

Contents

1. General Subjects	11
1.1 R. W. MCGILVER:	
The Use of Fuels for Muscular Work	12
1.2 J. KEUL:	
Muscle Metabolism During Long Lasting Exercise	31
1.3 M. SCHERRER, A. STUDER and H. BACHOFEN:	
Pulmonary Gas Exchange During Physical Exercise.....	43
1.4 J. A. DEMPSEY, J. M. THOMSON, S. C. ALEXANDER, H. V. FORSTER and L. W. CHOSY:	
Respiratory Influences on Acid-Base Status and Their Effects on O ₂ Trans- port during Prolonged Muscular Work	56
1.5 A. CORSI, A. L. GRANATA, M. MIDRIO and M. TURCHETTO:	
Observations Upon the Rate-Limiting Role of Blood Flow in the Regulation of Respiration of Skeletal Muscle During Intermittent Exercise.....	65
1.6 G. GAISL and K. HARNONCOURT:	
The Behavior of Stress Acidosis During Ergometric Examinations.....	70
1.7 V. SVARC and J. NOVAK:	
The Changes of Acid Base Balance during Interval Swimming Training in Trained and Untrained Men	73
1.8 P. E. NOWACKI, W. KÜSTNER and H. HAAG:	
The Influence of Exhaustive Efforts at High Altitude (2040 m) on Serum Enzymes (CPK, CPK act., LDH, SGOT, SGPT) in Well Trained Ath- letes	78
1.9 L. SCHMID:	
Malignant Tumours as Causes of Death of Former Athletes.....	85
2. Metabolism of Carbohydrates	93
2.1 B. SALTIN:	
Adaptive Changes in Carbohydrate Metabolism with Exercise	94
2.2 L. HERMANSEN, S. MAEHLUM, E. D. R. PRUETT, O. VAAGE, H. WALDUM and T. WESSEL-AAS:	
Lactate Removal at Rest and During Exercise	101
2.3 Y. MINAIRE and J. FORICHON:	
Lactate Metabolism and Glucose Lactate Conversion in Prolonged Physical Exercise	106
2.4 A. FREMINET, C. POYART, E. BURSAUX and T. TABLON:	
Effect of Physical Training on the Rates of Lactate Turnover and Oxidation in Rats.....	113
2.5 E. L. FOX:	
Differences in Metabolic Alterations with Sprint Versus Endurance Interval Training Programs	119
2.6 K. KLAUSEN, K. PIEHL and B. SALTIN:	
Muscle Glycogen Stores and Capacity for Anaerobic Work	127
2.7 B. ESSÉN, B. PERNOW, P. D. GOLLNICK and B. SALTIN:	
Muscle Glycogen Content and Lactate Uptake in Exercising Muscles.....	130

2.8	W.B. McCAFFERTY and D.W. EDINGTON: The Effects of Prolonged Direct Muscle Stimulation and Recovery on Biochemicals Associated with Glycolysis in Rat Skeletal Muscle	135
2.9	B. J. KOZIOL and D.W. EDINGTON: The Effects of Prolonged Direct Muscle Stimulation on Biochemicals Associated with the Malate-Aspartate Shuttle in Rat Skeletal Muscle	139
2.10	J. WAHREN, Ph. FELIG, L. HAGENFELDT, R. HENDLER and G. AHLBORG: Splanchnic and Leg Metabolism of Glucose, Free Fatty Acids and Amino Acids during Prolonged Exercise in Man	144
3.	Metabolism of Lipids	155
3.1	P. PAUL: Effects of Long Lasting Physical Exercise and Training on Lipid Metabolism	156
3.2	H. LIESEN, H. KORSTEN and W. HOLLMANN: Effects of a Marathon Race on Blood Lipid Constituents in Younger and Older Athletes	194
3.3	R. POLEDNE and J. PARIZKOVA: Long-Term Training and Net Transport of Plasma Free Fatty Acids	201
3.4	K. NAZAR, Z. BRZEZINSKA and S. KOZLOWSKI: Sympathetic Activity During Prolonged Physical Exercise in Dogs: Control of Energy Substrate Utilization	204
4.	Metabolism of Proteins	211
4.1	J.R. POORTMANS: Effects of Long Lasting Physical Exercise and Training on Protein Metabolism	212
4.2	D. BÖHMER: Creatine, Creatinine and CPK in the Serum of Athletes	229
4.3	F. CERNY: Protein Metabolism During Two Hour Ergometer Exercise	232
4.4	L. RÖCKER, K. KIRSCH, U. MUND and H. STOBOY: The Role of Plasma Proteins in the Control of Plasma Volume During Exercise and Dehydration in Long Distance Runners and Cyclists.....	238
4.5	R. J. SHEPHARD and T. J. KAVANAGH: Biochemical Changes with Marathon Running; Observations on Post-Cardiac Patients	245
4.6	A. KIISKINEN and E. HEIKKINEN: Effect of Prolonged Physical Training on the Development of Connective Tissues in Growing Mice	253
4.7	C. M. TIPTON, R. K. MARTIN, R. D. MATTHES and R. A. CAREY: Hydroxyproline Concentrations in Ligaments From Trained and Nontrained Rats	262
4.8	J. MALOMSOKI: The Polarographic Properties of Serum Following Various Exertions and After an in Vitro Addition of Sulfur-Containing Substances	268
5.	Hormonal Regulations	275
5.1	G. MÉTIVIER: The Effects of Long Lasting Physical Exercise and Training on Hormonal Regulation	276

