Preface	V
Index of Authors	XIII
List of Companies	XV

1	Introduction	
	Dynamics in the Business with Taste (<i>H. Ziegler</i>)	1
2	Manufacturing Processes	
2.1	Physical Processes	7
2.1.1	Extraction (<i>M. Ziegler, E. Ziegler</i>)	9
2.1.1.1	Introduction	9
2.1.1.2	Solid-Liquid Extraction	9
2.1.1.3	Liquid-Liquid Extraction	16
2.1.2	Supercritical Fluid Extraction (SFE) (<i>K.-W. Quirin, D. Gerard</i>)	38
2.1.2.1	Solvent Evaluation	38
2.1.2.2	Characterisation of CO ₂ -Extracts	41
2.1.2.3	Extraction Process	46
2.1.2.4	General Applications	50
2.1.2.5	Conclusion	51
2.1.2.6	Appendix: Application Samples	52
2.1.3	Distillation (<i>E. Ziegler, M. Ziegler</i>)	59
2.1.3.1	Introduction	59
2.1.3.2	Fundamental Considerations	59
2.1.3.3	Thermodynamic Fundamentals of Mixtures	64
2.1.3.4	Equipment	77
2.1.3.5	Selection of Companies Providing Equipment for Distillation	86
2.1.4	Spray Drying of Flavourings (<i>A. Nielsen, J.L. Getler</i>)	88
2.1.4.1	Introduction	88
2.1.4.2	Principle of Single-stage Spray Drying	89
2.1.4.3	Atomization	90
2.1.4.4	Spray Bed Drying	92
2.1.4.5	Environmental Considerations	93
2.1.4.6	Safety	94
2.1.4.7	Spray Drying of Flavourings	95
2.1.5	Freeze Drying (<i>K.H. Deicke</i>)	97
2.1.5.1	General Remarks on Drying	97
2.1.5.2	The Freeze Drying Process	98
2.1.5.3	The Quality of Freeze-dried Products	100
2.2	Biotechnological Processes (<i>J. Tretzel</i>)	108
2.2.1	Introduction	108
2.2.2	Flavour Generation by Fermentation of Food Raw Materials	109
2.2.3	Flavour Generation in Bioreactors	111
2.2.4	Surface Fermentation	112

2.2.5	Submerged Fermentation	112
2.2.6	Downstream Processing	114
2.2.7	Enzyme Reactors	114
2.2.8	Cell Culture Reactors	116
2.2.9	Genetic Engineering	118
3	Raw Materials for Flavourings	123
3.1	Introduction (<i>G. Matheis</i>)	125
3.2	Flavouring Ingredients	127
3.2.1	Chemically Defined Flavouring Substances	128
3.2.1.1	Natural Flavouring Substances	128
3.2.1.2	Nature-identical and Artificial Flavouring Substances (<i>U.-J. Salzer</i>) .	143
3.2.2	Flavouring Preparations and Some Source Materials	146
3.2.2.1	Fruit Juices and Fruit Juice Concentrates (<i>M. Simon</i>)	146
3.2.2.2	Citrus Oils (<i>H. Ziegler</i>)	165
3.2.2.3	Herbs, Spices and Essential Oils (<i>C. Karl</i>)	184
3.2.2.4	Flavouring Preparations Based on Biotechnology (<i>J. Tretzel</i>)	219
3.2.3	Process Flavourings <i>H. Weenen, J.F.M. de Rooij</i>)	233
3.2.3.1	Introduction	233
3.2.3.2	Processed Foods	233
3.2.3.3	Off-flavours in Processed Foods	238
3.2.3.4	The Maillard Reaction	238
3.2.3.5	Peptides, Proteins, Polysaccharides as Flavour Precursors	249
3.2.3.6	Thiamine Breakdown	250
3.2.3.7	Other Precursors of Thermally Generated Flavours	250
3.2.3.8	Industrial Preparation of Process Flavours	251
3.2.3.9	Mechanistic Studies	251
3.2.3.10	Inhibition	252
3.2.3.11	Nutritional and Toxicological Aspects	252
3.2.3.12	Microwave Heating	253
3.2.3.13	Future Challenges	253
3.2.4	Smoke Flavourings	259
3.2.4.1	Nature, Preparation and Application (<i>G. Underwood, J. Shoop</i>) .	259
3.2.4.2	Situation in Europe (<i>U.-J. Salzer</i>)	269
3.3	Non-flavouring Ingredients	274
3.3.1	Extraction Solvents (<i>H.D. Preston</i>)	274
3.3.2	Permitted Carriers and Carrier Solvents	276
3.3.3	Emulsifiers – Stabilisers – Enzymes (<i>W.J.N. Marsden</i>)	281
3.3.3.1	Emulsifiers	281
3.3.3.2	Stabilisers	289
3.3.3.3	Enzymes	293
3.3.4	Flavour Modifiers (<i>G. Matheis</i>)	310
3.3.4.1	Definition and Classification	310
3.3.4.2	Monosodium Glutamate, Purine 5'-Ribonucleotides, and Related Substances	311
3.3.4.3	Maltol and Ethyl Maltol	319

