Foreword VII

Preface XIX

Acknowledgments XXI

About The Editor XXIII

List of Contributors XXV

1	Basics of Corrosion Chemistry	1
	<i>Norio Sato</i>	
1.1	Introduction	1
1.2	Metallic Corrosion	1
1.2.1	Basic Processes	1
1.2.2	Potential-pH Diagram	2
1.2.3	Corrosion Potential	3
1.2.4	Anodic Metal Dissolution	4
1.2.5	Cathodic Oxidant Reduction	6
1.3	Metallic Passivity	7
1.3.1	Passivity of Metals	7
1.3.2	Passivation of Metals	9
1.3.3	Passive Films	11
1.3.4	Chloride-Breakdown of Passive Films	12
1.4	Localized Corrosion	13
1.4.1	Pitting Corrosion	13
1.4.2	Crevice Corrosion	16
1.4.3	Potential-Dimension Diagram	18
1.5	Corrosion Rust	19
1.5.1	Rust in Corrosion	19
1.5.2	Ion-Selective Rust	20
1.5.3	Electron-Selective Rust	22
1.5.4	Redox Rust	24
1.6	Atmospheric Corrosion	24
1.6.1	Atmospheric Corrosion Chemistry	24
1.6.2	Weathering Steel Corrosion	26
1.6.3	Anticorrosion Rust	28

1.7	Concluding Remarks	29
	References	29
2	Corrosion and Electrochemistry	33
	<i>Vedula Sankar Sastri</i>	
2.1	Introduction	33
2.2	Thermodynamics and the Stability of Metals	40
2.3	Free Energy and Electrode Potential	41
2.4	Electrode Potential Measurements	44
2.5	Equilibrium Electrode Potentials	45
2.6	Use of Pourbaix Diagrams	49
2.7	Dynamic Electrochemical Processes	49
2.8	Concentration Polarization	61
	References	69
	Further Reading	69
3	Application of Microelectrochemical Techniques in Corrosion Research	71
	<i>Y. Frank Cheng</i>	
3.1	Introduction	71
3.2	Scanning Vibrating Electrode Technique	72
3.2.1	The Technique and Principle	72
3.2.2	Local Dissolution Behavior of the Welding Zone of Pipeline Steel	73
3.2.3	Effects of Mill Scale and Corrosion Product Deposit on Corrosion of the Steel	79
3.3	Localized Electrochemical Impedance Spectroscopy	81
3.3.1	The Technique and Principle	81
3.3.2	Corrosion of Steel at the Base of the Coating Defect	82
3.3.3	Microscopic Metallurgical Electrochemistry of Pipeline Steels	86
3.3.4	Characterization of Local Electrochemical Activity of a Precracked Steel Specimen	88
3.4	Scanning Kelvin Probe	89
3.4.1	The Technique and Principle	89
3.4.2	Monitoring the Coating Disbondment	91
3.5	Conclusive Remarks	94
	Acknowledgments	95
	References	95
4	Protective Coatings: an Overview	97
	<i>Anand Sawroop Khanna</i>	
4.1	Introduction	97
4.2	Selection of Paint Coatings	97
4.3	Classification of Various Coatings	98

4.4	Chemistry of Resins	99
4.4.1	Alkyd Resins	99
4.4.2	Modified Alkyds	101
4.4.3	Epoxies	101
4.4.4	Urethanes	105
4.4.5	Isocyanates	106
4.4.6	Aliphatic Isocyanates	106
4.4.7	Polyols	107
4.4.8	Acrylic Urethanes	107
4.4.9	Moisture-Cured Polyurethanes	107
4.4.10	Zinc-Based Coatings	108
4.5	High-Performance Coatings	109
4.5.1	The 100% Solventless Epoxies	110
4.5.2	Concept of Underwater Coatings	111
4.5.3	Polyvinylidenedifluoride Coatings	113
4.5.4	Polysiloxane Coatings	114
4.5.5	Fire-Resistant Coatings	119
4.5.6	Organic–Inorganic Hybrid (OIH) Waterborne Coatings	119
4.6	Surface Preparation	121
4.7	Paint Application	121
4.8	Importance of Supervision, Inspection, and Quality Control during Paint Coatings	122
4.9	Training and Certification Courses	123
4.10	Summary	123
	References	123
5	New Era of Eco-Friendly Corrosion Inhibitors	125
	<i>Niketan Patel and Girish Mehta</i>	
5.1	Introduction	125
5.2	Anodic (Passivating or Film-Forming) Inhibitors	126
5.2.1	Mechanism	127
5.2.1.1	Generalized Film Theory	127
5.2.1.2	Adsorption Theory	127
5.3	Cathodic (Adsorption-Type) Inhibitors	129
5.3.1	Mechanism	129
5.4	Mixed Inhibitors	130
5.5	Precipitation Inhibitors	131
5.6	Vapor Phase Inhibitors	131
5.7	Toxicity of Inhibitors	139
5.7.1	Irritants	140
5.7.2	Asphyxiants	141
5.7.3	Anesthetics and Narcotics	141
5.7.4	Systemic Poisons	141
5.7.5	Sensitizers	142
5.7.6	Carcinogens	142

