1	Bounded Rationality in Multiagent Systems Using Decentralized Metareasoning	1
	<i>Alan Carlin, Shlomo Zilberstein</i>	
1.1	Introduction	1
1.2	Decentralized Monitoring	3
1.3	Complexity of Decentralized Monitoring Problem	5
1.3.1	Transition-Independent Decentralized MDP	6
1.4	Local Monitoring	7
1.4.1	Complexity of Local Monitoring	7
1.4.2	Solution Methods with Local Monitoring	10
1.5	Global Monitoring	14
1.6	Experiments	16
1.7	Other Related Work	25
1.8	Summary and Discussion	25
	References	26
2	On Support of Imperfect Bayesian Participants	29
	<i>Miroslav Kárný, Tatiana V. Guy</i>	
2.1	Introduction	29
2.2	Dynamic Decision Making under Uncertainty	31
2.3	Bayesian DM	33
2.4	Fully Probabilistic Design	33
2.4.1	DM Elements in FPD	34
2.4.2	Solution of FPD	37
2.5	DM Tasks Supporting Imperfect Bayesian Participants	39
2.5.1	Approximation of Known Rnd	40
2.5.2	Approximation of Unknown Rnd	42
2.5.3	Description of Unknown Rnd	45
2.6	Use of Supporting DM Tasks	47
2.6.1	Mapping Knowledge and Preferences on Rnds	48
2.6.2	Extension of Incomplete Rnds	49

2.6.3	Combination of Rnds	50
2.7	Concluding Remarks and Open Questions	54
	References	55
3	Trading Value and Information in MDPs	57
	<i>Jonathan Rubin, Ohad Shamir, Naftali Tishby</i>	
3.1	Introduction	57
3.2	Preliminaries	58
3.2.1	Markov Decision Processes	58
3.2.2	Control Information	60
3.3	Trading Value and Information	61
3.3.1	Free-Energy Formulation	61
3.3.2	Deterministic Environments	65
3.3.3	Grid World Example	65
3.4	Robustness	66
3.4.1	PAC-Bayesian Analysis	66
3.4.2	'Mine Field' Example	68
3.5	Discussion	69
	References	74
4	Game Theoretic Modeling of Pilot Behavior during Mid-Air Encounters	75
	<i>Ritchie Lee, David Wolpert</i>	
4.1	Introduction	75
4.2	Semi Network-Form Games	76
4.2.1	Notation	77
4.2.2	Definition	77
4.2.3	A Simple Semi Network-Form Game Example	78
4.2.4	Level-K Thinking	79
4.2.5	Satisficing	80
4.2.6	Level-K Relaxed Strategies	81
4.2.7	Level-K d-Relaxed Strategies	84
4.3	Using Semi Net-Form Games to Model Mid-Air Encounters	88
4.3.1	Directed Acyclic Graph G	89
4.3.2	Variable Spaces X	90
4.3.3	Utility Function u	92
4.3.4	Partition R	93
4.3.5	Set of Conditional Probabilities π	94
4.3.6	Computing Level-K d-Relaxed Strategies	95
4.3.7	Encounter Simulation	97
4.3.8	Social Welfare F	103
4.3.9	Example Encounter	103
4.3.10	Sensitivity Analysis	104
4.3.11	Potential Benefits of a Horizontal Resolution Advisory (RA) System	107
4.4	Advantages of Semi Net-Form Game Modeling	108

4.5	Conclusions and Future Work	109
	References	110
5	Scalable Negotiation Protocol Based on Issue-Grouping for Highly Nonlinear Situation	113
	<i>Katsuhide Fujita, Takayuki Ito, Mark Klein</i>	
5.1	Introduction	113
5.2	Negotiation with Nonlinear Utility Functions	115
5.2.1	Preliminaries	115
5.2.2	Interdependency among Issues	117
5.3	Negotiation Protocol Based on Issue Interdependency	118
5.3.1	Efficient Negotiation Protocol Based on Issue-Groups ...	118
5.3.2	Incentives for Truthful Voting	122
5.4	Experimental Results	122
5.4.1	Setting	122
5.4.2	Experimental Results	124
5.5	Related Work	129
5.6	Conclusion	131
	References	131
6	The Social Ultimatum Game	135
	<i>Yu-Han Chang, Tomer Levinboim, Rajiv Maheswaran</i>	
6.1	Introduction	135
6.2	Related Work	137
6.3	Social Ultimatum Game	138
6.3.1	Equilibrium Analysis	139
6.4	Adaptive Agents Model	142
6.4.1	Axioms of Play	142
6.4.2	Characterizing the Players	143
6.4.3	Adaptation Rules	144
6.5	Simulation Experiments	146
6.5.1	Stability of Fair Players	146
6.5.2	The Effect of a Rogue Agent	147
6.5.3	Reciprocity vs. Randomness	149
6.5.4	Discussion	149
6.6	Human Experiments	151
6.6.1	Methodology	151
6.6.2	Discussion	152
6.7	Conclusion	156