5.2	N.N. YAKOVLEV: The Role of Sympathetic Nervous System in the Adaptation of Skeletal Muscles to Increased Activity.....	293
5.3	G. FEDERSPIJL, P. LEFÈBVRE, A. LUYCKX and C. DE PALO: Endocrine Mechanisms of Exercise-Induced Fatty Acids Mobilization in Rats.....	301
5.4	J. A. SUNDSFJORD, S. B. STRØMME and A. AAKVAAG: Plasma Aldosterone (PA), Plasma Renin Activity (PRA) and Cortisol (PF) During Exercise.....	308
5.5	K. KIRSCH, W.-D. RISCH, U. MUND, L. RÖCKER and H. STOBOY: Low Pressure System and Blood Volume Regulating Hormones after Prolonged Exercise.....	315
5.6	M. FOLLENIS and G. BRANDENBERGER: Effect of Muscular Exercise on Day-Time Variations of Plasma Cortisol and Glucose.....	322
5.7	F. BERNET and J. DENIMAL: Evolution of the Sympathico-Adrenal Response to Exercise During Physical Training in the Rat.....	326
5.8	L. MIKULAJ, L. KOMADEL, M. VIGAS, R. KVTNANSKY, L. STARKA and P. VENCEL: Some Hormonal Changes After Different Kinds of Motor Stress in Trained and Untrained Young Men.....	333
6.	Electrolytes.....	339
6.1	G. HARALAMBIE: Changes in Electrolytes and Trace Elements During Long-Lasting Exercise.....	340
6.2	D. L. COSTILL and B. SALTIN: Muscle Glycogen and Electrolytes Following Exercise and Thermal Dehydration.....	352
6.3	S. B. STRØMME, I. C. STENSVOID, H. D. MEEN and H. E. REFSUM: Magnesium Metabolism During Prolonged Heavy Exercise.....	361
6.4	Ø. HETLAND, E. A. BRUBAK, H. E. REFSUM and S. B. STRØMME: Serum and Erythrocyte Zinc Concentrations After Prolonged Heavy Exercise.....	367
7.	Ultrastructure and Fiber Types of Muscle.....	371
7.1	H. HOWALD: Ultrastructural Adaptation of Skeletal Muscle to Prolonged Physical Exercise.....	372
7.2	K.-H. KIESSLING, L. PILSTRÖM, A.-Ch. BYLUND, B. SALTIN and K. PIEHL: Morphometry and Enzyme Activities in Skeletal Muscle From Middle-Aged Men After Training and From Alcoholics.....	384
7.3	A. C. COSMAS and D. W. EDINGTON: Mitochondrial Distributions in Hearts of Male Rats as a Function of Long-Term Physical Training.....	390
7.4	R. B. ARMSTRONG, C. W. SAUBERT IV, W. L. SEMBROWICH, R. E. SHEPHERD and P. D. GOLLNICK: Glycogen Depletion in Rat Skeletal Muscle Fibers During Exercise.....	397
7.5	V. R. EDGERTON, B. ESSÉN, B. SALTIN and D. R. SIMPSON: Glycogen Depletion in Specific Types of Human Skeletal Muscle Fibers in Intermittent and Continuous Exercise.....	402

7.6	P. D. GOLLNICK, K. PIEHL, J. KARLSSON and B. SALTIN: Glycogen Depletion Patterns in Human Skeletal Muscle Fibers after Varying Types and Intensities of Exercise	416
7.7	F. BONDE-PETERSEN, P. D. GOLLNICK, T. I. HANSEN, B. HULTÉN, J. H. KRISTENSEN, N. SECHER and O. SECHER: Glycogen Depletion Pattern in Human Muscle Fiber During Work under Curarization (d-Tubocurarine)	422
7.8	R. J. BARNARD and A. T. THORSTENSSON: Effect of Exhaustive Exercise on the Rat Heart	431
8.	Cellular Enzymes	437
8.1	J. O. HOLLOSZY, F. W. BOOTH, W. W. WINDER and R. H. FITTS: Biochemical Adaptation of Skeletal Muscle to Prolonged Physical Exercise	438
8.2	E. HEIKKINEN, H. SUOMINEN, M. VIHERSAARI, I. VUORI and A. KIISKINEN: Effect of Physical Training on Enzyme Activities of Bones, Tendons and Skeletal Muscles in Mice	448
8.3	A. W. TAYLOR: The Effects of Exercise and Training on the Activities of Human Skeletal Muscle Glycogen Cycle Enzymes	451
8.4	H. MOESCH and H. HOWALD: Hexokinase (HK), Glyceraldehyde-3 P-Dehydrogenase (GAPDH), Succinate-Dehydrogenase (SDH), and 3-Hydroxyacyl-CoA-Dehydrogenase (HAD) in Skeletal Muscle of Trained and Untrained Men	463
8.5	W. A. SAVILLE and D. W. EDINGTON: The Effect of Prolonged Direct Electrical Stimulation upon the Enzymes of Fatty Acid Activation, Transport and Oxidation in Rat Skeletal Muscle.	466
8.6	M. BROWN, M. COTTER, O. HUDLICKA, M. SMITH and G. VRBOVA: Metabolic Changes in Long-Term Stimulated Fast Muscles	471
	Round Table and Panel Discussion	476
	Authors Index	483
	Key Word Index	484
