Preface	vii
Preface to the Second Edition	ix
1 Basic Concepts	1
1.1 Zorn's Lemma, Ordinal and Cardinal Numbers	1
1.2 Modules	8
1.3 Tensor Products of Modules and Nakayama Lemma	14
1.4 Categories and Functors	19
1.5 Complexes of Modules and Homology	27
1.6 Direct and Inverse Limits	33
1.7 I -adic Topology and Completions	38
2 Flat Modules, Chain Conditions and Prime Ideals	42
2.1 Flat Modules	42
2.2 Localization	46
2.3 Chain Conditions	49
2.4 Prime Ideals and Primary Decomposition	54
2.5 Artin-Rees Lemma and Zariski Rings	63
3 Injective and Flat Modules	71
3.1 Injective Modules	71
3.2 Natural Identities, Flat Modules, and Injective Modules	78
3.3 Injective Modules over Commutative Noetherian Rings	87
3.4 Matlis Duality	93
4 Torsion Free Covering Modules	98
4.1 Existence of Torsion Free Precovers	98
4.2 Existence of Torsion Free Covers	100
4.3 Examples	102
4.4 Direct Sums and Products	106
5 Covers	110
5.1 $\mathcal{F}$ -precovers and covers	110
5.2 Existence of Precovers and Covers	112
5.3 Projective and Flat Covers	115

5.4	Injective Covers	125
5.5	Direct Sums and T -nilpotency	131
6	Envelopes	135
6.1	$\mathcal{F}$ -preenvelopes and Envelopes	135
6.2	Existence of Preenvelopes	136
6.3	Existence of Envelopes	138
6.4	Direct Sums of Envelopes	140
6.5	Flat Envelopes	142
6.6	Existence of Envelopes for Injective Structures	145
6.7	Pure Injective Envelopes	150
7	Covers, Envelopes, and Cotorsion Theories	158
7.1	Definitions and Basic Results	158
7.2	Fibrations, Cofibrations and Wakamatsu Lemmas	160
7.3	Set Theoretic Homological Algebra	166
7.4	Cotorsion Theories with Enough Injectives and Projectives	168
8	Relative Homological Algebra and Balance	173
8.1	Left and Right $\mathcal{F}$ -resolutions	173
8.2	Derived Functors and Balance	175
8.3	Applications to Modules	184
8.4	$\mathcal{F}$ -dimensions	187
8.5	Minimal Pure Injective Resolutions of Flat Modules	201
8.6	λ and μ -dimensions	211
9	Iwanaga–Gorenstein and Cohen–Macaulay Rings and Their Modules	219
9.1	Iwanaga–Gorenstein Rings	219
9.2	The Minimal Injective Resolution of R	223
9.3	More on Flat and Injective Modules	232
9.4	Torsion Products of Injective Modules	235
9.5	Local Cohomology and the Dualizing Module	238
10	Gorenstein Modules	249
10.1	Gorenstein Injective Modules	249
10.2	Gorenstein Projective Modules	256
10.3	Gorenstein Flat Modules	263
10.4	Foxby Classes	268
11	Gorenstein Covers and Envelopes	280
11.1	Gorenstein Injective Precovers and Covers	280
11.2	Gorenstein Injective Preenvelopes	281
11.3	Gorenstein Injective Envelopes	285

11.4	Gorenstein Essential Extensions	288
11.5	Gorenstein Projective Precovers and Covers	290
11.6	Auslander's Last Theorem (Gorenstein Projective Covers)	295
11.7	Gorenstein Flat Covers	300
11.8	Gorenstein Flat and Projective Preenvelopes	304
11.9	Kaplansky Classes	305
12	Balance over Gorenstein and Cohen–Macaulay Rings	311
12.1	Balance of $\text{Hom}(-, -)$	311
12.2	Balance of $- \otimes -$	315
12.3	Dimensions over n -Gorenstein Rings	318
12.4	Dimensions over Cohen–Macaulay Rings	323
12.5	Ω -Gorenstein Modules	325
	Bibliographical Notes	337
	Bibliography	341
	Index	351
