

Table of Contents

1	Introduction	1
1.1	Book Plan	2
1.2	Introduction to Mellin Transforms	6
1.3	Higher Transcendental Functions	12
2	Basic Equations for Wave Propagation in Turbulence	19
2.1	Turbulence Spectra	20
2.2	Rytov Approximation	30
2.3	Phase and Log-Amplitude Variances	34
2.4	Power Spectral Density	42
2.5	Beam Shape and Strehl Ratio	43
3	Aperture Filter Functions	47
3.1	Circular Aperture Modes	48
3.2	Piston and Tilt on an Annulus	51
3.3	Finite Apertures and Focal Anisoplanatism	53
3.4	Adaptive-Optics Systems	57
4	Zero-Parameter Problems	59
4.1	Turbulence Models and Moments	59
4.2	Zernike Tilt and Piston for Collimated and Focused Beams	63
4.3	Gradient Tilt	65
4.4	Difference Between Gradient and Zernike Tilt	65
4.5	Beam Movement at a Target	66
4.6	Angle-of-Arrival Jitter	68
4.7	Scintillation for Collimated and Focused Beams	70
4.8	Phase Variance with Finite Servo Bandwidth	71
4.9	Variances for Beams Corrected by Adaptive Optics	72
5	Integral Evaluation with Mellin Transforms	75
5.1	Integral Evaluation with One Parameter	76
5.2	Asymptotic Solutions	83
5.2.1	Alternate Method of Integral Evaluation	88
5.3	Multiple Poles	89
5.3.1	Expansion of Integrand Functions	90

XII *Table of Contents*

5.3.2	Example 1	91
5.3.3	Example 2	92
5.3.4	Example 3	93
5.3.5	Example 4	94
5.3.6	Example 5	94
5.3.7	Example 6	95
6	Other Applications of Mellin Transforms	99
6.1	Convolutional Transforms	100
6.2	Laplace's Equation in Cylindrical Coordinates	101
6.3	Laplace's Equation in Spherical Coordinates	103
6.4	Time Varying Problems	105
6.5	Integral Equations	108
6.6	Multiple Integrals and Asymptotic Series from Power Series . .	109
6.7	Miscellaneous Additional Applications	110
7	Examples with a Single Positive Parameter	113
7.1	Tilt for the von Kármán Spectrum	114
7.2	Tilt for the Greenwood Spectrum	116
7.3	Tilt with Finite Inner Scale	118
7.4	Piston- and Tilt-Removed Phase Variance on an Annulus	120
7.5	Effect of Diffraction on Tilt	125
7.6	Tilt Anisoplanatism	128
7.7	Power Spectral Density of Tilt	136
7.8	Scintillation with Finite Apertures and Sources	139
7.9	Scintillation with Finite Inner Scale	143
7.10	Scintillation Anisoplanatism	146
7.11	Focus Anisoplanatism	147
7.12	Focal Anisoplanatism for Point Sources	150
7.13	Focal Anisoplanatism for Distributed Sources	155
7.14	Focal Anisoplanatism for Offset Sources	157
8	Strehl Ratio	161
8.1	Strehl Ratio for Propagation Through Turbulence	161
8.2	Strehl Ratio with Beam Jitter	164
8.3	Strehl Ratio with Anisoplanatism	168
8.4	Strehl Ratio for Various Anisoplanatic Effects	172
8.4.1	Displacement Anisoplanatism	172
8.4.2	Angular Anisoplanatism	174
8.4.3	Time-Delay Anisoplanatism	174
8.4.4	Chromatic Anisoplanatism	177
8.4.5	Combined Displacement Anisoplanatism	180

9	Mellin Transforms with a Complex Parameter	183
9.1	Mellin-Barnes Integrals with Complex Parameters	183
9.2	Asymptotic Results with a Complex Parameter	185
9.3	The Mellin Transform of an Exponential Times a Bessel Function	189
10	Examples With a Single Complex Parameter	193
10.1	Phase and Log-Amplitude Variances of Beam Waves	193
10.2	Power Spectral Density of Beam Waves	197
10.3	Scintillation on Beam Waves	198
11	Mellin Transforms in N Complex Planes	205
11.1	Convergence of Multi-Parameter Series	207
11.2	Path Closure at Infinity	210
11.3	Integration in Multiple Complex Planes	212
11.3.1	Evaluation Procedure for N Complex Planes	222
11.4	Asymptotic Solution in Two or More Complex Planes	222
12	Examples with N Parameters	233
12.1	An Integral with Two Bessel Functions and a Sinusoid	234
12.2	An Integral with Three Bessel Functions	236
12.3	Example in Three and N Complex Planes	239
12.4	Effect of Outer Scale on Tilt Anisoplanatism	241
12.5	Tilt with Inner and Outer Scale	246
12.6	Power Spectrum of Tilt with Outer Scale	250
12.7	Structure and Correlation Functions with Inner and Outer Scales	255
13	Beam Shape	263
13.1	General Formula for Beam Shape	263
13.2	Beam Shape for Uncorrected Turbulence	266
13.3	Beam Shape with Tilt Jitter	268
13.4	Beam Shape with Anisoplanatism	271
A	Additional Mellin Transforms	277
B	Trancendental Functions	285
	References	289
	Index	297
