Preface	1
-------------------	---

Formation

The smoke ion source: a device for the generation of cluster ions via inert gas condensation By K.M. McHugh, H.W. Sarkas, J.G. Eaton, C.R. Westgate, K.H. Bowen	3
Electron diffraction studies of pulsed cluster beams By L.S. Bartell, R.J. French	7
Equilibrium intermetallic particles in the gas phase-A Knudsen cell mass spectrometric study By A. Hartmann, K.G. Weil	11
Neutralization and matrix deposition experiments on mass-selected silver atoms and clusters By D.M. Lindsay, F. Meyer, W. Harbich	15
Palladium particles growth on various aluminas By P. Légaré, F. Finck, R. Roche, G. Maire	19
Comparison between the growth of gold particles onto MgO and amorphous carbon substrates by in situ electrical conductance measurements By G. Desrousseaux, B. Robrieux, A. Renou, A. Carlan, H. Schaffar, M. Gillet	23
Morphology determination of small particles by electron microscopy and electrical conduction measurements By B. Robrieux, G. Desrousseaux, A. Renou, M. Gillet	27
Size-dependent thermodynamic properties of silver aggregates. Simulation of the photographic development process By M. Mostafavi, J.L. Marignier, J. Amblard, J. Belloni	31
Sodium clusters in zeolites By P.J. Grobet, L.R.M. Martens, W.J.M. Vermeiren, D.R.C. Huybrechts, P.A. Jacobs	37
Minimal spanning tree analysis of regular, random and cluster structures By C. Dussert, G. Rasigni, M. Rasigni, J. Palmari, A. Llebaria	41

Atomic Structure

On the structure and stability of small metal particles: high-resolution UHV electron microscope study By M. Mitome, Y. Tanishiro, K. Takayanagi	45
---	----

A group theoretical paradigm for describing the skeletal molecular orbitals of cluster compounds. Part 3 By D.M.P. Mingos, L. Zhenyang	53
Theoretical studies on carbon and silicon clusters: comparison of the structures and stabilities of neutral and ionic forms By K. Raghavachari	61
Quantum mechanics and the structure of noble-gas clusters By G. Franke, J. Schulte	65
Binding energy of large icosahedral and cuboctahedral Lennard-Jones clusters By J.A. Northby, J.Xie, D.L. Freeman, J.D. Doll	69
Energy barriers and structural transitions of small Al clusters By T. Halicioglu	73
Model potential for beryllium clusters By E. Blaisten-Barojas, S.N. Khanna	77
Structure and dynamics of Lennard-Jones clusters with impurities By I.L. Garzón, X.P. Long, R. Kawai, J.H. Weare	81
Stability of relaxed Lennard-Jones models made of 500 to 6000 atoms By B. Raoult, J. Farges, M.F. de Feraudy, G. Torchet	85
Description of metallic and covalent clusters with icosahedral symmetry: the polytope model By R. Mosseri, J.F. Sadoc	89
Structural transition in SF ₆ clusters By G. Torchet, J. Farges, M.F. de Feraudy, B. Raoult	93
Electron diffraction on unsupported ultrafine silver particles By B. Hall, M. Flüeli, R. Monot, J.P. Borel	97
Structure of Ag, Fe and Ge microclusters By P.A. Montano, J. Zhao, M. Ramanathan, G.K. Shenoy, W. Schulze	103
Structure investigation of multiply-twinned Ni particles by electron investigation By M.F. Gillet, M. Brieu	107
Structure of an icosahedral palladium particle By J.M. Penisson, A. Renou	113
Structural investigations of metal clusters by HREM By S. Giorgio, J. Urban	115
The structure of small penta-twinned gold particles By P.Y. Gao, W. Kunath, H. Gleiter, K. Weiss	119
Electron microscope studies of the regular twinning structure and the grain boundary structure in a system of cobalt particles By A.R. Thölén	123
Fine particles of icosahedral quasicrystal formed by gas evaporation technique By Y. Saito, T. Maki, T. Okazaki, K. Mihama	127
Lattice imaging of bismuth clusters By M. Treilleux, G. Fuchs, F. Santos Aires, P. Melinon, A. Hoareau, B. Cabaud	131
Modes of deformation under varied tensile directions in laminar, colloidal gold By S. Maruyama	135

Atomic structural rearrangements induced by electron beam heating of coalesced palladium particles	
By A. Renou, J.M. Penisson, M.F. Gillet	139
Structure of small palladium particles studied by HRTEM	
By C.R. Henry, C. Chapon, J.M. Penisson, G. Nihoul	145
Size distribution of Bi clusters deposits on amorphous carbon substrates	
By F. Santos Aires, M. Treilleux, G. Fuchs, A. Hoareau, P. Melinon, B. Cabaud	149
Stresses induced in the deposit substrate interface during small particles growth	
By C. Chefi, F. Hila, M. Gillet	153
Nm-sized crystallites embedded in single crystalline films of magnesium oxide	
By K. Mihama, N. Tanaka	157

