

Contents

Introduction	1
1. Electromagnetic Multipolar Moments	3
1.1 Electric Charge and Nuclear Size	3
1.1.1 Composition of Nuclei and Properties of Nucleons	3
1.1.2 Nuclear and Internal Density Distribution	4
1.1.3 Quark Structure and Nucleon Form Factors	7
1.2 Nuclear Electrical and Magnetic Moments	11
1.2.1 Charge and Current Densities	11
1.2.2 Vector Spherical Functions	14
1.2.3 Multipole Expansions of the Charge and Magnetic Moment Densities	15
1.2.4 Static Multipole Nuclear Moments	18
1.3 Multipole Electromagnetic Fields	21
1.3.1 Multipole Potentials	21
1.3.2 Multipole Expansion of Plane Waves	25
1.3.3 Multipole Operators	28
1.3.4 Transformation of Multipole Operators Under the Time Inversion	31
2. Interaction Between Nuclei and Electromagnetic Radiation	34
2.1 Absorption and Emission of Photons by Nuclei	34
2.1.1 Second Quantization of Electromagnetic Field	34
2.1.2 Probability of Nuclear Emission of a Photon	37
2.1.3 A Cross-Section of Nuclear Absorption of a Photon	40
2.1.4 Multipole Expansions	41
2.1.5 Angular Distribution and Polarization of Radiation	44
2.2 Longwave Approximation	48
2.2.1 Applicability Condition for the Longwave Approximation	48
2.2.2 Electrical Transitions	49
2.2.3 Magnetic Transitions	52
2.2.4 Electromagnetic Multipole Transition Probability	53
2.3 Effective Electrical Charges of Nucleons	57
2.3.1 Dipole Electrical Transition Matrix Elements	57

2.3.2	Isospin Selection Rules for Dipole Electrical Transitions	59
2.3.3	Isospin Selection Rules for Dipole Magnetic Transitions	61
2.4	Sum Rules for Photon Absorption by Nuclei	62
2.4.1	Photonuclear Giant Dipole Resonance	62
2.4.2	The Dipole Sum Rule of Thomas, Reiche, and Kuhn ...	63
2.4.3	Other Dipole Sum Rules for Photonuclear Transitions ..	66
2.4.4	Sum Rules for Photonuclear Processes of Arbitrary Multipolarities	70
2.5	Dispersion Sum Rules	72
2.5.1	Kramers-Kronig Dispersion Relations	72
2.5.2	Sum Rule of Gell-Mann, Goldberger, and Thirring	75
2.6	Nuclear Photodisintegration	77
2.6.1	Deuteron Photodisintegration	77
2.6.2	Exchange Current	81
2.6.3	Nuclear Photodisintegration Accompanied by Nucleon Emission	83
2.6.5	Polarization of Deuteron Photodisintegration Products and Asymmetrical Cross-Section	87
3.	Electron-Nucleus Interaction (Elastic and Inelastic Scattering) ..	91
3.1	Derivation of the General Equation for the Electron-Nucleus Scattering Cross-Section	91
3.1.1	Various Processes of Electron-Nucleus Interaction	91
3.1.2	Transition Matrix Element	94
3.1.3	The Scattering Cross-Section, Averaged Over Electron Polarizations	99
3.2	Electron Interaction with a Nucleus Regarded as a Nucleon System	101
3.2.1	The Assumption that Individual Nucleon Contributions in Charge and Current Densities are Additive	101
3.2.2	Electron – Nucleon Interaction in a Nucleus with Relativistic Corrections	101
3.2.3	Nuclear Charge and Current Densities with Relativistic Corrections	103
3.2.4	The Necessity of Introducing Two Form Factors for a Nucleon Description	106
3.3	Transitions in the Discrete Spectrum	108
3.3.1	General Expression for the Nuclear Electroexcitation Cross-Section	108
3.3.2	Multipole Expansion	111
3.3.3	Siebert Theorem	113
3.3.4	Reduced Probabilities of Nuclear Multipole Transitions ..	114

