Vorwort i

Kurzfassung ix

Abstract xi

1 Introduction 1

1.1 Motivation 4

1.2 Outline and Contributions 7

1.3 Related Work 9

1.3.1 Initial Investigations 9

1.3.2 PSSS for Factory Automation 10

1.3.3 PSSS for THz Communications 11

2 The Parallel Sequence Spread Spectrum Concept 15

2.1 Introduction to Spread Spectrum Systems 15

2.1.1 Direct Sequence Spread Spectrum 16

2.2 The Parallel Sequence Spread Spectrum Physical Layer 18

2.2.1 PSSS Encoding 18

2.2.2 PSSS PHY Parameters 22

2.2.3 PSSS as a Multiple Access Scheme 24

2.2.4 PSSS Decoding and M-Sequence Non-Orthogonality 26

2.2.5 BER Performance in AWGN 29

3 Orthogonalization of PSSS 33

3.1 Iterative Symbol Detection 34

3.2 Orthogonal Parallel Sequence Spread Spectrum 38

3.2.1 Derivation via M-Sequence Run Length Property 38

3.2.2	Matched Filters Design Approach using Linear Algebra	40
3.3	AWGN Simulations	43
3.3.1	BER Performance Improvements	43
3.3.2	Spectral Benefits	46
3.4	Conclusion	46
4	Analysis of the PSSS Signal	47
4.1	System Model	48
4.2	Signal Characteristics	50
4.2.1	Amplitude Distribution	50
4.2.2	Peak-To-Average Power Ratio	51
4.3	Influence of the Power Amplifier and Clipping	56
4.3.1	Hard Clipping	56
4.3.2	Soft Clipping using the Rapp Model	58
4.3.2.1	Spectral Characteristics and Shoulder Level	60
4.3.2.2	BER Performance	61
4.4	Conclusion	63
5	Synchronization Concepts for PSSS Systems	65
5.1	PSSS-Based Preamble Design	66
5.1.1	Constraints on the Training Symbol Length	68
5.2	Carrier Frequency and Phase Synchronization	70
5.2.1	Expected Carrier Frequency Offset	71
5.2.2	Correlation-Based Carrier Frequency Estimation	72
5.2.2.1	Basic Principle	73
5.2.2.2	Accuracy Evaluation	76
5.2.2.3	Two-Stage Approach	78
5.2.3	PLL-Based Synchronization	79
5.2.4	Pilot Code-Based Carrier Synchronization	85
5.2.4.1	Pilot Code Insertion	85
5.2.4.2	Continuous Phase Correction	85
5.2.4.3	Accuracy Improvement by Averaging	86
5.2.4.4	Accuracy Loss due to a Chip Timing Offset	88

5.3	Symbol Timing Synchronization	89
5.3.1	Pilot Code-Based Chip Synchronization	90
5.3.1.1	Influence of Noise	92
5.3.1.2	Accuracy Improvement by Averaging	94
5.4	Conclusion	95
6	PSSS in Industrial Environments	97
6.1	The Wireless Multipath Channel Impulse Response	98
6.1.1	Time Dispersion Parameters and Coherence Bandwidth	99
6.1.2	Doppler Spread and Coherence Time	100
6.2	Overview of Industrial Wireless Channel Models	102
6.2.1	TU Dortmund Measurement Campaign	103
6.2.2	IEEE 802.15.4a CM7 & CM8	104
6.2.3	IEEE 802.11 Channel Model E	105
6.2.4	QuaDriGa Channel Model	107
6.2.5	TU Dresden Channel Model	108
6.3	Comparison of Industrial Channel Models	109
6.3.1	Time Dispersion in Industrial Wireless Channels	109
6.3.2	Coherence Time in Industrial Applications	113
6.4	Industrial Channels for Baseband Simulations	114
6.5	PSSS Equalizer Design for Industrial Wireless Channels	119
6.5.1	PSSS in Multipath Channels	120
6.5.1.1	Channel Estimation	120
6.5.1.2	Equalizer Concepts for PSSS	123
6.5.1.3	PSSS Prefix Options	125
6.5.1.4	PSSS without a Prefix	127
6.5.1.5	PSSS with a Cyclic Prefix	129
6.5.1.6	PSSS with Zero Padding	130
6.5.2	Simulation Results	132
6.6	Conclusion	136
7	Performance Comparison of PSSS and OFDM	137
7.1	Performance Comparison of Uncoded CP-PSSS and OFDM	138

7.2	Performance Measurements using System Emulator Hardware .	142
7.2.1	Measurement Setup and System Parameters	143
7.2.2	Error Patterns of PSSS and OFDM	143
7.2.3	Measured Bit Error Performance of PSSS and OFDM .	146
7.3	BER Performance of Coded OPSSS and OFDM	148
7.4	Conclusion	152
8	Conclusion	155
8.1	Summary	155
8.2	Outlook and Discussion	158
	Appendix A	160
	A Industrial Applications and Requirements	161
	B Synchronization	165
B.1	Analytical Description of the Frequency Estimation	165
B.2	Decision Directed Phase Error Detectors	166
B.3	PSSS Spectral Characteristics using Pilot Codes	168
	C Industrial Wireless Channels	171
	D Additional Performance Evaluation	175
D.1	BER Performance of OFDM for Different Interleaver Distances	175
	List of Abbreviations	179
	List of Symbols	185
	List of Figures	195
	List of Tables	199
	Bibliography	201
	Publications by the Author	225