Dynamics

Small clusters: between dynamics and thermodynamics	
By R.S. Berry	161
Dynamic and quantum size effects in molecular clusters	
By J. Jortner, U. Even, N. Ben-Horin, D. Scharf, R.N. Barnett, U. Landman	167
Computer simulations of photoionization	
By B. Wassermann, T.P. Martin	173
Rotating clusters: centrifugal distortion, isomerization, fragmentation	
By D.H. Li, J. Jellinek	177
More on the melting of Lennard-Jones clusters	
By I.L. Garzón, M. Avalos-Borja, E. Blaisten-Barojas	181
Thermal decay of Lennard-Jones clusters	
By I.L. Garzón, M. Avalos-Borja	185
Dynamics of transition-metal clusters	
By S. Sawada, S. Sugano	189
The thermal motion of gold atoms in metal cluster compounds as determined by Mössbauer and specific heat	
By H.H.A. Smit, R.C. Thiel, L.J. de Jongh	193

Stability and Fragmentation

Stability of alkali-atom clusters	
By C. Bréchnignac, Ph. Cahuzac, J. Leygnier, R. Pflaum, J.Ph. Roux, J. Weiner	199
Jellium-model calculation for monomer and dimer decays of some potassium clusters	
By S. Saito, M.L. Cohen	205
Theoretical study of the stability of X_N^n ($n = -1, 0, +1, +2$; $X = \text{Ag, Cu}$; $N \leq 25$) clusters as a function of size using a non-local density functional formalism	
By A. Rubio, L.C. Balbás, A. Vega	209
Theory of fragmentation of metal clusters	
By S. Sugano, A. Tamura, Y. Ishii	213

Evaporation of tetramers in Sb_{4n} clusters and conditions for the formation of Sb_{2n+1} clusters By D. Rayane, P. Melinon, B. Cabaud, A. Hoareau, B. Tribollet, M. Broyer .	217
Role of fragmentation processes in the liquid metal ion source production of aggregates By J. Van de Walle, P. Joyes	221
Cluster cations ejected from liquid metal ion source: alkali metals (Li, Na) and group IV elements (Si, Ge, Sn, Pb) By Y. Saito, T. Noda	225
Sputtered metal and silicon cluster ions: collision-induced fragmentation and neutralization By W. Begemann, R. Hector, Y.Y.Liu, J. Tiggesbäumker, K.H. Meiwes-Broer, H.O. Lutz	229
Enrichment of Zintl cluster ions By D. Schild, R. Pflaum, G. Riefer, E. Recknagel	235
Enrichment and segregation in alkali heteroclusters By M.J. López, A. Mañanes, J.A. Alonso, M.P. Iñiguez	237
Metal-insulator transitions in microclusters? Mixed sodium/sodium chloride aggregates By S. Pollack, C.R.C. Wang, M.M. Kappes	241
Dissociation of small metal particles induced by surface plasmon excitation with laser light By W. Hoheisel, U. Schulte, M. Vollmer, R. Weidenauer, F. Träger	245
Sodium halide clusters: evidence for direct electronic fragmentation By R. Pflaum, E. Recknagel	249
Ionization dynamics of van-der-Waals clusters By A. Ding	253
Metastable decay of rare gas cluster ions: mechanism and kinetics By T.D. Märk	263
Intra-cluster ion-molecule reactions and photodissociation of molecular clusters By N. Nishi, H. Shinohara	269
Magic numbers of large rare gas clusters By W. Miehe, O. Echt, O. Kandler, T. Leisner, E. Recknagel	273
Fragmentation of neutral van der Waals clusters with visible laser light: a new variant of the Raman effect? By A. Stamatovic, F. Howorka, P. Scheier, T.D. Märk	275
Multiply charged cluster ions of Ar, Kr, Xe, N_2 , O_2 , CO_2 , SO_2 and NH_3 : Production mechanism, appearance size and appearance energy By T.D. Märk, P. Scheier, M. Lezius, G. Walder, A. Stamatovic	279
Quantized losses from charged nitrogen clusters By T. Leisner, O. Echt, O. Kandler, Yan Xue-Jian, E. Recknagel	283
Observation and investigation of metastable decay series of $(\text{N}_2)_n^+$ cluster ions By T.D. Märk, P. Scheier	285
Electron attachment to clusters composed of closed shell, hydrogen containing molecules By H. Haberland, C. Ludewigt, T. Richter	289

