

Contents

Toward the Synthesis of Constraint Propagation Algorithms <i>D.R. Smith (Invited Speaker)</i>	1
A Formal View of Specification, Deductive Synthesis and Transformation of Logic Programs <i>K.-K. Lau and M. Ornaghi</i>	10
Reachability Analysis for the Extension Procedure – A Topological Result <i>G. Neugebauer</i>	32
Inductive Synthesis of Logic Programs and Inductive Logic Programming <i>F. Bergadano and D. Gunetti</i>	45
Induction of Prolog Programs with Markus <i>M. Grobelnik</i>	57
A General Technique for Automatically Generating Efficient Programs Through the Use of Proof Planning (Abstract) <i>P. Madden, J. Hesketh, I. Green and A. Bundy</i>	64
Guiding Synthesis Proofs <i>V. Lombart, G. Wiggins and Y. Deville</i>	67
Combining Prolog Programs in a Techniques Editing System (Abstract) <i>M. Vargas-Vera, D. Robertson and R. Inder</i>	82
Designing Prolog Programming Techniques <i>W. Weber Vasconcelos</i>	85
Interactive Program Derivation Using Program Schemata and Incrementally Generated Strategies <i>A.-L. Johansson</i>	100
The Power of Partial Evaluation <i>D.A. de Waal</i>	113
Specialising the Ground Representation in the Logic Programming Language Gödel <i>C.A. Gurr</i>	124

Synthesis of Programs from Unfold/Fold Proofs <i>M. Proietti and A. Pettorossi</i>	141
Some Further Issues in Finite Unfolding (Abstract) <i>B. Martens and D. De Schreye</i>	159
A Transformation Based on the Equality Between Terms <i>U. Neumerkel</i>	162
Automatic Exploitation of Non-Determinate Independent And-Parallelism in the Basic Andorra Model <i>M. Olmedilla, F. Bueno and M. Hermenegildo</i>	177
Memoing with Abstract Answers and Delphi Lemmas <i>P. Tarau and K. De Bosschere</i>	196
Using Abstract Interpretation for Goal Replacement <i>D. Boulanger and M. Bruynooghe</i>	210
Mechanical Transformation of Logic Definitions Augmented with Type Information into Prolog Procedures: Some Experiments <i>P. De Boeck and B. Le Charlier</i>	229
Author Index	247
