| 3.2.3    | Geochronologic-Metallotectonic Relationship of Uranium Deposits .....  | 50        |
| 3.2.4    | Uranium Deposit Generations and Their Time-Stratigraphic Ranking ..... | 51        |
|          | Selected References and Further Reading for Chapter 3.2 .....          | 56        |
| <b>4</b> | <b>Typology of Uranium Deposits .....</b>                              | <b>57</b> |
| 4.1      | Type 1: Unconformity-Contact .....                                     | 57        |
| 4.1.1    | Subtype 1.1 Proterozoic unconformity-related .....                     | 66        |
| 4.1.2    | Subtype 1.2 Phanerozoic unconformity-related .....                     | 68        |
| 4.2      | Type 2: Subconformity-Epimetamorphic .....                             | 69        |
| 4.2.1    | Subtype 2.1 Not albitized sediments .....                              | 72        |
| 4.2.2    | Subtype 2.2 Albitized sediments .....                                  | 73        |
| 4.3      | Type 3 Vein .....                                                      | 74        |
| 4.3.1    | Subtype 3.1 Granite-related .....                                      | 77        |
| 4.3.2    | Subtype 3.2 Not granite-related .....                                  | 82        |
| 4.4      | Type 4 Sandstone .....                                                 | 84        |
| 4.4.1    | Subtype 4.1 Tabular/peneconcordant .....                               | 88        |
| 4.4.2    | Subtype 4.2 Rollfront .....                                            | 92        |
| 4.5      | Type 5 Collapse Breccia Pipe .....                                     | 94        |
| 4.6      | Type 6 Surficial .....                                                 | 96        |
| 4.6.1    | Subtype 6.1 Duricrusted sediments .....                                | 100       |
| 4.6.2    | Subtype 6.2 Peat-bog .....                                             | 102       |
| 4.6.3    | Subtype 6.3 Karst-cavern .....                                         | 103       |
| 4.6.4    | Subtype 6.4 Surficial pedogenic and structure fill .....               | 103       |
| 4.7      | Type 7 Quartz-pebble Conglomerate (Lower Proterozoic) .....            | 104       |
| 4.7.1    | Subtype 7.1 U-dominated with REE .....                                 | 106       |
| 4.7.2    | Subtype 7.2 Au over U-dominant .....                                   | 107       |
| 4.8      | Type 8 Breccia Complex .....                                           | 108       |

|        |                                                                |     |
|--------|----------------------------------------------------------------|-----|
| 4.9    | Type 9 Intrusive .....                                         | 110 |
| 4.9.1  | Subtype 9.1 Alaskite .....                                     | 112 |
| 4.9.2  | Subtype 9.2 Quartz monzonite (Cu-porphyry) .....               | 112 |
| 4.9.3  | Subtype 9.3 Carbonatite .....                                  | 113 |
| 4.9.4  | Subtype 9.4 Peralkaline syenite .....                          | 114 |
| 4.9.5  | Subtype 9.5 Pegmatite .....                                    | 114 |
| 4.10   | Type 10 Phosphorite .....                                      | 115 |
| 4.10.1 | Subtype 10.1 Phosphoria .....                                  | 117 |
| 4.10.2 | Subtype 10.2 Land pebble .....                                 | 118 |
| 4.11   | Type 11 Volcanic .....                                         | 118 |
| 4.11.1 | Subtype 11.1 Structure-bound .....                             | 120 |
| 4.11.2 | Subtype 11.2 Strata-bound .....                                | 121 |
| 4.12   | Type 12 Metasomatite .....                                     | 122 |
| 4.12.1 | Subtype 12.1 Metasomatized granite .....                       | 125 |
| 4.12.2 | Subtype 12.2 Metasomatized metasediments .....                 | 126 |
| 4.13   | Type 13 Synmetamorphic .....                                   | 127 |
| 4.14   | Type 14 Lignite .....                                          | 129 |
| 4.14.1 | Subtype 14.1 Joint-fracture-related .....                      | 130 |
| 4.14.2 | Subtype 14.2 Stratiform .....                                  | 131 |
| 4.15   | Type 15 Black Shale .....                                      | 131 |
| 4.15.1 | Subtype 15.1 Bituminous-sapropelic black shale .....           | 132 |
| 4.15.2 | Subtype 15.2 Humic/Kolm in alum shale .....                    | 132 |
| 4.16   | Type 16 Strata-Controlled, Structure-Bound .....               | 133 |
|        | Selected References and Further Reading for<br>Chapter 4 ..... | 134 |

