

Contents

I. Biology of Wound Healing 1

The Cellular Biology of Wound Healing M. C. REGAN and A. BARBUL	3
--	---

Does Fibrin Play an Important Role in Wound Healing? B. ZEDERFELDT	18
---	----

II. Biology Regarding Fibrin Sealant 23

Hemostasis – An Important Aspect of the Efficacy of Fibrin Sealant: Experimental Models Designed to Demonstrate the Hemostatic Effect of Fibrin Sealant G. SCHLAG, M. THURNHER, and H. REDL	25
--	----

An Evaluation of the Use of Aprotinin (Antifibrinolytic Drug) for Fibrin Sealing in General and Thoracic Surgery H. W. WACLAWICZEK	37
--	----

Comparative Studies on the Physicochemical Properties of Tisseel and a Newly Developed Fibrin Sealant K. SAWADA, H. YOSHIMURA, H. YAMAMOTO, H. YAGO, S. TAKEUCHI, K. MATSUMOTO, K. GO, and S. SUEHIRO	45
--	----

Fibrin Glue in Skin Healing: An In Vitro Study M.-F. HARMAND, D. MICHEL, M. BAGOT d'ARC, and P. GONFRIER	52
---	----

Wound Healing and Fibrin Glue: An Experimental Comparative Study R. GIARDINO, M. FINI, G. GIAVARESI, G. BIAGINI and M. MATTIOLI BELMONTE	60
---	----

In Vivo Studies of Fibrin Sealant Ultrastructure A. GRABOSCH, G. BOGUSCH, K. PLOGMEIER, and R. ÖLLINGER	67
--	----

VIII Contents

Immunohistochemical Distribution of Collagen Types IV, V, and VII During Wound Healing of Rat Skin After the Application of Tissucol G. E. ROMANOS, S. T. K. HOTZ, and J. R. STRUB	75
Influence of Fibrin Sealant and Fibrin Sealant-Antibiotic Combination on the Healing of Colonic Anastomosis in the Rat A. C. VAN DER HAM, W. J. KORT, I. M. WEIJMA, H. F. G. M. VAN DEN INGH and I. JEEKEL	86
Fibrin Sealant in Bone Regeneration N. SCHWARZ	99
Histological Investigation of Bone Healing in the Rat Calvaria After the Use of Fibrin Glue M. BIELI	110
III. Biomaterials and Other Substances in Connection with Fibrin Sealant	119
Calcium Phosphate Ceramics (Triosite) in Otology: Evaluation in Animals and Application in Humans G. DACULSI, M. BAGOT d'ARC, and M. COTTREL	121
The Osteoinductive Potential of Bone Morphogenetic Gelatin Complexed with Hydroxyapatite and Fibrin Glue G. HOTZ	127
Hyaluronic Acid Modifies and Reduces the Inflammatory Response Seen After Trauma and Treatment with Fibrin Glue J. WADSTROM	136
Fibrin Glue as a Vehicle for the Application of Hyaluronic Acid J. WADSTRÖM	144
Subject Index	147
