Chapter 1: How to Use This Atlas	1	Alternate Technique	28
Chapter 2: Implant Types and Their Uses	3	Notes	29
I. Endosteal	3	Interpretation	29
A. Root Forms	3	Caveat	32
B. Blades	3	II. Surgical Anatomy	35
C. Ramus Blade and Ramus Frame	3	III. Staging	42
D. Transosteal	3	Chapter 5: Prosthetic Options That Influence the	
E. Crête Mince (CM) Threaded Dowel	5	Selection of an Implant	43
II. Subperiosteal	5	I. Superstructures	43
A. Complete, Universal, and Unilateral	5	A. Overdentures	43
Caveat	6	B. Fixed Bridges	44
III. Endodontic Stabilizer	6	C. Fixed-Detachable Bridges	46
IV. Intramucosal Inserts	7	D. Single Crowns	47
V. Bone Replacement Materials	7	II. Mesostructure Bars	48
Chapter 3: Evaluation and Selection of the Implant		A. Continuous Bars	48
Patient: Indications and Contraindications of		B. Noncontinuous Bars	49
Treatment by A. Sirakian, D.M.D., and		C. Methods of Bar Fixation	49
M. Cahn-Geller, P.A.-C	8	D. Types of Superstructure Attachments	50
I. Laboratory Tests – In Office	8	III. Transepithelial Abutments (TEAs)	51
Hematocrit Examination	8	Chapter 6: Preparations for Surgery	53
Blood Sugar Examination	8	I. Armamentarium and the Operatory	53
II. Relative Systemic Contraindications	9	Armamentarium	53
Endocrinopathies	9	The Operatory	53
Granulomatous Diseases	11	Surgical Delivery Systems <i>by Ted Waller</i>	54
Cardiovascular Diseases	11	Electrical Delivery Systems	54
Peripheral Vascular Diseases	12	Air or Nitrogen Systems	58
Endocarditis/Valvular Disease (Requires		Important Aspects of Selecting a Delivery System	58
antibiotic prophylaxis, see Chapter 6)	12	II. Surgical Principles of Value to the Implantologist	59
Hypersensitivity Reactions	13	Preoperative Regimen	59
Dermatomucosities	13	Methods of Anesthesia	59
Metabolic/Other Diseases of Bone	13	Incisions	60
Blood Dyscrasias and Hematologic Disorders	14	Flap Design, Retraction, and Soft Tissue	
Collagen (Connective Tissue) Diseases	16	Management	61
Immunodeficiency Diseases and Allergic		Soft Tissue Grafting and Vestibuloplasty	63
Disorders	17	Bone Management	69
Local and Regional Problems	17	Neurosurgery and Nerve Repositioning	70
Chapter 4: How to Choose the Proper Implant	18	Sutures and Suturing	70
I. Diagnostic Methods	18	Ligating a Splint, Stent, or Prosthesis:	
Examinations	18	Circumosseous Ligation	76
Study Costs	19	Harvesting Autogenous Bone	78
Radiology	20	III. Preprosthetic Surgery	79
CT Scanning	21	Tori Removal	79
Methods of Fabrication	22	Tuberosity Reduction	81
Edentulous Arch	22	Alveoloplasty	82
Partially Edentulous Arch	25	Correction of High or Hypertrophic Muscle	
Purposes of the Appliance	27	Attachments	82
		Epulides Fissurata and Other Hyperplasias	84

