

CONTENTS

Opening Remarks from the Sponsoring International Committee	1
I. COSMIC EVOLUTION	
The Creation of Free Energy	5
<i>G. Marx</i>	
Particulate Disks Around Main Sequence Stars	11
<i>D. E. Backman and F. Paresce</i>	
Bursts of Star Formation in the Local Galactic Disk and Their Implications for the Origin and Evolution of Life Around the Sun and Nearby Stars.....	13
<i>A. A. Suchkov</i>	
Testing Theories of Star Formation	17
<i>J. N. Evans II</i>	
Towards an Estimate of the Fraction of Stars with Planets from Velocities of High Precision	19
<i>B. Campbell, S. Yang and A. W. Irwin, G. A. H. Walker</i>	
On the Feasibility of Extra-Solar Planetary Detection at Very Low Radio Frequencies	21
<i>A. Lecacheux</i>	
The ESO Microvariability Key Program and the Detection of Extrasolar Planets and Brown Dwarfs	31
<i>N. Vogt</i>	
A Proposal for the Search for Extra-Solar Planets by Occultation.....	33
<i>J. Schneider and M. Chevreton</i>	
Near-Term Prospects for Extra-Solar Planet Detection: The Astrometric Imaging Telescope.....	34
<i>R. J. Terile, E. H. Levy and G. D. Gatewood</i>	
A Search for T-Tauri Stars Based on the IRAS Point Source Catalogue	36
<i>J.C.G. Hetem, J. R.D. Lepine, G. R. Quast, C.A.O. Torres and R. de la Reza</i>	
How Many Single Stars Among Solar Type Stars?	39
<i>A. Duquennoy and M. Mayor</i>	
Habitable Planetary Orbits Around Alpha Centauri and Other Binaries.....	44
<i>D. Benest</i>	

The Search for Protostars	48
<i>T. L. Wilson</i>	
The Habitability of Mars-like Planets Around the Main Sequence Stars	55
<i>W. L. Davis, L. R. Doyle, D. E. Backman and C. P. McKay</i>	
Planetary Accretion Debris and IR Excesses in Open Stellar Clusters	62
<i>D. E. Backman, J. R. Stauffer and F. C. Witteborn</i>	
Lithium Abundances as a Probe of the Early Evolution of Solar-type Stars	63
<i>E. L. Martin, G. Basri and C. Bertout</i>	
Low-Amplitude Stellar Velocity Variations: Other Possibilities	64
<i>D. W. Latham, G. Torres and T. Mazeh</i>	

II. ORGANIC AND PREBIOTIC EVOLUTION

Some Recent Developments in Interstellar Chemistry	71
<i>W. M. Irvine, A. Hjalmarsen and M. Ohishi</i>	
The Formation of Long Chains of Carbon Atoms in Space	80
<i>R. D. Brown, D. M. Cragg and R. P. A. Bettens</i>	
Hydrogen Cyanide Polymerization: A Preferred Cosmochemical Pathway	85
<i>C. N. Matthews</i>	
Polycyclic Aromatic Hydrocarbons (PAH's): Very Abundant Organic Molecules in the Interstellar Medium	88
<i>A. Leger, L. d'Hendecourt, L. Verstraete and C. Joblin</i>	
Primitive Evolution: Early Information Transfer and Catalysis by Purines	93
<i>M. C. Maurel</i>	
The Search for H ₂ O in Extraterrestrial Environments	99
<i>H. P. Larson</i>	
Self-assembly Properties of Primitive Organic Compounds	107
<i>D. W. Deamer</i>	
Cometary Studies: The Bioastronomical Perspectives	109
<i>A. C. Levasseur-Regourd</i>	
Origin of the Biosphere of the Earth	117
<i>A. H. Delsemme</i>	

Carbon-Rich Micrometeorites and Prebiotic Synthesis	124
<i>M. Maurette, Ph. Bonny, A. Brack, C. Jouret, M. Pourchet and P. Siry</i>	
Titan's Atmosphere Probed by Stellar Occultation	133
<i>A. Brahic, B. Sicardy, C. Ferrari and D. Gautier</i>	
Study of Transmitted Light through Titan's Atmosphere	134
<i>D. Toublanc, J.P. Parisot and J. Brillet</i>	
UV Radiation Fields in Dense Clouds: Photochemical Effects	136
<i>S. Aiello, S. Tine' and C. Cecchi-Pestellini</i>	