3.3.5	The Cross-Section Dependence on the Transferred Momentum and Scattering Angle ...	115
3.3.6	Derivation of the Electroexcitation Cross-Section Without Using Multipole Potentials	116
3.4	Electron-Nucleus Elastic Scattering (General Consideration) ...	117
3.4.1	Elastic Scattering Cross-Section and Reduced Matrix Elements	117
3.4.2	Partial Coulomb and Magnetic Form Factors	119
3.4.3	Electron-Nucleus Elastic Scattering Cross-Section and Nuclear Static Multipole Moments. Partial Form Factors	122
3.4.4	Qualitative Analysis of the Elastic Scattering Cross-Section	125
3.5	Electron Scattering by Free Nucleons	127
3.5.1	Rosenbluth Formula	127
3.5.2	Nucleon Form Factors	129
3.6	Elastic Scattering of Electrons by Deuterons	131
3.6.1	Electrical Deuteron Form Factors	131
3.6.2	Magnetic Deuteron Form Factor	133
3.6.3	Cross-Section of Elastic Electron Scattering by Deuterons	135
3.7	Elastic Scattering of Electrons by Three-Nucleon Nuclei	138
3.7.1	^3H and ^3He Ground States	138
3.7.2	Electromagnetic Form Factors of Three-Nucleon Nuclei	139
3.7.3	Cross-Section of Elastic Electron Scattering by ^3H and ^3He	141
3.8	Elastic Electron Scattering by Nuclei with $A \gg 1$	144
3.8.1	Electron Scattering by Spinless 1p-Shell Nuclei	144
3.8.2	Electron Scattering by Spinless Nuclei with Mass Number $A > 20$	147
3.8.3	Electron Scattering by Nuclei with Spin $J_0 \neq 0$	150
3.8.4	Phenomenological Analysis of Data on the Elastic Electron Scattering by Nuclei	157
3.8.5	Consideration Extended Beyond the Born Plane-Wave Approximation. A Phase Analysis	163
3.8.6	High-Energy Approximation	172
3.9	Electroexcitation of Nuclei	177
3.9.1	Longitudinal (Coulomb) and Transverse Transitions ...	177
3.9.2	Lifetime of Nuclear Levels	180
3.9.3	The Helm Model	181
3.9.4	Adiabatic Approximation	185
3.9.5	The Liquid Drop Model	186
3.9.6	The Migdal, Goldhaber, and Teller Model	189

3.9.7	Electron Scattering by Hard, Non-Spherical Nuclei	193
3.9.8	Electroexcitation of Rotational-Vibrational Nuclear States	198
3.9.9	Many-Particle Shell Model with Is-Coupling	200
3.9.10	Influence of a Bound Structure and Shell Potential on the Electroexcitation Probability	205
3.9.11	Nuclear Cluster Model	207
3.9.12	Shell Model with Residual Interaction. Hartree-Fock Method and Partial-Hole Model	210
3.9.13	Random Phases Approximation (RPA)	214
3.9.14	Electron Wave Distortion Analysis	219
3.9.15	Dispersion Effects and Radiation Corrections	222
3.9.16	Scattering of Polarized Electrons by Orientated Nuclei	223
4.	Electron-Nucleus Interaction (Nuclear Electrodintegration and Inclusive Processes)	226
4.1	Deuteron Electrodintegration	226
4.1.1	Deuteron Electrodintegration Cross-Section Disregarding the Interaction Between Disintegration Products	226
4.1.2	Contribution of the Final State Interaction	230
4.1.3	Analysis of Experimental Data on Deuteron Electrodintegration	232
4.1.4	Polarization Effects Under Deuteron Electrodintegration	236
4.2	Electrodintegration of Three-Nucleon Nuclei	238
4.2.1	General Expressions for Electrodintegration Cross-Sections of ^3H and ^3He	238
4.2.2	Model-Wave-Function Analysis of the Two-Particle Disintegration of Three-Nucleon Nuclei	243
4.2.3	Model-Wave-Function Analysis of the Complete Electrodintegration of Three-Nucleon Nuclei	248
4.2.4	Cross-Section Evaluations for the Two-Particle Electrodintegration of Three-Nucleon Nuclei by Using Given Nucleon-Nucleon Potentials	254
4.2.5	Evaluations of $^3\text{He}(e, e'p)pn$ and $^3\text{H}(e, e'p)nn$ Cross- Sections for Given Nucleon-Nucleon Interactions in Nuclear Ground States	257
4.2.6	Interpolation Model	259
4.3	Electrodintegration of Light Nuclei	262
4.3.1	Inelastic Scattering of High-Energy Electrons by Nuclei Accompanied by Nucleon Emission	262

