

Contents

Part I	Generalized Hydrodynamics and Mode Coupling Theories	
<hr/>		
Analysis of Neutron Scattering and Computer Simulation Studies on Noble-Gas Fluids		
By L.A. de Graaf (With 7 Figures)		2
A Liquid Metal as an Extensive Test Case of Static and Dynamic Properties		
By K.-E. Larsson, W. Gudowski, and M. Dzugutov (With 12 Figures) . .		13
The Transition from the Hydrodynamic Regime to the Kinetic Regime in Helium/Xenon Gas Mixtures as Measured by Light Scattering		
By G.H. Wegdam, A. Bot, and H.M. Schaink (With 3 Figures)		27
Transition to Hydrodynamic Behaviour and Mode Coupling Effects in Dense Hydrogen Gas		
By P. Verkerk, J. Westerweel, U. Bafle, I.M. de Schepper, and L.A. de Graaf (With 2 Figures)		31
Generalized Viscosity and Generalized Diffusion: MD and Neutron Scattering Data for Some Liquids		
By W. Gudowski, K.-E. Larsson, and M. Dzugutov (With 4 Figures) . . .		37
Hydrodynamic Mode Coupling in a Simple Liquid		
By C. Morkel, C. Gronemeyer, and W. Gläser (With 5 Figures)		41
<hr/>		
Part II	Theory of Liquids	
<hr/>		
The Statistical Mechanics of the Ionic Equilibrium of Water. IV. The Force Law		
By S. Bratos, B. Guillot, and Y. Guissani (With 1 Figure)		48
<hr/>		
Part III	Liquids at Surfaces	
<hr/>		
Liquid Surfaces and the Effect of Premelting		
By P. von Blanckenhagen and W. Schommers (With 5 Figures)		58

Monte Carlo Simulation of a Lennard-Jones Fluid near a Hard and a Soft Wall By G. Balabanić, B. Borštnik, R. Milčić, A. Rubčić, and F. Sokolić (With 8 Figures)	70
RISM Study of the Structure of Water at the Hydrophobic Wall By D. Janežič and B. Borštnik (With 3 Figures)	77
Molecular Dynamics of Wetting and Drying at Solid-Fluid Interfaces By M.J.P. Nijmeijer, C. Bruin, A.F. Bakker, and J.M.J. van Leeuwen (With 5 Figures)	81
Brillouin Scattering near a Solid-Liquid Interface By E.F. Gramsbergen and G.H. Wegdam (With 3 Figures)	85

Part IV	Supercooled Liquids and the Glass Transition
----------------	---

Liquid-Glass Transitions By A. Sjölander (With 4 Figures)	90
Scaling Behaviour of the Density Fluctuations near the Glass Transition: A Signature of Critical Instability By F. Mezei (With 5 Figures)	100
Structural Relaxation and Glass Transition of Binary Liquids By J. Bosse (With 2 Figures)	108
Structural Relaxation in Glass-Forming Liquids By M. Elmroth, L. Börjesson, and L.M. Torell (With 6 Figures)	118
Aspects of Atomic Dynamics in Liquid Rubidium Above and Below the Melting Temperature By T. Gaskell, U. Balucani, and R. Vallauri (With 5 Figures)	130
Dynamical Correlation Studies of Metal-like Systems in the Supercooled Phase by Computer Simulation By U. Balucani, R. Vallauri, and T. Gaskell (With 5 Figures)	138
Electrical Properties of Liquid Quenched Alloys By H. Leitz, P.-G. Häberle, C. Politis, and I. Wolf (With 6 Figures)	147
A Molecular Dynamics Study of the Liquid-Glass Transition in Lennard-Jonesium By M.J.D. Brakkee and S.W. de Leeuw (With 5 Figures)	154

Part V	Structure of Liquids, Effective Pair Potentials and Three-Body Forces
---------------	--

The Electronic Structure of Liquid Metals By J. Hafner, W. Jank, and M. Tegze (With 12 Figures)	160
--	-----

Charge Correlations in Molecular Fluids and Impurity Absorption Spectra By S. Baer (With 3 Figures)	175
Pair Potential in Liquid Bismuth from Structure Data By M. Dzugutov (With 3 Figures)	185
Extracting the Pair Correlation Function from Structure Factor Data by Monte Carlo Simulation By A.K. Soper (With 3 Figures)	189
Neutron Diffraction Study of Liquid Chlorine and Liquid Phosphorus Tribromide at 295 K By J.B. van Tricht (With 3 Figures)	195
Static Correlations in Rare Gases from Integral Equations for Realistic Model Interactions By S. Celi, L. Reatto, and M. Tau (With 2 Figures)	200
Three-Body Forces and Virial Expansions of $S(k)$ and $g(r)$ in Gaseous Kr By F. Barocchi and R. Magli (With 4 Figures)	205
Interaction-Induced Light Scattering in Dense Gaseous Krypton: Many- Body Effects By F. Barocchi, M. Celli, M. Zoppi, and U. Bafle (With 1 Figure)	211
<hr/>	
Part VI Summary	
<hr/>	
Summary of the Workshop on Static and Dynamic Properties of Liquids By U. Dahlborg and M. Davidović	218
Index of Contributors	225