III. PRIMITIVE EVOLUTION

Prebiotic Chemistry in Planetary Environments	141
<i>F. Raulin</i>	
Terrestrial Accretion of Prebiotic Volatiles and Organic Molecules During the Heavy Bombardment	149
<i>C. F. Chyba, C. Sagan, L. Brookshaw, and P. J. Thomas</i>	
Geophysiology and Habitable Zones Around Sun-like Stars	155
<i>D.W. Schwartzman and T. Volk</i>	
Exobiological Habitats: An Overview	163
<i>L. R. Doyle and C. P. McKay</i>	
Habitable Zones for Earth-like Planets Around Main Sequence Stars	173
<i>D. P. Whitmire, R.T. Reynolds and J. F. Kasting</i>	
Titan's Atmosphere from Voyager Infrared Observations: Parallels and Differences with the Primitive Earth	179
<i>A. Coustenis</i>	
Liquid Water and Life on Early Mars	190
<i>C. P. McKay, L. R. Doyle, W. L. Davis and R. A. Wharton</i>	
New Interpretation of Crustal Extension Evidences on Mars	193
<i>E. A. Grin</i>	
Martian Paleohydrology and Its Implications for Exobiology Science	194
<i>N. A. Cabrol and E. A. Grin</i>	
Boundaries of the Earth's Biosphere	199
<i>M. D. Nussinov and S. V. Lysenko</i>	

IV. ADVANCED EVOLUTION - SEARCHING FOR EVIDENCE

The Impact of Technology on SETI	203
<i>M. J. Klein and S. Gulkis</i>	
RFI Surveys at Selected Radio Observatories	210
<i>E. T. Olsen, E. B. Jackson and S. Gulkis</i>	
A 1Hz Resolution RFI Survey: Preliminary Results	217
<i>J. W. Dreher, J. Tarter and D. Werthimer</i>	
The SERENDIP II SETI Program: Observations and RFI Analysis	223
<i>C. Donnelly, S. Bowyer, W. Herrick, D. Werthimer, M. Lampton and T. Hiatt</i>	
SETI: On the Telescope and on the Drawing Board	229
<i>J. C. Tarter and M. J. Klein</i>	
Project of ETI Signal Search at the Wavelength 1.47 mm	236
<i>S.F. Likhachev and G.M. Rudnitskij</i>	
A SETI Search Technique: Monitor Stars to Which We Have Sent Signals	240
<i>P. B. Boyce and L. H. Wasserman</i>	
Radio Search for Alien Space Probes	244
<i>A.V. Arkhipov</i>	
Karhunen-Loève Versus Fourier Transform for SETI	247
<i>C. Maccone</i>	
On the Strategy of SETI	254
<i>L. N. Filippova, N.S. Kardashev, S.F. Likhachev and V.S. Strel'nitskij</i>	
Pan-Galactic Pulse Periods and the Pulse Window for SETI	259
<i>W. T. Sullivan, III</i>	
Cosmic Background Radiation Limits for SETI	269
<i>S. Gulkis</i>	
VLBI and Interstellar Scattering Tests for SETI Signals	270
<i>V.I. Slysh</i>	
A Test for the Interstellar Contact Channel Hypothesis in SETI	271
<i>D. G. Blair, R. Norris, K. J. Wellington, A. Williams and A. Wright</i>	
The SETI Program of the Planetary Society	280
<i>T. R. McDonough</i>	

Trying to Do Science Using High Spectral Resolution SETI Prototypes	283
<i>J. C. Tarter , P. Backus, K. Cullers, J. Dreher, C. Hlavka and J. Jordan</i>	
The Summit of the CBR at mm Wavelengths and Other Queries	284
<i>J. P. Vallee</i>	
The Potential Contribution of the Northern Cross Radiotelescope to the SETI Program	285
<i>C. Bortolotti, A. Cattani, N. D'Amico, G. Grueff, A. Maccaferri, S. Montebugnoli and M. Roma</i>	
A Proposal for a SETI Global Network	289
<i>J. Heidmann</i>	
 V. ADVANCED EVOLUTION - POSSIBILITIES	
A Search for Dyson Spheres Around Late-type Stars in the IRAS Catalog	295
<i>J. Jugaku and S. Nishimura</i>	
Gravitational, Plasma, and Black-hole Lenses for Interstellar Communications	299
<i>V. R. Eshleman</i>	
SETI Through the Gamma-Ray Window: A Search for Interstellar Spacecraft.....	300
<i>M. J. Harris</i>	
Criteria of Artificiality in SETI	306
<i>V. V. Rubtsov</i>	
The Antecedents of Consciousness: Evolving the "Intelligent" Ability to Simulate Situations and Contemplate the Consequences of Novel Courses of Action	311
<i>W. H. Calvin</i>	
Cognition in an African Grey Parrot	320
<i>I. M. Pepperberg</i>	
Archeology in Space: Encountering Alien Trash and Other Remains	327
<i>D. L. Holmes</i>	
Biological Constraints on Interstellar Travel	333
<i>J. Pfleiderer</i>	
A Philosophical Approach to the Extraterrestrial Life Issue	338
<i>A. D. Fokker</i>
