1 Theory of coagulation analysis with chromogenic substrates	
Theoretische Grundlagen der Gerinnungsanalyse mit chromogenen Substraten	1
1.1 Molecular aspects of fibrinogen-fibrin-transition	
E.A. Beck, M. Furlan, T. Seelich, W. Villiger	
(in English)	3
1.2 Determination of protease activities with specifically constructed peptide-p-nitroanilide derivatives	
Die Bestimmung von Protease-Aktivitäten mit gezielt konstruierten Peptid-p-Nitroanilid-Derivaten	
L. Svendsen, K. Stocker	
(in German)	23
1.3 Substrate structure and activity relationship	
G. Claeson, L. Aurell, G. Karlsson, P. Friberger	
(in English)	37
2 Determination of thrombin, antithrombin and antifactor X a	
Bestimmung von Thrombin, Antithrombin und Antifaktor X a	55
2.1 Comparison of six different methods for the quantitative assay of antithrombin III	
H. Bounameaux, F. Duckert	
(in English)	57
2.2 Assay of antithrombin III with the chromogenic substrate S-2160	
H. Vinazzer	
(in English)	61
2.3 Effects of thrombin and of low heparin concentrations on the antithrombin activity in human plasma	
Einfluß von Thrombin und von geringen Heparin-Konzentrationen auf die Antithrombin-Aktivität in Humanplasma	
E. Wenzel, L. Pfordt, Ch. Wenig, K. H. Nienhaus	
(in German)	69
2.4 Enzymatic determination of thrombin and thrombin inhibitors	
M. Roth, M. Haarsma	
(in English)	91

2.5	Studies on the determination of antithrombin Untersuchungen zur Bestimmung von Antithrombin L. Róka, H. Bleyl (in German)	105
2.6	Studies on antithrombin III using Chromozym TH H. Stormorken (in English)	119
2.7	Determination of antithrombin III and antifactor X a activity. O. R. Ødegård, U. Abildgaard (in English)	123
3	Determination of prothrombin Bestimmung von Prothrombin	143
3.1	Determination of plasma prothrombin with the chromogenic peptide substrate H-D-Phe-Pip-Arg-pNA (S-2238) Bestimmung von Plasma-Prothrombin mit dem chromogenen Peptid-Substrat H-D-Phe-Pip-Arg-pNA (S-2238) K. Korsan-Bengtzen, G. Axelsson, J. Waldenström (in German)	145
3.2	Determination of plasma prothrombin with Chromozym TH Bestimmung von Plasma-Prothrombin mit Chromozym TH I. Witt (in German)	155
3.3	Studies on the determination of prothrombin with S-2160 Untersuchungen zur Prothrombinbestimmung mit S 2160 L. Róka, R. Koch, H. Bleyl (in German)	171
3.4	Amidolytic assay of prothrombin activated with Ecarin, a procoagulant from ECHIS CARINATUS venom Z. S. Latallo, E. Teisseyre (in English)	181
4	Determination of various coagulation factors Bestimmung verschiedener Gerinnungsfaktoren	201
4.1	Assay of factor X a with a chromogenic substrate H. Vinazzer (in English)	203
4.2	A new assay for plasma kallikrein activity utilizing a synthetic chromogenic substrate E. Amundsen, L. Svendsen (in English)	211
4.3	Heparin assay in plasma A. N. Teien, U. Abildgaard, O. R. Ødegård, M. Lie (in English)	221

4.4	Antiplasmin determination by means of the plasmin specific substrate S-2251	
	Methodological studies and some clinical applications	
	E. Gyzander, P. Friberger, H. Myrwold, H. Noppa, R. Olsson, A.-C. Teger-Nilsson, L. Wallmo	
	(in English)	229
4.5	The quantitative determination of urokinase with Chromozym UK	
	H. Fässler, M. Walter, G. Marbet, F. Duckert	
	(in English)	249
4.6	Estimation of urokinase activity by means of a highly susceptible synthetic chromogenic peptide substrate	
	L. Svendsen	
	(in English)	251
5	Possibilities and goals for coagulation analysis with chromogenic substrates	
	Möglichkeiten und Ziele der Gerinnungsanalytik mit chromogenen Substraten	263
5.1	General closing discussion	
	Allgemeine Abschlußdiskussion	
	(in German)	265