Chapter 7: Root Form Implant Surgery: Generic	87
Armamentarium	87
Caveats	87
I. Introduction	88
II. Surgical Templates	88
A. Single-Tooth Replacement or Edentulous Spans Between Natural Teeth	88
B. Free-end Saddle Edentulous Areas	88
C. Completely Edentulous Sites	89
III. Surgical Technique	89
A. Threaded Pre-tap	92
B. Threaded Self-tap	94
C. Nonthreaded Press-Fits	94
IV. Immediate Placement of Root Form Implants into Extraction Sites	96
A. Surgical Technique	96
V. Uncovering Submergible Implants	98
Chapter 8: Root Form Implant Surgery I: Proprietary	101
Caveat	101
I. Anchor	101
II. Nobelpharma Branemark/3i, Implamed	101
III. Calcitek Dentsply/Integral, Integral S.D., Omniloc	103
IV. Core-Vent Systems	104
A. Biovent	104
B. Core-Vent with a Bone Core	104
C. Core-Vent without Bone Core	105
D. Microvent	105
E. Screw-Vent/Swede-Vent	106
V. Denar Steri-Oss	107
Denar Cylindrical Press-Fit Implants	108
VI. Flexiroot	108
VII. Hall	108
VIII. Interpore IMZ	108
IX. LaminOss	109
X. Miter System 2000 Titanodont	109
XI. Orthomatrix Sustain	109
XII. Park Dental Startanius, Starvent	110
XIII. Ross-TR	110
XIV. Stryker	110
XV. Ventplant	111
Chapter 9: Root Form Implant Surgery II: Proprietary	112
I. Kyocera Bioceram	112
II. Fibermesh (Fibermetal)	112
III. Omni-R	113
IV. Oratronics Spiral	113
V. Swiss ITI/Straumann	113
A. Hollow Cylinder; Hollow Screw	113
B. ITI Screw Implant	114
C. ITI Hollow Cylinder Multiple Basket Implants	114
D. TPS Screw	115
VI. Tübingen	115
Chapter 10: Blade and Plate-Form Implant Surgery	116
Armamentarium	116
Caveats	116
I. Surgical Techniques	117
A. Conventional Blade Implants—One Stage Incision and Reflection	117
Osteotomy	118
Implant Placement	118
Closure	120
B. Alterable Blade Implants	121
C. Submergible Blade and Plate-Form Implants	121
D. Coated Blade and Plate-Form Implants	122
E. Custom-Cast Implants	122
F. Maxillary Posterior Blade and Plate-Form Implants	125
G. Anterior Blade and Plate-Form Implants	125
H. Immediate Placement of Blade Implants into Extraction Sites	126
Chapter 11: Ramus Frame and Ramus Blade Implant Surgery	128
Armamentarium	128
Caveats	128
I. RA-2 Ramus Frame (Pacific Implant Company)	128
Surgery	128
II. RA-1 Ramus Frame (Pacific Implant Company)	132
Surgery	132
III. Ramus Blade	133
Surgery	133
Chapter 12: Mandibular Subperiosteal Implant Surgery	135
Armamentarium	135
I. Edentulous	135
Caveats	135
Procedure	135
Incision	136
Reflection	136
Impression Making	136
Surgical Jaw Relationship: Centric Recording	138
Closure	138
Implant Design	138
Implant Insertion	139
II. Edentulous Tripodal Design: Brookdale Bar	141
Caveats	141
Procedure	141
Incisions	141
Reflection	141
Impression	141
Design of casting	142
Insertion	142
III. Partially Edentulous	143
IV. CAD-CAM Technique (Computer Assisted Design – Computer Assisted Manufacture)	144
Armamentarium	144
Caveats	144
Introduction	144
Preparing for the Scan	144
Role of the Radiologist	145
Fabrication of the Cast	145
Implant Fabrication	145
Surgery for Insertion of the Implant	146
V. Mandibular Inferior Border Augmentation	150
Procedure	150
Second-Stage Procedure	152

Chapter 13: Maxillary Pterygomaxillary Subperiosteal

Implant Surgery	154
Armamentarium	154
Caveats	154
I. Edentulous	154
Procedure	154
Incision	155
Reflection	155
Impression-Making	156
Surgical Jaw Relationship; Centric Recording	157
Closure	157
Implant Design	157
Implant Insertion	158
II. Partially Edentulous – Universal Design	161

