Adjustable Measures for the Safeguard of Monuments	1
<i>Ruggiero Jappelli</i>	
1 Monuments	2
2 The Structure-Foundation-Ground (SFG) System	3
3 The Peculiar Features	7
4 The Uncertainties	8
5 The Adjustable Remedies	11
6 The Categories of Knowledge	14
6.1 Known Knowns (KK): Objective Knowledge	15
6.2 Known Unknowns (KU): Aware Ignorance	16
6.3 Unknown Knowns (UK): Unaware Ignorance	16
6.4 Unknown Unknowns (UU): General Obscurity	16
7 The Strategies	18
7.1 Respect ! (Keep Out)	18
7.2 Tolerate ! (Accept)	21
7.3 Wait ! (Postpone)	24
7.4 Freeze ! (Secure)	27
7.5 Mitigate ! (Attenuate)	29
7.6 Improve (SFG) !	33
7.7 Compensate ! (Correct)	36
7.8 Transfer ! (Reallocate)	39
7.9 Abandon ! (Dismiss)	41
7.10 The Complex Situations	43
8 The Observational Approach	51
9 Concluding Remarks	53
References	55

Statics of Bodies Made of a Compressively Rigid No Tension Material	61
<i>Mario Como</i>	
1 Introduction	61
2 The Masonry Body	64
2.1 Admissible Stresses	64
2.2 Admissible Fractures and Strains	65
2.3 The Boundary of the Fractured Body	66
2.4 Stress–Strain Inequalities	67
3 Admissible Equilibrium States	69
3.1 The Formulation of the Principle of Virtual Work for Masonry Bodies	69
3.2 The Variational Inequality for the Existence of the AE State	73
3.3 No Existence of Self Stresses	75
3.4 Indeformable Structures	75
4 The Mechanism State	76
5 Admissible and Safe Stress Fields	77
6 Collapse	77
7 Impossibility of Collapse as a Consequence of Movements of the External Constraints	77
References	78
Stress State for Heavy Masonry Panels with Openings	79