5.7.7	Mutagens	142
5.7.8	Teratogens	142
	References	148

6 Green Corrosion Inhibitors: Status in Developing Countries 157

Sanjay K. Sharma and Alka Sharma

6.1	Introduction	157
6.2	Protection against Corrosion	160
6.3	Inhibitors	162
6.3.1	Mechanism of Inhibition	162
6.3.2	Choice of Inhibitors	163
6.4	Natural Products as Green Corrosion Inhibitors	166
6.5	Green Corrosion Inhibition: Research and Progress	169
6.5.1	The Proposed Mechanism for the Inhibitory Behavior of the Extracts	170
6.6	Green Corrosion Inhibition in Developing Countries	173
6.6.1	Usage of Metals and Present Corrosion Management: Practice and Prevention	173
6.6.2	Summary of Researchers' Work to Develop Green Inhibition Science	174
	Acknowledgments	176
	References	176

7 Innovative Silanes-Based Pretreatment to Improve the Adhesion of Organic Coatings 181

Michele Fedel, Flavio Deflorian, and Stefano Rossi

7.1	Introduction	181
7.2	Hybrid Silane Sol–Gel Coatings	182
7.2.1	Basic Chemistry of the Silicon Alkoxides and Organofunctional Silicon Alkoxides	183
7.2.2	Dip Coating	192
7.2.3	Interaction between Silicon Alkoxides and Metallic Substrates	194
7.2.4	Interaction between Silicon Alkoxides and an Organic Polymeric Material	199
7.3	Corrosion Protection by Sol–Gel Coatings	202
7.3.1	Corrosion Protection Properties of Organofunctional Sol–Gel Coatings	202
7.3.2	Experimental Methods of Investigation of the Properties of the Silicon Alkoxide Sol–Gel Coatings as Coupling Agents	203
7.3.3	Practical Examples of Corrosion Protection by Silicon-Based Sol–Gel Coatings	204
	References	207

8	Corrosion of Austenitic Stainless Steels and Nickel-Base Alloys in Supercritical Water and Novel Control Methods	211
	<i>Lizhen Tan, Todd R. Allen, and Ying Yang</i>	
8.1	Introduction	211
8.1.1	Supercritical Water and Its Applications	211
8.1.2	Austenitic Stainless Steels and Ni-Base Alloys and Their General Corrosion Behavior	214
8.1.2.1	Austenitic Stainless Steels and Ni-Base Alloys	214
8.1.2.2	General Corrosion Behavior	215
8.2	Thermodynamics of Alloy Oxidation	216
8.3	Corrosion of Austenitic Stainless Steels and Ni-Base Alloys in SCW	220
8.3.1	Weight Change	221
8.3.2	Surface Morphology	223
8.3.3	Oxide Layer Structure	225
8.4	Novel Corrosion Control Methods	227
8.4.1	Microstructural Optimization	227
8.4.2	Grain Size Refinement	231
8.4.3	Performance Comparison of the Corrosion Control Methods	233
8.5	Factors Influencing Corrosion	234
8.5.1	Test Conditions	234
8.5.2	Effect of Thermodynamics and Kinetics	235
8.5.3	Effect of Microstructure	236
8.5.4	Effect of Grain Size	237
8.6	Summary	239
	References	240
9	Metal–Phosphonate Anticorrosion Coatings	243
	<i>Konstantinos D. Demadis, Maria Papadaki, and Dimitrios Varouchas</i>	
9.1	Introduction	243
9.2	The Scope of Green Chemistry and Corrosion Control	245
9.3	Metal–Phosphonate Materials: Structural Chemistry	247
9.3.1	Phosphonobutane-1,2,4-Tricarboxylic Acid (PBTC)	247
9.3.2	Ethylenediamine-Tetrakis(Methylenephosphonic Acid) (EDTMP)	249
9.3.3	Dimethylaminomethylene-Bis(Phosphonic Acid) (DMABP)	249
9.3.4	Magnesium (or Zinc)-(Amino-Tris-(Methylenephosphonate)), Mg(or Zn)-AMP	251
9.3.5	Calcium-(Amino-Tris-(Methylenephosphonate)), Ca-AMP	252
9.3.6	Strontium-(Amino-Tris-(Methylenephosphonate)), Sr-AMP	253
9.3.7	Barium-(Amino-Tris-(Methylenephosphonate)), Ba-AMP	255
9.3.8	Zinc-Hexamethylene-Diamine-Tetrakis(Methylenephosphonate), Zn-HDTMP	255
9.3.9	Strontium or Barium-Hexamethylene-Diamine-Tetrakis(Methylenephosphonate), Sr or Ba-HDTMP	257