Chapter 14: Intramucosal Insert Surgery and Prosthodontics

Armamentarium	164
Caveats	164
I. Complete Dentures – Edentulous Maxillae	164
II. Intramucosal Insert-Supported Unilateral Partial Dentures	171
III. Relining Full Upper Dentures That Have Lost Retention After Having Had Intramucosal Inserts	171

Chapter 15: Endodontic Stabilizer Implant Surgery

Armamentarium	172
Caveats	172
I. Matte-Finished Tapered Implants (Howmedica, Park)	173
II. Stabilizers for Nonconforming Teeth	175
III. Threaded Implants	175
IV. Ceramic-Coated Implants	176

Chapter 16: Transosteal Implant Surgery, Including the Mandibular Staple Bone Plate

Armamentarium	178
Caveats	178
I. Single Unit Transosteal Implant	178
II. Mandibular Staple Bone Plate	182
Armamentarium	182
Caveats	182
III. Partially Edentulous – Unilateral Maxillary Pterygomaxillary Implants	182

Chapter 17: Crête Mince Implant Surgery and Prosthodontics

Armamentarium	187
Caveats	187
Introduction	187
Surgical and Prosthodontic Techniques	187

Chapter 18: Bone Grafting and Hard Tissue Replacement

Armamentarium	192
Caveats	192
Introduction	192
I. Periodontal Defect Correction	194

II. The Use of Guided Tissue Regeneration

Membranes: Gore-Tex and Others	196
III. Ridge Maintenance	200
Caveats	200
Technique	200
IV. Ridge Augmentation	203
Technique	203
V. Maxillofacial Reconstruction	207
A. Particulate	207
B. Block Form	207
VI. Peri-implant Support and Repair	208
VII. Maxillary Sinus Floor Elevation Procedures	208

Chapter 19: Root Form Implant Prosthodontics:

Abutments	213
Introduction	213
I. Abutments	214
A. Threaded Abutments	214
1. Straight Abutments	214
2. Prefabricated Angled Abutments	214
3. Custom Abutments (Angled and Straight)	220
B. Frictional or Press-Fit Abutments	223
C. Nonthreaded, Cementable Abutments	224
II. Abutment Heads	224

Chapter 20: Root Form Implant Prosthodontics: Fixed and Fixed-Detachable

Prosthesis Support Requirements	227
I. Preparatory Phases	227
When to Restore Submersible (Two-Stage) Implants	227
When to Restore Single-Stage Implants	228
Transitional Prostheses	228
Temporary Removable Prostheses	228
Conversion Prostheses	228
Temporary Fixed Prostheses	229
II. Impression-Making	230
Fixed Cementable Prostheses	230
Single-Stage Implants	230
Two-Stage Implants	230
Fixed-Detachable Prostheses	234
Branemark Type Prosthesis	238
Intraocclusal Record-Making	238
III. Superstructure Fabrication	242
Materials: Casting	242
Materials: Veneering	242
Cantilevering	244
Fixed-Detachable Superstructures	244
“High Water” (Bar) Design	244
Fixed-Detachable Unit Type (Anatomic) Fixed Prostheses	245
Insertion of the Prosthesis	246
Covering Screw Holes in a Fixed-Detachable Bridge	246
Loose Screws	246
Cementation	247
IV. Subperiosteal Implants	247
V. Single-Tooth Implants	248
UCLA Abutment	248
DVA Abutment	249

Chapter 21: Root Form, Subperiosteal, Ramus Frame, and Transosteal Implant Prosthodontics:

Overdentures 251

- I. Full Subperiosteal Implants 252
- II. Universal Subperiosteal Implants 256
- III. Ramus Frame Implants 258
- IV. Transosteal Implants 258
- V. Root Form Implants 259
- VI. Blade Implants 266
- VII. Oral Hygiene and Maintenance 266

Chapter 22: Principles of Occlusion in Implantology

by Ival G. McDemott, D.D.S. 267

- I. How to Create a Balanced Occlusal Scheme 270
- II. Functional Adjustment for Balanced Occlusion 273

