Contents

Introduction 1

1 Volterra's Dislocations in Elastic Body. Large Deformation 9
1.1 The Relations of Nonlinear Elasticity 9
1.2 Displacements in Elastic Body with Given Finite Strain Tensor . 14
1.3 Extension of Weingarten's Theorem to Large Deformation . . . 17
1.4 Multi-valued Displacements and Volterra Dislocations in Nonlinear Plane Elasticity 28
1.5 Total Burgers and Frank Vectors for a System of Isolated Defects. Density of Continuously Distributed Dislocations and Disclinations 35

2 Stressed State of Nonlinearly Elastic Bodies with Dislocations and Disclinations 41
2.1 Finding the Stressed State of Elastic Body with Given Characteristics of Isolated Defect; Set up of the Problem 41
2.2 Variational Formulation of the Problem of Volterra Dislocations in Nonlinear Elasticity 44
2.3 The Semi-inverse Method for Solving Quasi-static Problems of Nonlinear Mechanics of Solids 50
2.4 Combination of Screw Dislocation and Wedge Disclination in Nonlinear Elastic Cylinder 56

3 Exact Solutions Stressed to the Problems on Volterra Dislocations in Nonlinearly Elastic Bodies 65
3.1 The Wedge Disclination in Nonlinearly Elastic Body 65
3.2 The Stress Field due to Screw Dislocation in the Nonlinear Elastic Body 73
3.3 Solving the Wedge Disclination Problem with Use of the Compatibility Equations 79
3.4 Conjugate Solutions in Nonlinear Elasticity and Their Application to the Disclination Problem 83
3.5 The Edge Dislocation in a Nonlinearly Elastic Medium 88
3.6 A Cavitation near the Line of Dislocation or Disclination 98

digitalisiert durch DEUTSCHE NATIONAL BIBLIOTHEK

4 Isolated Defects in Nonlinearly Elastic Bodies with Couple Stresses . 103
4.1 General Relations in Nonlinear Theory of Asymmetric Elasticity 103
4.2 Weingarten's Theorem and Volterra Dislocations in Couple Stress Medium Undergoing Large Strains 108
4.3 Nonlinear Problems of Screw Dislocation and Wedge Disclination with Regard for Couple Stresses 112
4.4 Volterra Dislocations in Nonlinearly Elastic Bodies with Microstructure 118
4.5 Energy Integrals Characterizing the Force of Action on a Defect in Micropolar Media 125

5 Nonlinear Theory of Dislocations and Disclinations in Elastic Shells . 131
5.1 General Statements of Nonlinear Theory of Elastic Shells 131
5.2 Volterra Dislocations in Classical Nonlinear Theory of Elastic Shells 140
5.3 Isolated and Continuously Distributed Defects in Cosserat-type Shells 144
5.4 Invariant Contour Integrals in the Nonlinear Theory of Plates and Shells 154
5.5 The two Problems: a Wedge Disclination in a Shell of Revolution and a Screw Dislocation in a Cylindrical Shell 158
5.6 Equilibrium of a Membrane with Disclination 161

6 Stability of Equilibrium and Wave Propagation in Bodies with Inherent Stresses 167
6.1 The Linearized Equilibrium and Motion Equations for Elastic Bodies with Inherent Stresses 167
6.2 Stability of Elastic Cylinder with Disclination 170
6.3 The Effect of Screw Dislocation on the Stability and Wave Propagation in Elastic Cylinder 178
6.4 Buckling of Thin Elastic Plate with Disclination 188
