Key Note

K.-H. Laermann (Wuppertal, Germany), <i>Invited Paper</i> Safety Valuation of Large Structures - Reality and Perspectives	15
---	----

Session 1: Shape, Co-ordinate and Microstructure Measurement

M. Bail, B. Gebhardt, G. Häusler, J. Herrmann, V. Höfer, M. Lindner, P. Pavlicek, R. Ringler (Erlangen, Germany) Optical Range-Sensing with Spatially Modulated Coherence	27
L. Nyarsik, K. Körner, H. Fritz (Berlin, Germany) Flatness Measurement of Large Plane Objects	34
Y. Arai, S. Yokozeki, K. Shiraki, T. Yamada (Osaka & Fukuoka, Japan) High Precision Two-Dimensional Spatial Fringe Analysis Method	40
W. Schreiber, G. Notni, P. Kühmstedt, J. Gerber, R. Kowarschik (Jena, Germany) Optical 3D Measurements of Objects with Technical Surfaces	46
V. Sainov, G. Stoilov, D. Tontchev, T. Dragostinov (Sofia, Bulgaria) Shape and Normal Displacement Measurement of Real Objects in a Wide Dynamic Range	52
H. J. Kreuzer, R. A. Pawlitzek (Halifax, Canada) Fast Implementation of In-Line Holography for High Resolution Shape Measurement	61
M. Takeda, K. Taniguchi, T. Hirayama, H. Kohgo (Tokyo, Japan), <i>Invited Paper</i> Single-Transform Fourier/Hartley Fringe Analysis for Holographic Interferometry ..	67
K.-E. Elßner, T. Blümel, R. Burow, R. Kafka, G. Schulz, A. Vogel (Berlin, Germany) New Developments in Absolute Interferometric Testing of Non-Rotationally Symmetric Aspherics for Calibration Purposes	74
S. Brinkmann, T. Dresel, R. Schreiner, J. Schwider (Erlangen, Germany) Axicon-Type Test Interferometer for Cylindrical Surfaces	82
H. Schreiber, L. Zhou, J. Schwider (Erlangen, Germany) Interferometric Test of Microlenses	88
T. Yonte, J. A. Gomez-Pedrero, H. Canabal, E. Bernabeu (Madrid, Spain) Automatic Measurements of Paraxial Focal Distances in Ophthalmic Lenses by Moiré Deflectometry	94
N. Bokor, Z. Papp (Budapest, Hungary) Optimization of Kinoform Lenses	100

O. V. Angelsky (Chernivtsy, Ukraine)	
Interference Measurement of Rough Surfaces	106
P. P. Maksimyak, O. V. Angelsky (Chernivtsy, Ukraine)	
Interference Device for Noncontact Diagnostics of Arbitrarily Shaped Rough Surfaces	109
A. G. Ushenko, S. B. Yermolenko (Chernivtsy, Ukraine)	
Polarization Superresolution in Surface Microscopy	112

Session 2: Displacement Measurement

G. M. Brown, Y. K. Zhang, T. E. Allen, F. Chen, J. W. Forbes, Z. H. Jia, M.-R. Lee, C. T. Griffen (Dearborn, USA), <i>Invited Paper</i>	
Hybrid Panel Acoustic Contribution Analysis for Minimizing Vehicle Noise and Weight	121
A. Ettemeyer (Neu-Ulm, Germany)	
Non Contact and Whole Field Strain Analysis with a Laseroptical Strain Sensor	129
A. Olszak, K. Patorski, L. Salbut (Warsaw, Poland)	
Comparative Studies of ESPI and Grating Interferometry Methods used for the Determination of In-Plane Displacements in Presence of Out-Of-Plane Displacement Gradients	134
F. Gyimesi, Z. Füzessy, B. Raczkevi, J. Makai, J. Kornis, I. Lazlo (Budapest, Hungary)	
Comparative Interferometric Measurements by Holographic Illumination	140
I. Lazlo, Z. Füzessy, J. Kornis, F. Gyimesi (Budapest, Hungary)	
Comparative Digital Speckle Pattern Interferometry	146
M. Kujawinska (Warsaw, Poland), <i>Invited Paper</i>	
Experimental-Numerical Analysis of 3D Residual Stresses in Engineering Objects.....	151
V. S. Pisarev, V. D. Grigoriev, A. S. Dzuba (Moscow, Russia)	
Numerical Simulation of a Transition from Holographically measured Displacement Near Drilled Hole to Residual Strains and Stresses	159
S. Nakahara, H. Sakiyama, S. Hisada, T. Fujita (Osaka, Japan)	
Deformation Measurement of Several Materials in Cooling Down Process from Room Temperature to 77K Using Electronic Speckle Pattern Interferometry	170
A.S. Dzuba, V. D. Grigoriev, V. S. Pisarev (Moscow, Russia)	
The Use of Holographic Interferometry Data for the Refinement of Local Elasto-Plastic Strain Calculations by FEM	176
A. Y. Schikanov, V. P. Shchepinov (Moscow, Russia)	
Some Practical Aspects of Residual Stresses Determination in Structures Through the Use of Holographic Interferometry Data	184
V. P. Shchepinov, A. Y. Schikanov (Moscow, Russia)	
Analysis of Holographic Interference Fringe Patterns Related to Residual Stress Redistribution Near Drilled Hole	188