A mechanism of electron attachment to small clusters By T. Kondow, T. Nagata, K. Kuchitsu	291
Electron bombardment fragmentation of size selected molecular clusters By U. Buck, J. Kesper, Ch. Lauenstein, M. Tolle, M. Winter	293
Kinetic energy release of clusters after multiphoton ionisation with time of flight and electrostatic analyser techniques By J.D. Coffman, M. Gallmann, I.V. Hertel	297
Interactions of electrons with SF ₆ : ionization and attachment By T.D. Märk, A. Stamatovic, P. Scheier	303

Electronic Structure and Properties

General properties of the electronic structure of alkali metal clusters and Ia–IIa mixed clusters By P. Fantucci, V. Bonačić-Koutecký, J. Koutecký	307
Metallic free clusters By W.D. Knight	315
Electronic structure of metal clusters By G.K. Wertheim	319
Electronic properties of small platinum particles as seen by NMR By J.J. van der Klink	327
Investigation of local chemical and electronic properties of small particles with EELS point analysis and image energy filtering in a STEM By D. Ugarte, C. Colliex	333
Electronic correlation and effective interactions in small alkali clusters By F. Spiegelmann, P. Blaise, J.P. Malrieu, D. Maynaud	341
New methods for the calculation of the electronic structure of clusters: applica- tion for Na ₁₃ to Na ₁₄₇ By J.L. Martins	347
Static electric dipole polarizability of small sodium aggregates By I. Moullet, J.L. Martins, F. Reuse, J. Buttet	353
Electronic structure and stability of charged beryllium clusters By S.N. Khanna, F. Reuse, J. Buttet	357
Magnetism and local order By F. Liu, M.R. Press, S.N. Khanna, P. Jena	361
Calculation of the size dependence of the ionization energy and autoionization energy of Hg-clusters By G.M. Pastor, P. Stampfli, K.H. Bennemann	365
Shell structure of electronic states of Cu clusters By T. Yamaguchi, N. Fujima	369
The nickel-group IV molecules NiC, NiSi, and NiGe By I. Shim, K.A. Gingerich	373
First-principles calculations of K-edge X-ray absorption near edge spectra of some transition metal dimers By B. Wästberg, A. Rosén, D.E. Ellis	377

Compared electronic structure of negative ions $M_pC_n^-$: I. Normal elements in Hückel theory	
By M. Leleyter	381
Electronic structure of spheroidal metal containing carbon shells: study of the LaC_{60} and C_{60} clusters and their ions within the local density approximation	
By A. Rosén, B. Wästberg	387
Molecular orbital calculations on transition metal clusters	
By M.C. dos Santos, J.A.O. de Aguiar	391
Bonding in nickel cluster carbonyls	
By G. Pacchioni, P. Fantucci	395
NMR in aluminum small particles in high magnetic field	
By S. Kobayashi, K. Wago, F. Komori	399
Size dependence of the paramagnetic susceptibility of Mg and Zn clusters	
By S. Pasche, J.-P. Borel	401
Photoemission from tin and lead cluster anions	
By G. Ganteför, M. Gausa, K.H. Meiwes-Broer, H.O. Lutz	405
Electronic and chemical properties of indium clusters	
By D. Rayane, P. Melinon, B. Cabaud, A. Hoareau, S. Khardi, B. Tribollet, M. Broyer	411
Anomalous nuclear spin-lattice relaxation in copper small particles	
By T. Goto, F. Komori, S. Kobayashi	415
Core edge energy loss studies of Pd clusters on graphite	
By M. De Crescenzi, L. Lozzi, P. Picozzi, S. Santucci	417
Auger and electron energy loss spectroscopies of small palladium particles supported on (111) oriented MgO films	
By C.R. Henry, H. Poppa	421
Electron distribution on small Ni particles and Ce ions in X and Y zeolites related to their catalytic properties	
By F. Vergand, H. Roulet, G. Dufour, C. Bonnelle, E. Ramaroson, J.F. Tempere, M.F. Guilleux, D. Delafosse	425
Vacuum-UV photoemission-photoion coincidence spectroscopy of neutral metal atom clusters	
By K. Rademann, B. Kaiser, T. Rech, F. Hensel	431
Fluorescence of rare gas clusters excited with synchrotron radiation	
By J. Stapelfeldt, J. Wörmer, G. Zimmerer, T. Möller	435
Ionization energies of cesium and cesium oxide clusters	
By H.G. Limberger, T.P. Martin	439
Electronic shell structure in Cs-O clusters	
By T. Bergmann, T.P. Martin	443
Physical properties of high-nuclearity metal cluster compounds	
By L.J. de Jongh, J.A.O. de Aguiar, H.B. Brom, G. Longoni, J.M. van Ruitenbeek, G. Schmid, H.H.A. Smit, M.P.J. van Staveren, R.C. Thiel	445
NMR of metal-core bonded ^{31}P in polynuclear metal cluster compounds	
By M.P.J. van Staveren, H.B. Brom, L.J. de Jongh, G. Schmid	451
Magnetic properties and EPR spectroscopy of molecular metal clusters	
By R.E. Benfield	453