3.3.4.4	Furanones and Cyclopentenolones	322
3.3.4.5	Vanillin and Ethyl Vanillin	324
3.3.4.6	Other Flavour Modifiers	325
3.3.4.7	Final Remarks	326
3.3.5.1	Antioxidants (<i>D. Gerard, K.-W. Quirin</i>)	328
3.3.5.2	Preservatives (<i>H.D. Preston</i>)	333
4	Blended Flavourings (<i>W. Grab</i>)	347
4.1	Introduction	351
4.1.1	Flavour Analysis	351
4.1.2	Flavour Profiles	351
4.1.3	Flavouring Raw Materials	353
4.1.4	Flavouring Composition	354
4.1.5	Application of Flavourings	355
4.1.6	Flavouring Production	356
4.1.7	Flavouring Stability	360
4.2	Fruit Flavours	362
4.2.1	The Flavour of Natural Fruits	363
4.2.2	World of Commercially Important Fruit Flavours	364
4.2.3	Sensorially Interesting Fruit Flavours	370
4.3	Other Blended Flavourings	377
4.3.1	Processed Flavourings	377
4.3.2	Fermented Flavourings	380
4.3.2.1	Alcoholic Flavourings	380
4.3.2.2	Dairy Flavourings	381
4.3.3	Vegetable Flavourings	382
4.3.4	Vanilla Flavourings	383
4.3.5	Fantasy Flavourings	384
5	Applications	387
5.1	Introduction (<i>G. Matheis</i>)	389
5.1.1	Flavour Binding and Release	389
5.1.2	Interactions with Carbohydrates	390
5.1.3	Interactions with Proteins	397
5.1.4	Interactions with Free Amino Acids	401
5.1.5	Interactions with Lipids	401
5.1.6	Interactions with Inorganic Salts, Fruit Acids, Purine Alkaloids, Phenolic Compounds and Ethanol	406
5.1.7	Interactions with Fat Replacers	407
5.1.8	Interactions with Complex Systems and with Foodstuffs	411
5.1.9	Conclusion	414
5.2	Flavourings for Beverages	418
5.2.1	Soft Drinks (<i>H. Krug</i>)	418
5.2.1.1	Introduction	418
5.2.1.2	Ingredients for Soft Drinks	419
5.2.1.3	Production of Beverage Compounds/Bases	426

5.2.1.4	Types of Compounds	429
5.2.2	Alcoholic Beverages (<i>G. Zach</i>)	433
5.2.2.1	Introduction	433
5.2.2.2	Distilled Spirits	433
5.2.2.3	Liqueurs	439
5.2.2.4	Wine	446
5.2.2.5	Beer and Beer-like Beverages	449
5.2.2.6	Wine, Malt, Spirit Coolers	454
5.2.2.7	Production of Flavours for Alcoholic Beverages	454
5.3	Flavourings for Confectioneries, Baked Goods, Ice-cream and Dairy Products.	458
5.3.1	Flavourings for Confectioneries (<i>J.-P. Miedema, J. Brazsák</i>)	458
5.3.1.1	Introduction	458
5.3.1.2	High Boilings	459
5.3.1.3	Fondants	461
5.3.1.4	Jellies and Gums	463
5.3.1.5	Caramel and Toffee	464
5.3.1.6	Chewing Gum	466
5.3.1.7	Compressed Tablets	468
5.3.1.8	Panned Work	469
5.3.1.9	Chocolate and Cocoa Products	470
5.3.2	Flavourings for Baked Goods (<i>J.-P. Miedema, B. Ludwig</i>)	475
5.3.2.1	Introduction	475
5.3.2.2	What are Fine Bakery Products and what is a Dough?	475
5.3.2.3	Flavourings for Fine Bakery Products	476
5.3.3	Flavourings for Ice-cream (<i>J.-P. Miedema, J. Brand</i>)	479
5.3.3.1	Introduction	479
5.3.3.2	Classification	479
5.3.3.3	Ingredients	479
5.3.3.4	Flavourings	480
5.3.3.5	The Influence of Other Ingredients on the Ice-cream	481
5.3.3.6	Sensory Aspect of Ice-cream	482
5.3.3.7	The Production of Ice-cream	482
5.3.4	Flavourings for Dairy Products and Desserts (<i>J.-P. Miedema, E. Schildknecht</i>)	485
5.3.4.1	Introduction	485
5.3.4.2	Production of Flavoured Dairy Products	485
5.3.4.3	Flavouring Components for Dairy Products	489
5.4	Flavouring of Bouillons, Soups and Sauces (<i>H. Olsman, S.C.E. Romkes</i>)	492
5.4.1	Introduction	492
5.4.2	Flavouring of Bouillons and Soups	494
5.4.2.1	History and Market	494
5.4.2.2	The Need for Extrinsic Flavourings	495
5.4.2.3	Flavouring of Bouillons and Soups	496
5.4.3.1	Dry Soups	502

