Introductory Remarks
P. B. S. Clarke, M. Quik, F. X. Adlkofer, K. Thureau IX

I: Overview
Current controversies in nicotine research
P. B. S. Clarke 3

Acute biological effects of nicotine and its metabolites
N. L. Benowitz 9

Involvement of nicotine and its metabolites in the pathology of smoking-related diseases:
Facts and hypotheses
F. X. Adlkofer 17

II. Structure and function of nicotinic receptors
A cyclophilin-dependent mechanism for $\alpha 7$ neuronal nicotinic acetylcholine receptor
maturation
S. A. Helekar, L. Colquhoun, H. Dang, D. Chen, F. Goldner and J. Patrick 29

α -Bungarotoxin receptor subtypes
C. Gotti, W. Hanke, M. Moretti, R. Longhi, B. Balestra, L. Briscini and F. Clementi 37

Neuronal nicotinic receptor structure and function
J. Lindstrom, R. Anand, X. Peng and V. Gerzanich 45

Determinants regulating neuronal nicotinic receptor function
S. Bertrand, B. Buisson, I. Forster and D. Bertrand 53

Expression, function, and regulation of neuronal acetylcholine receptors containing the
 $\alpha 7$ gene product
*D. K. Berg, Z.-W. Zhang, W. G. Conroy, P. C. Pugh, R. A. Corriveau, S. J. Romano,
M. M. Rathouz, B. Huang and S. Vijayaraghavan* 61

III. Nicotinic receptor regulation and tolerance
Biochemical measures of nicotinic receptor desensitization
M. J. Marks, S. R. Grady, S. F. Robinson, A. E. Bullock and A. C. Collins 71

The role of desensitization in CNS nicotinic receptor function
P. M. Lippiello, M. Bencherif and R. J. Prince 79

Presynaptic nicotinic autoreceptors and heteroreceptors in the CNS
S. Wonnacott, G. Wilkie, L. Solakov and P. Whiteaker 87

Regulation of neuronal nicotinic receptors in primary cultures
M. I. Dávila-García, Y. Xiao, R. A. Houghtling, S. S. Qasba, C. M. Flores and K. J. Kellar . . 95

Conditioned tolerance to nicotine in rats
*A. R. Caggiola, L. H. Epstein, S. M. Antelman, S. Knopf, K. A. Perkins, S. Saylor,
E. Donny and R. Stiller* 101

IV: Neuronal, trophic and endocrine effects of nicotine

Developmental effects of nicotine

<i>T. A. Slotkin</i>	111
--------------------------------	-----

Presynaptic nicotine-gated channels potentiate transmission at ACh and glutamate-mediated synapses

<i>D. McGehee and L. W. Role</i>	119
--	-----

Electrophysiology of neuronal nicotinic receptors in the CNS

<i>C. Mulle, C. Léna and J.-P. Changeux</i>	127
---	-----

Factors controlling nicotinic acetylcholine receptor expression on rat sympathetic neurons

<i>P. De Koninck and E. Cooper</i>	137
--	-----

Growth related role for the nicotinic α -bungarotoxin receptor

<i>M. Quirk</i>	145
---------------------------	-----

Mechanisms of nicotine stimulated cell proliferation in normal and neoplastic neuro-endocrine lung cells

<i>H. M. Schuller</i>	151
---------------------------------	-----

Activation of the hypothalamic-pituitary-adrenal axis by nicotine: Neurochemical and neuroanatomical substrates

<i>B. Sharp and S. Matta</i>	159
--	-----

Regulation of proenkephalin gene expression in bovine adrenal medullary chromaffin cells by nicotine

<i>B. Bacher, X. Wang and V. Höllt</i>	167
--	-----

Effects of nicotine on thromboxane and leukotriene synthesis in cellular systems

<i>R.-M. Goerig and S. Koll</i>	173
---	-----

V: Nicotine and smoking: Current controversies

Smoking-induced alterations in brain electrical profiles: Normalization or enhancement?

