1 Electrical resistivity of pure metals and dilute alloys

For Sections 1.1...1.5 (J. BASS), see Subvolume III/15a

1.4 Dilute alloys: Additional data to section 1.4.1 Resistivity/atomic percent impurity in dilute alloys (J. BASS)	1
1.6 Pressure effects: The pressure dependence of the electrical resistance of pure crystalline metals (J. S. DUGDALE, A. MYERS)	13
1.6.1 Introduction	13
1.6.2 List of frequently used symbols and abbreviations	15
1.6.3 Data	16
1.6.4 References for 1.6.1...1.6.3	46

2 Kondo and spin fluctuation systems, spin glasses

(K. H. FISCHER), see Subvolume III/15a

3 Thermopower of pure metals and dilute alloys

(C. L. FOILES, Subsections 3.6 and 3.7; J. BASS, Subsections 3.8 and 3.9; J. S. DUGDALE, A. MYERS) 48

3.1 Introduction for pure metals	49
3.1.1 General remarks	48
3.1.2 List of frequently used symbols and abbreviations	49
3.2 Thermopower of pure metals near room temperature	50
3.3 Temperature dependence of the thermopower of pure metals	51
3.4 Thermopower at low temperatures	100
3.5 References for 3.1...3.4	102
3.6 Size dependence of thermopower (J. BASS), see Subvolume III/15a	
3.7 References for 3.6 (J. BASS), see Subvolume III/15a	
3.8 Pressure coefficients of the thermopower of metallic elements (J. S. DUGDALE, A. MYERS)	105
3.8.1 Introduction	105
3.8.2 List of frequently used symbols and abbreviations	105
3.8.3 Data	106
3.9 References for 3.8	122
3.10 Thermopower of dilute alloys	123
3.10.1 Introduction	123
3.10.2 List of frequently used symbols and abbreviations	124
3.10.3 Data	124
3.11 References for 3.10	206

4 Optical properties of pure metals and binary alloys

(C. L. FOILES) 210

4.1 Introduction for pure metals	210
4.1.1 General remarks	210
4.1.2 List of frequently used symbols and abbreviations	212

4.2 Drude parameters of pure metals	212
4.3 Optical constants of pure metals	222
4.4 References for 4.1...4.3	372
4.5 Introduction for binary alloys	376
4.6 Drude parameters of binary alloys	377
4.7 Optical constants of binary alloys	382
4.8 References for 4.5...4.7	489