9.3.10	Zinc-Tetramethylene-Diamine-Tetrakis(Methylenephosphonate), Zn-TDTMP	259
9.3.11	Strontium and Calcium-Ethylene-Diamine-Tetrakis(Methylene Phosphonate), Sr-EDTMP and Ca-EDTMP	259
9.3.12	Barium-Phosphonomethylene-Imino-Diacetate, Ba-PMIDA	260
9.3.13	Tetrasodium-Hydroxyethyl-Amino-Bis(Methylenephosphonate), Na4-HEABMP	260
9.3.14	Calcium-Phosphonobutane-1,2,4-Tricarboxylate, Ca-PBTC	263
9.3.15	Calcium-Hexamethylene-Diamine-Tetrakis(Methylenephosphonate), Ca-HDTMP	264
9.3.16	Calcium-Hydroxyphosphonoacetate, Ca-HPAA	264
9.3.17	Strontium and Barium-Hydroxyphosphonoacetate, Sr and Ba-HPAA	267
9.3.17.1	Sr[(HPAA)(H ₂ O) ₃].H ₂ O	267
9.3.17.2	M(HPAA)(H ₂ O) ₂ (M = Sr, Ba)	268
9.3.18	Calcium-Phosphonomethylene-Imino-Diacetate, Ca-PMIDA	269
9.4	Metal-Phosphonate Anticorrosion Coatings	269
9.5	A Look at Corrosion Inhibition by Metal-Phosphonates at the Molecular Level	276
9.5.1	Anticorrosion Coatings by the Material {Zn(AMP).3H ₂ O} _n	276
9.5.2	Anticorrosion Coatings by the Material {Zn(HDTMP).H ₂ O} _n	278
9.5.3	Anticorrosion Coatings by the Material {Ca(PBTC)(H ₂ O) ₂ .2H ₂ O} _n	278
9.5.4	Anticorrosion Coatings by the Material Ca ₃ (HPAA) ₂ (H ₂ O) ₁₄	279
9.5.5	Anticorrosion Coatings by the Materials {M(HPAA)(H ₂ O) ₂ } _n (M = Sr, Ba)	281
9.5.6	Anticorrosion Coatings by the Materials {M(PMIDA)} _n (M = Ca, Sr, Ba)	282
9.5.7	A Comparative Look at the Inhibitory Performance by Metal-Phosphonate Protective Films	285
9.6	Conclusions/Perspectives	287
	References	287
10	Metal-Matrix Nanocomposite Coatings Produced by Electrodeposition	297
	<i>Caterina Zanella, Stefano Rossi, and Flavio Deflorian</i>	
10.1	Introduction	297
10.2	Electrodeposition of Composite Coatings—Theoretical Remarks	298
10.2.1	Suspension of Solid Particles in Electrolytes	298
10.2.2	Mechanism of Codeposition	299
10.2.3	Process Parameters Influencing the Incorporation	302
10.3	Electrodeposition of Composite Coatings	305
10.4	New Insight in the Electrodeposition of Composite Coatings	313