## **5 Selected Examples of Economically Significant Types of Uranium Deposits .....**

|       |                                                                                                                                      |     |
|-------|--------------------------------------------------------------------------------------------------------------------------------------|-----|
| 5.1   | Examples of Unconformity-Contact-Type Uranium<br>Deposits (Type 1, Chap. 4): Athabasca Basin Region,<br>Canada .....                 | 137 |
| 5.2   | Examples of Subunconformity-Epimetamorphic-Type<br>Uranium Deposits (Type 2, Chap. 4) .....                                          | 168 |
| 5.2.1 | Subunconformity-Epimetamorphic Uranium Deposits<br>in Not-Albitized Metasediments: Alligator River<br>Uranium Field, Australia ..... | 168 |
| 5.2.2 | Subunconformity-Epimetamorphic Uranium Deposits<br>in Albitized Metasediments: Uranium City Region,<br>Canada .....                  | 191 |
| 5.3   | Examples of Vein-Type Uranium Deposits (Type 3,<br>Chap. 4) .....                                                                    | 201 |
| 5.3.1 | Intragrantic Vein Uranium Deposits: Limousin/La<br>Crouzille District, France .....                                                  | 201 |
| 5.3.2 | Perigranitic Monometallic Vein Uranium Deposits:<br>Příbram District, ČSFR .....                                                     | 218 |

|       |                                                                                                                                                          |            |
|-------|----------------------------------------------------------------------------------------------------------------------------------------------------------|------------|
| 5.3.3 | Perigranitic Polymetallic Vein Uranium Deposits:<br>St. Joachimsthal/Jachymov District, ČSFR .....                                                       | 224        |
| 5.3.4 | Perigranitic Uranium Deposits in Contactmetamorphic<br>Rocks: Iberian Meseta, Portugal-Spain .....                                                       | 232        |
| 5.3.5 | Metasediment-Hosted, Not Granite-Related Vein<br>Uranium Deposits: Schwartzwalder Mine, Front<br>Range, USA .....                                        | 237        |
| 5.3.6 | Sediment-Hosted, Not Granite-Related Vein Uranium<br>Deposits: Shinkolobwe, Katanga Copper Province,<br>Zaire .....                                      | 246        |
| 5.4   | Examples of Sandstone-Type Uranium Deposits<br>(Type 4, Chap. 4) .....                                                                                   | 250        |
| 5.4.1 | Extrinsic Carbon/Humate-Uranium Deposits in<br>Phanerozoic Sandstones: Grants Uranium Region,<br>USA .....                                               | 250        |
| 5.4.2 | Vanadium-Uranium Deposits in Phanerozoic<br>Sandstones: Colorado Plateau, USA .....                                                                      | 270        |
| 5.4.3 | Channel/Basal Uranium Deposits in Phanerozoic<br>Sandstones: Monument Valley-White Canyon<br>Districts, USA .....                                        | 284        |
| 5.4.4 | Roll-Type Detrital Carbon-Uranium Deposits in<br>Phanerozoic Continental Basin Sandstones: Wyoming<br>Basins, USA .....                                  | 290        |
| 5.4.5 | Roll-Type Extrinsic Sulfide-Uranium Deposits in<br>Phanerozoic Coast Plain Sandstones: South Texas<br>Coastal Plain, USA .....                           | 305        |
| 5.4.6 | Uranium Deposits in Proterozoic Sandstones:<br>Franceville Basin, Gabon .....                                                                            | 319        |
| 5.5   | Examples of Collapse Breccia Pipe-Type Uranium<br>Deposits (Type 5, Chap. 4): Arizona Strip Area,<br>USA .....                                           | 324        |
| 5.6   | Examples of Surficial-Type Uranium Deposits<br>(Type 6, Chap. 4): Surficial Uranium Deposits in<br>Duricrusted Sediments: Yilgarn Block, Australia ..... | 334        |
| 5.7   | Examples of Quartz-Pebble Conglomerate-Type<br>Uranium Deposits (Type 7, Chap. 4) .....                                                                  | 343        |
| 5.7.1 | Uranium-Rare Earth Elements Deposits in Quartz-<br>Pebble Conglomerate: Blind River-Elliot Lake,<br>Canada .....                                         | 343        |
| 5.7.2 | Gold-Uranium Deposits in Quartz-Pebble<br>Conglomerates: Witwatersrand Basin, South Africa ..                                                            | 353        |
| 5.8   | Examples of Intrusive-Type Uranium Deposits<br>(Type 9, Chap. 5): Alaskite Uranium Deposits:<br>Rössing, Damara Orogenic Belt, Namibia .....             | 366        |
