

Table of Contents

Introduction and Overview.....	iii
Acknowledgements.....	iv
List of Participants.....	v
Table of Contents.....	ix

I. INFRARED ASTRONOMY AT THE MAJOR "EUROPEAN" OBSERVATORIES

A.F.M. MOORWOOD: Infrared Astronomy at ESO.....	3
D. LEMKE: Infrared Instrumentation on Calar Alto.....	17
J.P. MAILLARD and H.M. DYCK: The C.F.H. Telescope as an Infrared Telescope.....	29
P. SALINARI: The TIRGO Observatory.....	45
T.J. LEE: Astronomical Capability of the U.K. Infrared Telescope.....	57

II. GROUND-BASED INFRARED INSTRUMENTATION AND TECHNIQUES

N. EPCHTEIN: The Infrared Photometer of the 2m Telescope at Pic du Midi Observatory.....	73
C. STERKEN and C. DE LOORE: Infrared Broad-Band Filters Optimised for Observations of Wolf-Rayet Stars.....	77
N. MANDOLESI et al.: An F/20 Millimeter Photometer for TIRGO.....	81
P. SARACENO, R. MESSI, D. LORENZETTI and R. ORFEI: The IR Spectrophotometer for the Gornergrat Telescope.....	93
J. SCHULTE IN DEN BAUMEN: Reflective Field Optics for IR Spectrophotometers.....	101
P. SALINARI: A Cooled Grating Spectrometer for TIRGO.....	109
A.F.M. MOORWOOD: IRSPEC.....	113
J. SLINGERLAND: IFU: A Multi-Detector IR Spectrometer.....	119
R. WADE: Cooled Grating Spectrometer.....	125
R. WADE: Future UKIRT Instrumentation.....	131
T.R. GEBALLE: Fabry-Perot Spectrometers for the Ground- Based Infrared.....	137

H.U. KAUFL, H. ROTHERMEL, S. DRAPATZ: A Middle-Infrared Heterodyne Spectrometer to be Used at the Cassegrain Focus of Medium-Size and Large Astronomical Telescopes.....	143
A. CHELLI, C. PERRIER, J.M. MARIOTTI: Infrared Speckle Interferometry, Results, True Image Reconstruction and Instrumental Plans.....	153
A. TARRIUS, R. PAPOULAR, T. LEBERTRE: The Struggle Against Sky Noise in Ground-Based and Air-Borne Observations.....	159
A. KRABBE, K. HAUSSECKER, D. LEMKE and K. PROETEL: An Improved Chopping Secondary Design.....	169
W.A. SHERWOOD and A. GREVE: Determination of the Atmospheric Water Vapour Content above La Silla and the Prospects for FIR Observations.....	173
A.R. GILLESPIE: Use of the 3.6m Telescope for Millimeter Observations.....	179

III. INFRARED DETECTORS

U. BRUNSMANN: Photoconductor Developments at the Batelle-Institut e.V., Frankfurt am Main.....	183
P. VAN DER WAL: Research on Far-Infrared Photoconductors.....	189
J. WOLF, D. LEMKE: Tests of Low-Background Infrared Detectors.....	191
E. KREYSA and E.E. HALLER: He ³ Bolometers for mm and Submm Photometry.....	197
M.W. WERNER and C.R. McCREIGHT: Infrared Detector Arrays.....	205
F. SIBILLE, D. STEFANOVITCH and A. CHELLI: Application of Infrared Arrays to Speckle Interferometry.....	207
D. HARTILL: A New InSb Charge Amplifier for Application to a Spectrometer Array.....	215
G. OLOFSSON: High Sensitivity with a Germanium Detector in Integrating Mode.....	227
W. LUINGE: Infrared Array Photometer.....	233
P.-R. PREUSSNER, R. MÜHLHEIM, R.G. JAACKS and M. GREWING: IR Camera for GIRL.....	237
J. RIEDINGER, K. HAUSSECKER AND D. LEMKE: Infrared Raster Scans and a Self Optimising μ -Processor System for IR Photometry.....	241

IV. VERY LARGE TELESCOPES OF THE FUTURE

J.P. SWINGS: Very Large Telescope (VLT) Studies at ESO.....	249
A.F.M. MOORWOOD: VLT Versus Space.....	255
D. HALL: Infrared Spectroscopy with a VLT (no manuscript received)	
P. LENA: Aperture Synthesis in the Infrared.....	259
General Discussion on IR Requirements for VLT's.....	269

V. AIRCRAFT AND BALLOON SYSTEMS FOR INFRARED ASTRONOMY

M. HARWIT: Infrared Observations from the NASA Airborne Observatories.....	275
C.B. COSMOVICI: Astroplane: A European Airborne Observatory for Infrared Astronomy.....	285
P. LENA: Astroplane: The Airbus Proposal.....	307
P. LENA: Astroplane: A Working Group of the European Science Foundation.....	315
S. DRAPATZ: Achievements and Promise of Balloon IR Astronomy.....	321
R.D. JOSEPH and G.S. WRIGHT: The Scientific Case and Feasibility of a Three Metre Balloon Telescope.....	341
D. ROUAN et al.: A Balloon-Borne Cooled Telescope for Far IR Astronomy.....	355
J.J. WIJNBERGEN, G. PLOEGER and G. DE GROOT: A Cryogenic Fabry-Perot for Far Infrared Astronomy.....	359

VI. APPROVED INFRARED SPACE MISSIONS

D. LEMKE: The German Infrared Laboratory GIRL.....	373
P.E. CLEGG: IRAS and its Mission.....	383
R.D. JOSEPH and N.A. ROBERTSON: IRAS Follow-up: Problems and Prospects.....	391
J. DEGEWIJ: IR Observations of Quiescent Comets (Abstract).....	401

VII. FUTURE SPACE INFRARED MISSIONS UNDER STUDY

M.W. WERNER and F.C. WITTEBORN: SIRTf - The Shuttle Infrared Telescope Facility.....	405
D. HALL: Infrared Astronomy with the ST (no manuscript received)	
M.W. WERNER and T.B.H. KUIPER: A Large Deployable Reflector for Infrared and Submillimeter Astronomy from Space.....	421
R. EMERY: Infrared Space Observatory (ISO) - A European Space Agency Study for a Cryogenically Cooled Telescope in Space.....	425
J.J. WIJNBERGEN, J.W.G. AALDERS, G. PLOEGER and TH.J. HELMERHORST: The ISO Michelson.....	437