10.4.1	Ultrasonic Vibrations	313
10.4.2	Magnetic Field	314
	References	315
11	Adsorption Studies, Modeling, and Use of Green Inhibitors in Corrosion Inhibition: an Overview of Recent Research	319
	<i>Sanjay K. Sharma, Ackmez Mudhoo, and Essam Khamis</i>	
11.1	Introduction	319
11.2	Adsorption Mechanisms in Corrosion Inhibition	321
11.3	Hybrid Coatings	323
11.4	Modeling Aspects	326
11.5	Green Inhibitors	328
11.5.1	Natural Derivatives as Green Inhibitors	328
11.5.2	Research Orientations	329
11.5.2.1	Organic-Based Green Inhibitors	329
11.5.2.2	Amino Acids–Based Green Inhibitors	330
11.5.2.3	Plant Extracts–Based Green Inhibitors	330
11.5.2.4	Rare Earth Elements–Based Green Inhibitors	333
11.6	Conclusions	334
	Acknowledgments	335
	References	335
12	Indian Initiatives for Corrosion Protection	339
	<i>Anand Sawroop Khanna</i>	
12.1	Introduction	339
12.2	Scenario of the Indian Industry	342
12.3	Corrosion Protection Scenario in India	343
12.4	Corrosion Education	345
12.4.1	Why Corrosion Education Is the Need of the Hour?	345
12.4.2	Pioneers of Corrosion Education in India	346
12.4.3	Corrosion Science and Engineering, IIT Bombay	346
12.4.4	The Central Electrochemical Research Institute (CECRI)	347
12.4.5	NACE India Section	347
12.4.6	The Society for Surface Protective Coatings India	347
12.4.7	The National Corrosion Council of India (NCCI)	348
12.5	An Overview of Highly Corrosion-Prone Industries in India	348
12.5.1	Oil and Gas Industry	348
12.5.2	Process Chemical and Petrochemical Industry	349
12.5.3	Pulp and Paper Industry	350
12.5.4	Power Plants	351
12.6	Conclusions	352
12.7	Recommendations	352
12.7.1	For Government or Relevant Ministry Responsible for Controlling Industrial Discipline	352
12.7.2	For Academic Institutes and Research Organizations	353

12.7.3	Roles and Responsibilities of the Industry	353
	References	353
	Further Reading	354
13	Protective Coatings: Novel Nanohybrid Coatings for Corrosion and Fouling Prevention	355
	<i>S. Anandakumar and R. Savitha</i>	
13.1	Introduction	355
13.2	Background	356
13.3	Fouling	356
13.4	Marine Fouling	357
13.4.1	Stages of Marine Fouling	357
13.4.2	Consequences of Marine Fouling	357
13.4.3	Methods Used for Fouling Prevention	357
13.4.3.1	Antifouling Paints	358
13.5	Corrosion	359
13.5.1	Consequences of Corrosion	359
13.5.2	Methods Used for the Prevention of Corrosion	359
13.5.3	Characteristics of a Good Coating	359
13.5.4	Evaluation of Corrosion Resistance of Coatings	360
13.5.5	Electrochemical Impedance Studies (EISs)	360
13.6	Epoxy Resin Coatings	360
13.6.1	Advantages of Epoxy Resin	361
13.6.2	Disadvantages of Epoxy Resin	361
13.6.3	Justification	362
13.6.4	Need for Nanotechnology	362
13.6.5	Polymer Nanomaterials	363
13.6.6	Different Types of Nanoparticles	363
13.6.7	Polyhedral Oligomeric Silsesquioxanes (POSSs)	364
13.6.8	Need for Nanocontainer (Nanozeolite)	364
13.6.9	Self-Repairing Multifunctional Coatings	366
13.6.9.1	Fabrication of Nanocontainers	366
13.6.9.2	Biocide Release Mechanism from Nanocontainer	366
13.6.9.3	Selection of Natural Products as Biocides	367
13.7	Scope and Objectives	368
13.8	Experimental: Synthesis and Structural Characterization of the Nanohybrid Coatings	368
13.8.1	Materials	368
13.8.2	Surface Preparation of the Mild Steel Specimens	369
13.8.3	Synthesis of Phosphorus-Containing Polyurethane Epoxy Resin	369
13.8.4	Synthesis of Amine-Functionalized POSS (POSS-NH ₂)	369
13.8.5	Preparation of Biocides	370
13.8.6	Loading of Biocides	370
13.8.7	Preparation of Tris(<i>p</i> -Isocyanatophenyl)-Thiophosphate-Modified Epoxy Nanocoatings	371

13.8.8	Test Methods	371
13.9	Results and Discussion	373
13.9.1	Structural Characterization of Tris(<i>p</i> -Isocyanatophenyl)-Thiophosphate-Modified Epoxy Resin	373
13.9.2	Structural Characterization of MCM-41	375
13.9.3	Composition of Natural Products	378
13.9.3.1	M. champaca	378
13.9.3.2	Neem Oil	379
13.9.4	Confirmation of Loading of Biocide	379
13.9.5	Evaluation of Corrosion Resistance by EIS	381
13.9.6	Colorimetric and Gravimetric Analyses	383
13.9.6.1	pH Analysis	385
13.9.6.2	Salt Spray Test Results	386
13.9.6.3	Seawater Immersion Test	386
13.9.6.4	Antifouling Studies by Scanning Electron Microscopy (SEM)	389
13.10	Summary and Conclusion	389
	Acknowledgment	390
