Part I Environmental Ethics	1
1 The Tower of Babel was a Coastal Edifice	3
1.1 Taking Nature into Account	5
1.2 A Drastic Increase in Productivity	5
1.3 New Policy Indicators Measure Welfare	5
1.4 Concentration and Separation of Spatial Functions	5
1.5 Explicit Management/Conservation and Development of National Parks	5
1.6 Material Flow Chains are Closed Where this is Environmentally Most Effective	6
1.7 Use of Energy-Extensive and Non-Toxic Materials in the Construction Industry	6
1.8 Environmental Planning as an Instrument to Minimise Transport	6
1.9 Minimal Dependence on Fossil Energy in Transport	6
1.10 Minimising the Transport of Goods	6
1.11 Final Remarks	7
2 Philosophy and Man's Responsibility for Nature	9
2.1 Introduction	9
2.2 Modern Science and Modern Philosophy	10
2.3 Philosophy's Responsibility	11
2.4 Nature Politics	13
References	14
3 On Moral Failures in Dealing with Environmental Issues: The Europe Experience	15
3.1 Introduction	15
3.2 Moral Failures in the Europe Conflict	16
3.2.1 Original Moral Failure of Politics	16
3.2.2 Moral Failure of the Pipeline Operator	17
3.2.3 Moral Failure of the Environmentalists	17
3.2.4 Second Moral Failure of Politics	19
3.2.5 Moral Failure of Local Communities	20
3.2.6 Moral Failure of the Media	20
3.2.7 Moral Failure of Science	20
3.3 Discussion and Conclusions	22
References	22

4	Coastal and Marine Protected Areas: Nature's Refuge from Large-Scale Constructions	25
4.1	Introduction	25
4.2	The Case of Europipe	25
4.3	National Obligations	26
4.4	International Obligations	28
4.5	The Ethical Argument: Respect for Nature	29
4.6	Conclusion	30

5	Towards Developing Guidelines for Assessment, Design and Operation of Estuarine Barrages	35
5.1	Introduction	35
5.2	Definitions and Purposes of Barrages and Barriers	36
5.3	The Research Project	38
5.4	The Issues	40
5.4.1	Fisheries, Nature and Conservation	40
5.4.2	Hydrodynamics	41
5.4.3	Morphology	42
5.4.4	Flooding	43
5.4.5	Groundwater	44
5.4.6	Water Quality	45
5.4.7	Waves	46
5.4.8	Navigation	46
5.4.9	Structural Engineering Concepts	47
5.4.10	Water-Related Risk	48
5.5	Environmental Policy	49
5.5.1	Environmental Assessment and Environmental Statement	49
5.5.2	Environment Agency and Licences, Consents and Approvals	50
5.5.3	Planning Policy Guidance and Other Legislative Instruments	51
5.5.4	The Habitats Directive	52
5.5.5	Recreation and the Amenity Plan	52
5.6	Conclusion	53
	Bibliography and References	54
6	Building Bridges to Science: Making Coastal Science Better Understood	55
6.1	Introduction	55
6.2	Development, Science and Public Understanding	55
6.3	Constraints on Public Understanding of Coastal Science	56
6.4	Making Coastal Science Better Understood	59
6.5	Accessing the Inaccessible	59
6.6	Providing the "Public Window to the Marine Environment"	60
