### Session I

#### “Theoretical Frameworks in Few-Body Physics”

Chairman: *E. Schmid*

|                                                                                                                          |    |
|--------------------------------------------------------------------------------------------------------------------------|----|
| <i>J. J. de Swart, T. A. Rijken, J. R. M. Bergervoet, P. C. M. van Campen, W. M. G. Derks, and W. A. M. v. d. Sanden</i> |    |
| The Nucleon-Nucleon Interaction . . . . .                                                                                | 1  |
| <i>P. U. Sauer</i>                                                                                                       |    |
| Nucleon-Nucleon Interaction Above Pion Threshold . . . . .                                                               | 13 |
| <i>R. Vinh Mau</i>                                                                                                       |    |
| Skyrme Solitons, Effective Lagrangians, and Static Properties of Baryons . . . . .                                       | 23 |
| <i>H. Walliser</i>                                                                                                       |    |
| Resonating-Group Method and Pauli Repulsion of Clusters . . . . .                                                        | 32 |

Chairman: *J. L. Friar*

|                                                                     |    |
|---------------------------------------------------------------------|----|
| <i>S. A. Coon</i>                                                   |    |
| Meson-Theoretical Models of Three-Nucleon Forces . . . . .          | 41 |
| <i>G. L. Payne</i>                                                  |    |
| Faddeev Equations for Bound and Scattering States . . . . .         | 53 |
| <i>W. Sandhas</i>                                                   |    |
| Integral-Equation Approach to Few-Body Collision Problems . . . . . | 64 |

Chairman: *W. Plessas*

|                                                                 |    |
|-----------------------------------------------------------------|----|
| <i>E. O. Alt</i>                                                |    |
| Coulomb Effects on Few-Body Scattering States . . . . .         | 79 |
| <i>M. Fabre de la Ripelle</i>                                   |    |
| Recent Developments in Hyperspherical Harmonic Method . . . . . | 88 |

## Panel Session

## “Reports on Progress in Realistic Calculations for Three- and Four-Nucleon Systems”

Chairman: *S. Rosati*Discussion leader: *P. U. Sauer**J. L. Friar*

Three-Body Calculations at Los Alamos . . . . . 94

*T. Sasakawa*

Few-Body Calculations at Sendai . . . . . 104

*A. Bömelburg*

High-Order Perturbation Theory with Three-Body Forces in the Faddeev Scheme . . . . . 114

*Y. Akaishi*

Few-Body Calculations at Sapporo . . . . . 120

*R. B. Wiringa*

Variational Monte Carlo Calculations of Few-Body Nuclei . . . . . 130

*J. L. Ballot*

Hyperspherical Calculations for Four-Nucleon Systems . . . . . 140

*P. U. Sauer*

Discussion on Realistic Calculations for Three- and Four-Nucleon Systems . . . . . 152

## Session II

## “Nucleon-Deuteron Scattering”

Chairman: *W. Sandhas**I. Šlaus*

The Nucleon-Deuteron Interaction . . . . . 160

*W. Plessas, J. Haidenbauer, and Y. Koike*

Predictions of Meson-Theoretical Nucleon-Nucleon Interactions for Nucleon-Deuteron Scattering Observables . . . . . 172

*G. H. Berthold, A. Stadler, and H. Zankel*

Coulomb-Modified Faddeev Calculations of Low-Energy p-d Observables . . . . . 182

## Session III

## “Few-Body Clusters and Reactions”

Chairman: *G. Pisent**G. Cattapan, G. Pisent, and L. Canton*

An Algebraic Approach to Multichannel Scattering by Negative-Energy Weinberg States . . . . . 191

|                                                                                                                                                                                                           |     |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <i>S. Oryu, T. Nishino, and H. Kamada</i>                                                                                                                                                                 |     |
| Faddeev-Yakubovsky Calculation of 4-Alpha Particle System with Realistic Alpha-Alpha Interactions . . . . .                                                                                               | 198 |
| <i>P. Doleschall, C. Chandler, M. Bruno, F. Cannata, M. D'Agostino, and M. L. Fiandri</i>                                                                                                                 |     |
| Alpha-Deuteron Break-Up Calculations with Coulomb Interaction                                                                                                                                             | 206 |
| <i>M. Bruno, F. Cannata, M. D'Agostino, M. Frisoni, H. Herman, B. Vuaridel, V. König, W. Grüebler, K. Elsener, P. A. Schmelzbach, J. Ulbricht, Ch. Forstner, M. Bittcher, D. Singy, and H. M. Hofmann</i> |     |
| Symmetry Breaking in Nuclear Reactions: Asymmetry in $\alpha + d \rightarrow {}^3\text{He} + {}^3\text{H}$ . . . . .                                                                                      | 211 |
| <i>E. Cravo and A. C. Fonseca</i>                                                                                                                                                                         |     |
| Three-Body Calculation of ${}^9\text{Be}$ . . . . .                                                                                                                                                       | 221 |

Session IV  
"Polarization Effects"

Chairman: *S. Boffi*

|                                                                                                          |     |
|----------------------------------------------------------------------------------------------------------|-----|
| <i>H. Arenhövel and W. Leidemann</i>                                                                     |     |
| Polarization Effects in Photo- and Electrodissintegration of the Deuteron . . . . .                      | 224 |
| <i>H. R. Weller</i>                                                                                      |     |
| Polarized Radiative Capture Experiments and the D-State of ${}^4\text{He}$ and ${}^3\text{He}$ . . . . . | 238 |
| <i>M. Rosa-Clot</i>                                                                                      |     |
| The Two-Nucleon Ground State . . . . .                                                                   | 253 |