<i>V. Knott and A. Harr</i>	181
---------------------------------------	-----

Nicotine and cognitive effects

<i>I. Hindmarch and N. Sherwood</i>	189
---	-----

Evidence that nicotine is addictive

<i>I. P. Stolerman and M. J. Jarvis</i>	195
---	-----

Self-administered nicotine acts through the ventral tegmental area: Implications for drug reinforcement mechanisms

<i>W. A. Corrigall</i>	203
----------------------------------	-----

Desensitisation of the stimulatory effects of nicotine on dopamine secretion in the mesolimbic system of the rat

<i>D. J. K. Balfour and M. E. M. Benwell</i>	211
--	-----

Nicotine as a discriminative stimulus: Individual variability to acute tolerance and the role of receptor desensitization

<i>J. A. Rosecrans, L. D. Karan and J. R. James</i>	219
---	-----

Behavioral and biochemical analysis of the dependence properties of nicotine <i>T. Yanagita, K. Ando, Y. Wakasa and A. Shimada</i>	225
Nicotine boost per cigarette as the controlling factor of intake regulation by smokers <i>M. A. H. Russell, J. A. Stapleton and C. Feyerabend</i>	233
There is more to smoking than the CNS effects of nicotine <i>J. E. Rose and F. M. Behm</i>	239
Pharmacological determinants of cigarette smoking <i>J. E. Henningfield, L. M. Schuh and S. J. Heishman</i>	247
The functional conception of nicotine use <i>D. M. Warburton</i>	257
Nicotine is addictive: The issue of free choice <i>R. West</i>	265
Differentiating habits and addictions: The evidence that nicotine is not 'addictive' <i>J. H. Robinson and W. S. Pritchard</i>	273
Differences in response to nicotine are determined by genetic factors <i>J. A. Stitzel, S. F. Robinson, M. J. Marks and A. C. Collins</i>	279
VI: Nicotine and human diseases	
Relationship between smoking, nicotine and ulcerative colitis <i>G. A. O. Thomas and J. Rhodes</i>	287
Transdermal nicotine in Tourette's syndrome <i>A. A. Silver, R. D. Shytle, M. K. Philipp and P. R. Sanberg</i>	293
Nicotine and neuropsychiatric disorders: Schizophrenia <i>J. R. Hughes and P. McHugh</i>	301
Nicotinic receptors and the pathophysiology of schizophrenia <i>R. Freedman, S. Leonard, L. Adler, P. Bickford, W. Byerley, H. Coon, C. Miller, V. Luntz-Leybman, M. Myles-Worsley, H. Nagamoto, G. Rose, K. Stevens and M. Waldo</i>	307
The epidemiology of cigarette smoking and Parkinson's disease <i>J. A. Baron</i>	313
Nicotine and animal models of Parkinson's disease <i>A. M. Janson, A. Møller, P. B. Hedlund, G. von Euler and K. Fuxe</i>	321
Nicotine effects on memory performance <i>E. D. Levin and D. Torry</i>	329
Possible mechanisms underlying beneficial effects of nicotine on cognitive function <i>M. H. Joseph, G. Grigoryan, H. Hodges and J. A. Gray</i>	337
Nicotinic modulation of cognitive functioning in humans <i>P. A. Newhouse, A. Potter, M. Piasecki, J. Geelmuyden, J. Corwin and R. Lenox</i>	345

Invited Contributions	
Distribution of nicotinic acetylcholine receptor subunit immunoreactivities on the surface of chick ciliary ganglion neurons <i>P. B. Sargent and H. L. Wilson</i>	355
Autoradiographic distribution of nicotinic receptor sites labelled with [³ H]cytisine in the human brain <i>I. Aubert, D. Cécyre, S. Gauthier and R. Quirion</i>	363
Epibatidine <i>M. Dukat, M. I. Damaj, D. Dumas, W. Glassco, E. L. May, B. R. Martin and R. A. Glennon</i>	371
Measuring changes in mesolimbic dopamine and related substances in response to systemic nicotine using <i>in vivo</i> electrochemistry <i>G. C. Parker and P. B. S. Clarke</i>	379
Effect of nicotine and cotinine on NNK metabolism in rats <i>C. Kutzer, E. Richter, C. Oehlmann and S. E. Atawodi</i>	385
Concluding Remarks	
The future of nicotine-containing products <i>M. J. Rand</i>	391
Author Index	399
Subject Index	401