W. Jüptner (Bremen, Germany), <i>Invited Paper</i> Holographic and Speckle Metrologies: From Concepts to Applications	192
G. Wernicke, O. Kruschke, T. Huth, N. Demoli (Berlin, Germany) Holographic Interferometric Microscopy with Conjugate Reconstruction Applied for the Measurement of Deformations	203
U. Mieth, W. Osten, W. Jüptner (Bremen, Germany) Numerical Investigations on the Appearance of Material Flaws in Holographic Interference Patterns	209
A. V. Anpilov, V. V. Balalov, E. M. Morozov, V. P. Shchepinov (Moscow, Russia) Weight Functions Determination for the Cracks in Curved Shells from Holographic Interferometry Data	217
D. Holstein, Th. Bischof, W. Jüptner (Bremen, Germany) Detection of Defects by Holographic Interferometry and FEM during the Transient Heat Up Phase	225
J. Kornis, N. Bokor (Budapest, Hungary) Simulations in Speckle Metrology	233
G. Stoilov, T. Dragostinov, D. Tontchev, V. Sainov (Sofia, Bulgaria) A Phase-Shifting Device for Interferometric Measurements by the Phase-Stepping Method	238

Session 3: Vibration Measurement

H. Steinbichler, H. Klingele (Neubeuern, Germany), <i>Invited Paper</i> Holography as a Quantitative Modal Testing Technique	245
V. B. Markov, A. I. Khizhnyak, P. M. Boone, P. Vanspeybroeck (Kiev, Ukraine & Gent, Belgium) Theoretical and practical Study of Polymer Pipe Vibration	251
R. Höfling, P. Aswendt, V. Liebig, S. Brückner (Chemnitz & Dresden, Germany) Synthesis of Experiment and Simulation in Speckle Interferometry: A Medical Application	261
P. Jani, A. Czitrovsky (Budapest, Hungary) Sound Frequency Band Vibrations on Submicron Amplitude Scale in Rigid Mechanical Structures	269

Session 4: Measurement of Other Quantities

T. Neger, H. Philipp, H. Jäger (Graz, Austria), <i>Invited Paper</i> Optical Tomography of Strongly Refracting Phase Objects by Holographic Interferometry	277
J. Becker, L. Gatti, F. Solitro (Noordwijk, Netherland & Torino, Italy) Mathematical Modellization of Experimental Objects and Simulation of their Thomographic Reconstruction in „Optical Tomography Preparatory Study“	285

K. Gerstner, A. Fehl, J. Otten, D. Neidhardt, T. Tschudi (Berlin, Germany) Time- and Space-Resolved Temperature Measurements in Turbulent Combustion Based on Laser Deflection and Algebraic Reconstruction for Tomography	291
R. N. Davies, P. J. Bryanston-Cross (Coventry, UK) Application of Automatic Phase Stepping to the Measurement of Heat Transfer	295
W. Fließner, M. Hipp, T. Neger, H. Jäger (Graz, Austria) Flow Visualization and Plasma Diagnostics by Digital-Speckle-Pattern-Interferometry	300
O. V. Angelsky, P. P. Maksimyak (Chernivtsy, Ukraine) Interference Method for Measuring Particle Size and Concentration	306
R. Battiston, G. Ambrosi, W. Burger, J. Kornis, P. Levtchenko (Perugia, Italy & Budapest, Hungary) An Optical Alignment System for the High Precision Silicon Tracker of the Alpha Magnetic Spectrometer (AMS) on the International Space Station Alpha	312

Appendix

Steinbichler Optotechnik GmbH (Neubeuern, Germany) Non Destructive Inspection	321
Steinbichler Optotechnik GmbH (Neubeuern, Germany) Vibration Analysis	322
Ettemeyer GmbH (Neu-Ulm, Germany) Speckle Sensors for Industrial Applications	323