EPR on the high-nuclearity palladium cluster $\text{Pd}_{561}\text{Phen}_{36}\text{O}_{200}$ By J.A.O. de Aguiar, H.B. Brom, L.J. de Jongh, G. Schmid	457
Ac and dc electrical conductivity of polynuclear metal cluster compounds By M.P.J. van Staveren, J.T. Moonen, H.B. Brom, L.J. de Jongh, G. Schmid	461
Electrical and magnetic properties of thin films containing metal clusters By C. Laurent, E. Kay	465

Optical Properties

Optical absorption of small metallic particles By S. Tomiya, K. Kawamura	469
The size dependent shift of the surface plasmon absorption band of small spherical metal particles By K.-P. Charlé, W. Schulze, B. Winter	471
Investigation of surface plasma resonances in small sodium clusters By K. Selby, M. Vollmer, J. Masui, V. Kresin, W.A. de Heer, W.D. Knight	477
Absorption spectroscopy of size-selected trimers and pentamers transition metal clusters isolated in rare gas solids: preliminary steps By J.C. Rivoal, C. Grisolia, J. Lignieres, D. Kreisle, P. Fayet, L. Wöste	481
Fluorescence spectroscopy of laser vaporized species By F.W. Froben, J. Kolenda, K. Möller	485
UV-visible and Raman investigations of matrix isolated adducts between metal vapors of chromium and benzene: selective photoirradiations effects By M. Dalibart, J. Derouault	489
Nanosecond emission spectra in μm space of Si particles sputtered by laser irradiation By A. Kasuya, Y. Nishina	493
Melting for lead particles of very small sizes; influence of surface phenomena By R. Garrigos, P. Cheyssac, R. Kofman	497
Nonlinear optics in quantum confined semiconductor particles By P. Horan, W. Blau	501
Many-cluster-systems: models of inhomogeneous matter By U. Kreibig, K. Fauth, M. Quinten, D. Schönauer	505
Optical properties of systems containing Au_{55} -clusters By K. Fauth, U. Kreibig, G. Schmid	515
Electronic excitations in many-particle systems: a quantitative analysis By M. Quinten, D. Schönauer, U. Kreibig	521
Precursor-states of percolation in quasi-fractal many-particle-systems By D. Schönauer, M. Quinten, U. Kreibig	527
The relationship of $\text{Au}_{55}(\text{PPh}_3)_{12}\text{Cl}_6$ to colloidal gold By R.E. Benfield, J.A. Creighton, D.G. Eadon, G. Schmid	533

Adsorption and Chemical Reactions

Reactivity of free clusters By S.J. Riley	537
--	-----

Cluster-model study of the interaction of halogen atoms with Ag clusters By G. Pacchioni, P.S. Bagus, M.R. Philpott	543
On the splitting of the CO 1π level in the chemisorption system CO/Ni (111): substrate or lateral interaction? By N. Rösch, P. Sandl, P. Knappe, A. Görling, B.I. Dunlap	547
Chemisorption and chemical reactions on size selected clusters By M.F. Jarrold, J.E. Bower	551
Sequential reactions of silicon clusters with SiD ₄ : constrained heterogeneous nucleation of deuterated silicon particles By M.L. Mandich, W.D. Reents Jr.	555
Monitoring adsorption on small particles By H. Burtscher, U. Müller, A. Schmidt-Ott	563
Reactions of small carbon cluster ions with HCN: a structural probe By D.C. Parent, S.W. McElvany	567
Reaction of Al _n clusters with oxygen and ammonia By K. Kaya, K. Fuke, S. Nonose, N. Kikuchi	571
Size effects in the CO-oxidation over supported Pd particles By N. Kruse, E. Gillet	575
Influence of the precursors on the properties of alumina supported rhodium particles By B. Coq, F. Figueras, T. Tazi	579
Influence of dispersion on the energies of adsorption: H ₂ , CO, propylene and propyne on supported Pd or Pt By A. Guerrero, M. Reading, Y. Grillet, J. Rouquerol, J.P. Boitiaux, J. Cosyns	583
Electronic effect induced by variation of size for Pd clusters in 1,3-butadiene hydrogenation By V. De Gouveia, B. Bellamy, Y. Hadj Romdhane, A. Masson, M. Che	587
Structure flexibility of iridium metal aggregates. Comparison with platinum and rhodium By C. Bergeret, P. Gallezot	591
Surface oxidation and reduction of small platinum particles observed by in-situ X-ray diffraction By V. Gnutzmann, W. Vogel	597
Optical and chemical studies of II–VI compound clusters By W.A. Saunders	601
Conclusions By J. Friedel	605
Author Index	609
