**List of Figures. . . . . XIX**

**Abbreviations . . . . . XXIII**

**Summary . . . . . XXV**

**Zusammenfassung . . . . . XXIX**

**1. Introduction. . . . . 1**

    1.1. Scarcity of resources, waste generation and management . . . . . 2

    1.2. Renewable energy and (municipal) biowaste in a circular economy. . . . . 7

    1.3. The organic fraction of municipal solid waste (OFMSW) from separate collection. . . . . 10

        1.3.1. Status quo and potentials . . . . . 12

        1.3.2. Material properties and recycling processes . . . . . 13

        1.3.3. Biological waste treatment in Germany- anaerobic digestion and composting. . . . . 18

        1.3.4. Conventional value chain and starting points for improvement . . . . . 23

    1.4. Problem statement, objectives and structure of this thesis . . . . . 26

    1.5. References . . . . . 31

**2. Publications (thesis) and data availability . . . . . 37**

**3. PART I: Characterization of the separately collected OFMSW from rural and urban districts for a one-year period in Germany . . . . . 41**

    3.1. Abstract and highlights . . . . . 42

    3.2. Keywords and abbreviations . . . . . 44

|                                                                                                                                      |           |
