition and other environmental variables, and salinity inference models	14
1.5 Distributions of dominant diatom taxa along a gradient of lake-water salinity	19
Chapter 2: Diatoms as Indicators of Lake Trophic Status	39
2.1 Introduction	39
2.2 Study area	39
2.3 Methods	40
2.3.1 Sampling methods	40
2.3.2 Laboratory methods	40
2.3.3 Statistical analyses	41
(a) Data screening	41
(b) Regression and calibration	41
2.4 Distributions of diatom taxa along multiple environmental gradients and total phosphorus inference models	42
2.5 Distributions of dominant diatom taxa along a gradient of total phosphorus	43
