Contents

1 **Introduction** 1
References 2

2 **Engineering Theories of Thin-Walled Beams of Open Section** 3
2.1 Review of Dynamic Engineering Theories of Thin-Walled Beams of Open Section 3
2.2 Procedure for Defining the Correctness of Engineering Approaches 5
2.2.1 Velocities of Transient Waves in Thin-Walled Beams of Open Section due to the Korbut–Lazarev Theory and Its Generalizations 8
2.2.2 Velocities of Transient Waves in Thin-Walled Beams of Open Section due to the Vlasov Theory and Its Modifications 12
References 16

3 **Transient Dynamics of Pre-Stressed Spatially Curved Thin-Walled Beams of Open Profile** 19
3.1 Theory of Thin-Walled Beams Based on 3D Equations of the Theory of Elasticity 19
3.1.1 Problem Formulation and Governing Equations 19
3.1.2 Dynamic Response of Axially Pre-Stressed Spatially Curved Thin-Walled Beams of Open Profile 23
3.1.3 Particular Case of a Straight Thin-Walled Beam of Open Section 42
3.2 Construction of the Desired Wave Fields in Terms of the Ray Series 46
3.3 Conclusion 47
References 53

4 Impact Response of Thin-Walled Beams of Open Profile 55
4.1 Introduction 55
4.2 Impact of a Hemispherical-Nosed Rod Against a Thin-Walled Beam of Open Profile 57
4.2.1 The Wave Theory of Impact with Due Account for One-Term Ray Expansions. 57
4.2.2 Wave Theory of Impact with Due Account for Multiple-Term Ray Expansions. 62
4.2.3 Numerical Example. 69
References 76

5 Conclusion. 77

6 Peculiarities of Transient Wave Propagation in Thin-Walled Beams of Open Section 81
6.1 Conditions of Compatibility 81
6.2 Conditions of Compatibility for Engineering Theories 82
6.3 The Main Kinematic and Dynamic Characteristics of the Wave Surface. 83
