

Table of Contents

Overview of Contents.....	v
Table of Contents.....	ix
List of Figures	xiii
List of Tables	xv
List of Abbreviations	xvii
Part I Introduction	1
1 Motivation and relevance	2
2 Structure of the thesis	4
Part II Theoretical Foundations	9
1 Overview.....	10
2 Embedded systems	11
3 Open innovation.....	14
4 Openness.....	18
4.1 Definition of openness	19
4.2 Openness in computer systems	24
4.2.1 Openness on the software layer	25
4.2.2 Openness on the hardware layer	27
4.3 Openness of ES.....	29
4.3.1 Organizational openness of ES	29
4.3.2 Technical openness of ES	30
4.4 Openness from a platforms perspective.....	34
4.4.1 Platforms.....	34
4.4.2 Openness of platforms	35
4.4.3 Implications on ES openness	38
4.5 Openness from a modularity perspective	39
4.5.1 Modularity	39
4.5.2 Determinants of modularity	41
4.5.3 The process of modularization.....	43
4.5.4 Modularity and openness	45
5 Summary of part II.....	49
Part III Empirical Studies	53
1 Research design	54

2	Study 1 - Exploring open innovation processes in the ES domain	57
2.1	Research design	58
2.2	The three core open innovation processes.....	58
2.2.1	Implications of the characteristics of ES on the outside-in process	59
2.2.2	Implications of the characteristics of ES on the inside-out process.....	62
2.2.3	Implications of the characteristics of ES on the coupled process	63
2.3	Results	65
2.4	Conclusion.....	67
3	Study 2 - Organizational opening of ES companies for open innovation.....	67
3.1	Research Design.....	68
3.1.1	Data collection.....	68
3.1.2	Data analysis.....	69
3.2	Forms of embedded systems openness.....	70
3.3	Technical factors influencing ES openness	71
3.4	Organizational factors influencing ES openness	73
3.5	Discussion.....	76
3.6	Conclusion.....	76
4	Study 3 – Technical opening of embedded systems for open innovation	77
4.1	Research design	78
4.1.1	Data collection.....	78
4.1.2	Data analysis.....	81
4.2	Cases.....	83
4.2.1	Raspberry PI.....	83
4.2.2	Arduino.....	86
4.2.3	Google Glass	89
4.2.4	Project Ara.....	92
4.2.5	SmartThings	95
4.2.6	LEGO Mindstorms	98
4.2.7	INCA	101
4.2.8	Prosyst E-Health.....	103
4.2.9	Infotainment System.....	105
4.2.10	John Deere	108
4.2.11	Kuka Youbot	110
4.2.12	Qivicon	112

4.2.13	RACE	114
4.2.14	Commercial Vehicle Platform	117
4.2.15	OpenXC	119
4.2.16	AutoPNP	122
4.3	Cross-case analysis	123
4.3.1	Openness of embedded systems	124
4.3.2	Modularizing for openness	128
4.4	Discussion of key findings	132
4.5	Conclusion and future perspectives	133
5	Study 4 - Open innovation without opening ES	134
5.1	Research design	135
5.1.1	Data Collection	135
5.1.2	Analysis	137
5.2	Open innovation by the creation of new interfaces	137
5.3	Open innovation by hacking	139
5.4	Discussion	141
5.5	Conclusion	143
Part IV	Discussion	145
1	Reflection on the studies' results	146
2	Cross-Study discussion	149
2.1	Comparison of the two forms of OI in ES	150
2.2	Implications of study 2 and 3 on the results of study 1	151
2.3	Implications of the third studies' cases on the second study	154
Part V	Summary and Contribution	159
1	Summary	160
2	Contribution of this thesis	161
2.1	Managerial implications	163
2.1.1	Implications for decision makers	163
2.1.2	Implications for system architects	165
2.2	Research implications	166
References		169
Annexes		179
Annex A	Complete list of internet sources used in study 3	180
Annex B	Communication of the research	181