5.4.3.2	Wet Soups	503
5.4.4	Sauces	505
5.4.4.1	Introduction	505
5.4.4.2	Wet Sauces	506
5.4.4.3	Dry Sauces	507
5.4.5	Other Meal Components (Meat, Potato, Noodles)	509
6	Quality Control	511
6.1	Sensory Analysis in Quality Control (<i>H. Grüb</i>)	513
6.1.1	Introduction	513
6.1.2	“Sensory”	513
6.1.3	The Senses	514
6.1.4	Man as a Measuring Instrument	517
6.1.5	Sensory Quality Measuring Methods	518
6.2	Analytical Methods	525
6.2.1	General Methods (<i>D.A. Müller</i>)	525
6.2.1.1	Introduction	525
6.2.1.2	Determination of Colouring Principles by UV/VIS-Spectroscopy	525
6.2.1.3	Determination of Heavy Metal Contamination	525
6.2.1.4	Modern Chromatographic Techniques	527
6.2.2	Stable Isotope Ratio Analysis (<i>H.-L. Schmidt, A. Rossmann, R.A. Werner</i>)	539
6.2.2.1	Correlations between (Bio-)Synthesis and Isotope Content or Pattern of Organic Compounds	541
6.2.2.2	Methods for the Determination of Global Isotope Abundances in Organic Compounds	544
6.2.2.3	Intermolecular, Site-Specific and Positional Isotope Analysis	549
6.2.2.4	Results of Stable Isotope Measurements in Authenticity Checks and in the Verification of the Natural Origin of Flavouring Compounds	556
6.2.2.5	Perspectives and Future Aspects	580
6.2.3	Enantioselective Analysis (<i>A. Mosandl</i>)	595
6.2.3.1	Chiral Resolution and Chromatographic Behaviour of Enantiomers	595
6.2.3.2	Sample Clean-up	596
6.2.3.3	Detection Systems	598
6.2.3.4	Stereodifferentiation and Quantification	599
6.2.3.5	Limitations	601
6.2.3.6	Analysis of Individual Classes of Compounds	601
6.2.3.7	Special Measurements	622
6.3	Microbiological Testing (<i>H.-J. Lögtenbörger</i>)	634
7	Legislation / Toxicology (<i>U.-J. Salzer, K. Jones</i>)	643
7.1	Introduction / Definitions	645
7.2	Toxicological Considerations	648
7.3	FAO / WHO and Council of Europe	651
7.4	European Union	652

7.4.1	General	652
7.4.2	Flavour Legislation	653
7.4.3	Food Additive Legislation	656
7.4.4	Other Rules Concerning Flavourings	657
7.5	America	659
7.5.1	Introduction	659
7.5.2	The NAFTA Countries	660
7.5.3	South American Countries	667
7.6	Asia	672
7.6.1	General	672
7.6.2	The "Middle East"	672
7.6.3	The "Far East"	673
7.7	South Africa and Australia	688
7.8	Religious Dietary Rules	690
7.8.1	Introduction	690
7.8.2	"Kosher"	690
7.8.3	"Halal"	693
7.8.4	Comparison of Kosher and Halal Requirements	694
Subject Index		699