Session V  
"Final State Interaction, Meson-Exchange Currents, Scaling"

Chairman: *M. M. Giannini*

|                                                                                  |     |
|----------------------------------------------------------------------------------|-----|
| <i>E. Truhlik and J. Adam, Jr.</i>                                               |     |
| On the Theory of Exchange Currents . . . . .                                     | 261 |
| <i>J. M. Laget</i>                                                               |     |
| Photo- and Electrodissintegration of the Few-Body Systems . . . . .              | 271 |
| <i>C. Ciofi degli Atti, E. Pace, and G. Salmè</i>                                |     |
| $\gamma$ -Scaling . . . . .                                                      | 280 |
| <i>B. Goulard, T. Pochet, G. Cory-Goulard, and D. Hennequin</i>                  |     |
| Continuum Calculations . . . . .                                                 | 296 |
| <i>E. van Meijgaard and J. A. Tjon</i>                                           |     |
| Continuum-State Calculations for the Reaction ${}^3\text{He}(e, e'p)d$ . . . . . | 307 |

Panel Session  
 “Reports on Progress in Electron Scattering Experiments”

1. Latest Experimental Results

Chairman: *B. L. Berman*      Discussion leader: *B. Frois*

|                                                                                                                           |     |
|---------------------------------------------------------------------------------------------------------------------------|-----|
| <i>B. Frois</i>                                                                                                           |     |
| Electron Scattering and Few-Nucleon Systems . . . . .                                                                     | 312 |
| <i>S. Platchkov</i>                                                                                                       |     |
| Recent Studies of Two- and Three-Nucleon Elastic Form Factors                                                             | 318 |
| <i>W. Turchinets</i>                                                                                                      |     |
| Few-Body Studies at Bates: Recent Past and Near Future . . . . .                                                          | 326 |
| <i>R. G. Arnold</i>                                                                                                       |     |
| Proton and Deuteron Form Factors at Large-Momentum Transfer                                                               | 346 |
| <i>Z. E. Meziani</i>                                                                                                      |     |
| Electrodisintegration of Few-Body Systems at SLAC and the<br>y-Scaling Approach . . . . .                                 | 354 |
| <i>J. Morgenstern</i>                                                                                                     |     |
| High-Momentum Components and Many-Body Effects in<br>$^3\text{He}(e, e'p)$ and $^3\text{He}(e, e')$ Experiments . . . . . | 363 |
| <i>P. K. A. de Witt Huberts</i>                                                                                           |     |
| Electrodisintegration of $^3\text{He}$ Studied with the Proton Knockout<br>Reaction $(e, e'p)$ . . . . .                  | 373 |
| <i>S. d'Angelo, LADON Collaboration</i>                                                                                   |     |
| Photodisintegration of Light Nuclei with the LADON Photon<br>Beam . . . . .                                               | 383 |

2. Research Programs

Chairman: *J. Mougey*

|                                                                                                                                                                                                                                                                                                |     |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <i>C. de Vries</i>                                                                                                                                                                                                                                                                             |     |
| Future Experimental Developments for Few-Body Physics at<br>NIKHEF-K . . . . .                                                                                                                                                                                                                 | 392 |
| <i>R. Neuhausen</i>                                                                                                                                                                                                                                                                            |     |
| Future Experimental Developments for Few-Body Physics at<br>Mainz . . . . .                                                                                                                                                                                                                    | 405 |

*G. Anton*

Future Experimental Developments in Few-Body Physics at Bonn 424

Session VI

“Relativistic and Quark Effects”

Chairman: *D. Prosperi*

*F. Gross*

Relativistic Equations . . . . . 432

*J. A. Tjon*

Relativistic Calculations in Few-Body Systems . . . . . 444

*H. Garcilazo*

Relativistic Faddeev Calculations of  $\pi$ NN Systems . . . . . 456

Chairman: *F. Gross*

*C. W. Wong*

Quarks in Nucleons and Nuclei . . . . . 462

*C. E. Carlson*

The Nucleon Form Factor in QCD . . . . . 473

*B. L. G. Bakker*

The NN Interaction and the Structure of Few-Nucleon Systems  
Within QCB . . . . . 481

*A. S. Gorsky and M. V. Terentyev*

On Description of Nucleon and Pion Form Factors in Quantum  
Chromodynamics . . . . . 492

Session VII

“Hadronic Probes of Few-Nucleon Systems”

Chairman: *I. Šlaus*

*N. E. Davison*

Hadronic Probes of Few-Nucleon Systems . . . . . 501

*G. Backenstoss*

Pion Interaction with Few-Body Systems Experiments at SIN . . . 516

*G. Bendiscioli and A. Rotondi*

Antinucleon-Nucleus Experiments . . . . . 526

Session VIII

“Highlights of Recent Few-Body Conferences”

Chairman: *M. Fabre de la Ripelle*

*B. L. Berman*

Highlights of the International Symposium on the Three-Body  
Force in the Three-Nucleon System . . . . . 541

XVI

*T. Sasakawa*  
Highlights at Few Body XI ..... 558

Session IX  
“Future Experimental Developments”

Chairman: *C. de Vries*

*J. Mougey*  
The CEBAF Project and Its Few-Body Research Program ..... 571  
*C. Schaerf, LADON Collaboration*  
Monochromatic and Polarized Gamma Ray Beams for the Study  
of Few-Body Interactions ..... 586

Chairman: *G. Backenstoss*

*D. A. Hutcheon*  
The TRIUMF Kaon-Factory Proposal ..... 595  
*T. Bressani*  
The EHF Project and Its Research Program ..... 605  
List of Participants ..... 615  
Electronic Mail Directory ..... 626