4.3.2	Model-Independent Description of the Nucleon Emission from Nuclei Under Scattering of High-Energy Electrons	268
4.3.3	Spectral Function	272
4.3.4	Many-Particle Shell Model and Nuclear Electrodintegration	274
4.3.5	Momentum Distribution of Nuclear Nucleons	281
4.3.6	Analysis of Coincidence Experiments on the Electro- disintegration of Light Many-Nucleon Nuclei	283
4.3.7	Nucleon Polarization Under Nuclear Electrodintegration	289
4.3.8	Nuclear Electrodintegration Accompanied by Composite Particles Emission	291
4.4	Inclusive Electron Scattering by Nuclei	293
4.4.1	Exclusive and Inclusive Processes	293
4.4.2	General Formulas for the Cross-Sections of Inclusive Electron Scattering by Nuclei	294
4.4.3	Inclusive Electron Scattering by Deuterons	300
4.4.4	Electron Energy Distribution Under the Electrodintegration of Light Nuclei	302
4.4.5	Sum Rule for the Inclusive Electron Scattering by Nuclei	306
4.4.6	Nucleon-Nucleon Correlation Function	309
4.4.7	Other Sum Rules for Electron Scattering by Nuclei	311
4.4.8	Inclusive Electron Scattering by Three-Nucleon Nuclei. Correlation Functions of ^3H and ^3He	313
4.4.9	Correlation Functions of Light Many-Nucleon Nuclei and Angular Electron Distributions Under Inclusive Scattering	316
4.4.10	Scaling Effect in the Inclusive Electron Scattering Cross-Sections	318
4.5	Inelastic Electron Scattering and Two-Particle Correlations in Nuclei	326
4.5.1	Relation between the Cross-Section of Inelastic Electron Scattering by Nuclei and Two-Nucleon Correlation Functions	326
4.5.2	Fermi-Gas Nuclear Model	331
4.5.3	Superfluid Nuclear Model	333
4.5.4	Fermi-Liquid Nuclear Model	333
4.5.5	Nuclear Shell Model	336

5. Electromagnetic Interaction	
Between Heavy Charged Particles and Nuclei	341
5.1 Electromagnetic Excitation of Nuclei	
by Heavy Charged Particles	341
5.1.1 Multipole Expansions	341
5.1.2 General Expression	
for the Coulomb Excitation Cross-Section	347
5.1.3 Cross-Sections of Electrical and Magnetic Nuclear	
Excitations in the Non-Relativistic Approximation	350
5.1.4 Wavefunctions of Charged Particles	
in the Nuclear Coulomb Field	352
5.1.5 Evaluation of Transition Matrix Elements	
of a Charged Particle	354
5.1.6 Radial Integrals in the Quasiclassical Approximation	357
5.1.7 The Theory of Coulomb Nuclear Excitation	
in the Classical Limit	360
5.1.8 Numerical Results	
for the Coulomb Nuclear Excitation Cross-Sections	363
5.1.9 Multiple Coulomb Nuclear Excitation	365
5.2 Disintegration of Complex Particles	
in the Nuclear Electromagnetic Field	365
5.2.1 Disintegration of Slow Deuterons	
in the Nuclear Coulomb Field	365
5.2.2 Disintegration of Fast Deuterons	
in the Nuclear Electromagnetic Field	370
5.2.3 Polarization of Composite Particles Disintegration	
Products in the Nuclear Electromagnetic Field	374
5.2.4 Disintegration of Light Nuclei	
in the Electromagnetic Field of Heavy Nuclei	375
5.2.5 Deuteron Disintegration by Nuclei	
in the Case of Nucleons Emission at 0°	379