Chapter 23: Diagnosis and Treatment of Complications 275

- I. Intraoperative Complications 275
 - A. Endosteal 275
 - 1. Oversized Osteotomy 275
 - 2. Perforations of Cortical Plates: Root Forms, Plate Forms, and Blades 277
 - 3. Fractured Buccal or Lingual Cortical Plates 279
 - 4. Inadequate Soft Tissue Flaps for Implant Coverage 279
 - 5. Broken Burs 280
 - 6. Inoperative Instrumentation 280
 - 7. Hemorrhage 280
 - 8. Poor Angulation or Position of an Implant 281
 - B. Subperiosteal Implants 283
 - 1. Loss of Anesthesia 283
 - 2. Inability to Make an Accurate Impression 283
 - 3. Inability to Remove an Impression or to Seat a Tray—Either for Full Upper (Pterygohamular Design) or for Full Lower (Lateral Rami Design) Subperiosteal Implant 283
 - 4. Antral Perforations 283
 - 5. Poor Fit of Subperiosteal Implants 283
 - 6. Poor Fit of Tripodal Subperiosteal Implants 284
 - 7. Injury to the Infraorbital or Mental Nerves 284
- II. Short-Term Complications (First 6 Months) 286
 - A. Endosteal 286
 - 1. Postoperative Infection 286
 - 2. Paresthesia 286
 - 3. Wound Breakdown 288
 - 4. Dehiscent Implants 288
 - 5. Radiolucencies 288
 - 6. Loss of Healing Screw 288
 - 7. Antral Complications 290
 - 8. Mobile Implants 291
 - 9. Implants of Improper Angulation: The Double-Bar Technique 291
 - 10. Broken Prosthetic Inserts 293
 - 11. Breakage of Retention Screws in Fixed-Detachable Bridges 294
 - 12. Fabrication of Implant-Borne Temporary Prostheses 294
 - 13. Postsurgical Scar Contracture 295
 - B. Subperiosteal 296

- 1. Strut Exposure 296
- 2. Postoperative Infection 296
- III. Long-Term Complications 296
 - A. Endosteal 296
 - 1. Mobility of Implant-Class II or Greater 296
 - 2. Saucerization (Pericervical Radiolucency) 299
 - 3. Fractured Root Form Implants 301
 - 4. Stripped Internal Threads in Implants 301
 - 5. Fractured Blade Abutments 301
 - B. Subperiosteal 303
 - 1. Bone Resorption 303
 - 2. Strut Dehiscence 303
 - 3. Recurrent Pericervical Granulomas 303
 - 4. Broken Abutments 305
 - 5. Other More Significant Symptoms 305

Chapter 24: Maintenance and Recall for Patients with Implants 306

Appendix A: Past Medical and Dental History 309

Questions for Women 309

Appendix B: Laboratory Values 310

- I. Normal Complete Blood Count 310
- II. Normal Urine Values 310
- III. Chemistry Values (μgdl) 310
- IV. Prothrombin Time (PT) Range 310
- V. Partial Thromboplastin Time (PTT) Range 310

Appendix C: CAD-CAM Computed Tomography 311

Mandible modeling for subperiosteal implant 311

Scanner settings for maxillofacial and mandibular regions 312

Appendix D: Treatment of Metals 313

Armamentarium 313

Radiofrequency and Plasma Glow Discharge: Cleaning, Treating, and Sterilization 313

Appendix E: Implant Surgery Consent Form 314

Appendix F: Postoperative Guidelines for the Surgeon 315

- I. Routine 315
- II. Postoperative Regimen: Special – Antral 315

Appendix G: Postoperative Instructions for the Patient 316

Appendix H: Recommended Diet Following Implant Surgery 317

Appendix I: Implant Patient Follow-up Form 318

Appendix J: Where to Find the Products Mentioned in This Book 319

Suggested Reading List 323

Glossary 328

Index 336
