

Table of Contents

Preface	10
----------------------	----

Chapter 1:	
Natural Coral Reefs	13
Types and geographical distribution of coral reefs	15
Ecology of coral reefs	19
Primary production in coral reefs	25
Primary producers in coral reefs	25
Consumers in coral reefs	30
Zones of coral reefs	31
Microorganisms of coral reefs	48

Chapter 2:	
Zoogeography	57
The four zoogeographical main regions	59
① Indo-Pacific	59
② Eastern Pacific	88
③ The Caribbean	90
④ West Africa	98

Chapter 3:	
A Coral Reef in the Aquarium	103

Chapter 4:	
Setting up and Decorating the Modern Coral Reef Aquarium	111
Decoration materials	112

Chapter 5:	
Modern Coral Reef Aquaria	127
Fish aquarium	129
Community aquarium	132
Sand zone aquarium	138
Reef gorge aquarium	145
Cave aquarium	149
Reef profile aquarium	156

Chapter 6:	
The Break in Period	161
The break in period of a Modern Coral Reef Aquarium	162
Acclimatisation of fishes and invertebrates	165
Animals impaired by cyanide	166

Chapter 7:	
Live Rock in the Modern Coral Reef Aquarium	169
How to treat live rock	170
Organisms living on live rock	173

Chapter 8:	
Light in the Modern Coral Reef Aquarium	195
UV radiation and the effect on living corals	196
Light and photosynthesis	198
Light intensity	198
The underwater light-field	199
Moonlight	201
The importance of light for the Modern Coral Reef Aquarium	202
Sources of light for the Modern Coral Reef Aquarium	204

Chapter 9:	
Temperature Control in the Modern Coral Reef Aquarium	213
Coral bleaching	214
Heating the Modern Coral Reef Aquarium	214
Cooling the Modern Coral Reef Aquarium	215

Chapter 10:	
Water for the Modern Coral Reef Aquarium	217
Salinity of the sea water	218
Osmoregulation	219
Artificial or natural sea water?	220
Chemical reactions and parameters of the sea water	222

Chapter 11:	
Biochemical Processes in the Modern Coral Reef Aquarium	241
Bacteria and their environment	242
The decomposition of nitrogenous compounds	243
Phosphorus cycle	247
Reduction and oxidation	247

Chapter 12:	
Filtration, Water Maintenance, and Hydrotechnology for the	
Modern Coral Reef Aquarium	251
Biological filtration	251
Subgravel filters	256
Mechanical filters	257
Activated carbon filters	257
Protein skimming	258
Reverse osmosis	262
Ozonisation	263
UV sterilizers	264
Water changes	264
Hydrodynamics abd hydrotechnology	264
Combination of filters	266

Chapter 13:	
Algae	271
Structure and reproduction	273
Taxonomy and nomenclature	274
Division Heterokontophyta – Class Bacillariophyceae: Diatoms	275
Division Cyanophyta: Blue-green algae	276
Division Chlorophyta: Green Algae	282
Division Heterokontophyta – Class Phaeophyceae: Brown algae	302
Division Rhodophyta: Red algae	307
Division Dinophyta: Dinoflagellates	319
Résumé	324

Chapter 14:	
Marine Aquaristics and Nature Conservation	327
Catching coral fish with cyanide	328
Catching coral fish with dynamite	331
Over-exploitation of coral reefs	332
Dangers to coral reefs	336
Death rate of animals in the aquarium trade	339
Coral reef aquaristics – more than just a hobby	342

List of References	347
