

Contents

Part I	String Theories: General Aspects	
Uniqueness of Superstrings. By L. Brink (With 2 Figures)		2
String Theory and Quantum Gravity By T. Yoneya (With 3 Figures)		23
Part II	String Field Theories	
Construction of Witten's String Field Theory. By A. Jevicki		34
Gauge String Field Theory. By H. Hata (With 5 Figures)		57
Part III	Loop Corrections and Conformal Field Theory	
String Multi-loop Corrections to Equations of Motion By H. Ooguri and N. Sakai (With 14 Figures)		70
Differential Equations for Conformal Characters in Moduli Space By T. Eguchi		115
Part IV	Further Mathematical Developments	
Analytic Fields on Riemann Surfaces. By V.G. Knizhnik		120
On the Connection Between Zamolodchikov's W -Algebras and Kac-Moody Algebras. By A.A. Belavin		132
Part V	Related Topics	
Some Remarks on Random Dynamics By H.B. Nielsen and N. Brene		138
Index of Contributors		147
