

C O N T E N T S

Invited lectures

B.L.J. Braaksma:

Recessive solutions of linear differential equations with polynomial coefficients. 1

L. Collatz:

Approximation by functions of fewer variables 16

R. Conti:

Affine control processes. 32

G. Fichera:

Abstract unilateral problems. 51

C. Goulaouic:

Regularity for some degenerate differential operators 65

E.M. de Jager:

Singular elliptic perturbations of vanishing first-order differential operators 73

K. Jörgens:

Perturbations of the Dirac operator 87

H.W. Knobloch:

On optimal control problems with bounded state variables. 103

C. Lobry:

Quelques propriétés "génériques" des systèmes à commande. 120

Å. Pleijel:

Green's functions for pairs of formally self-adjoint ordinary differential operators. 131

G. Stampacchia:

Recent results in the theory of variational inequalities. 147

F. Stummel:

Singular perturbations of elliptic sesquilinear forms 155

W. Walter:

Some new aspects of the line method for parabolic differential equations 181

W. Wendland:

On boundary value problems of generalized analytic functions 190

Contributed lectures

F.M. Arscott:

Polynomial solutions of differential equations with bi-orthogonal properties 202

M. Authier:

Champs de vecteurs et régularité des solutions de certains problèmes de Dirichlet variationnels. 207

C. Bennewitz:

Symmetric relations on a Hilbert space 212

J. Bona:

Fixed-point theorems for Fréchet spaces. 219

J.S. Bradley:

Boundary value problems involving the Thomas-Fermi equation. 223

D.W. Bresters:

The initial value problem for operators which can be factorized into a product of Klein-Gordon operators. 227

C. Conley:

An oscillation theorem for linear systems with more than one degree of freedom 232

J.M. Cushing:

Some existence results for non-linear Steklov problems 236

M.S.P. Eastham and K. Unsworth:

The deficiency indices and spectrum associated with selfadjoint differential expressions having complex coefficients 241

M. Essén and J. Lewis:

The generalized Ahlfors-Heins theorem in certain n-dimensional cones . . 246

W.N. Everitt:

On a lower bound of a second-order, linear differential operator with an integrable-p coefficient 258

W.N. Everitt and M. Gieritz:

Some Dirichlet and separation results for certain differential
expressions on finite intervals 264

W. Förster:

On certain parabolic differential equations and an equivalent variational
problem 268

P.P.N. de Groen:

Turning points in second-order elliptic singular perturbation problems. . 273

H.P. Heinig:

Remarks on interpolation in spaces with weights 279

J.P. Keener and H.B. Keller:

Perturbed bifurcation and buckling of circular plates 286

K. Kreith:

Oscillation properties of non-selfadjoint differential equations of
even-order. 294

N.G. Lloyd:

On the non-autonomous van der Pol equation with large parameter 298

D.L. Lovelady:

Global attraction and asymptotic equilibrium for non-linear ordinary
equations 303

J.B. McLeod:

The functional differential equation $y'(x) = ay(\lambda x) + by(x)$ and
generalisations 308

J. Chen and R.E. O'Malley Jr.:

Multiple solutions of a singularly perturbed boundary value problem
arising in chemical reactor theory. 314

C.J.S. Petrie:

A Liapounov function for an autonomous second-order ordinary differential
equation. 320

J.W. de Roever:

Boundary values of holomorphic functions and the iterated wave equation . 325

B.V. Schmitt:

Détermination, à l'aide d'index des solutions périodiques de l'équation
de Duffing $x'' + 2x^3 = \lambda \cos t$ 330

K. Schmitt:

Periodic solutions of non-linear differential systems 335

C.A. Stuart:

Bifurcation theory for equations with non-local potentials. 341

B.D. Sleeman:

Multi-parameter eigenvalue problems and k-linear operators. 347

P. Waltman:

An epidemic model with two populations. 354

J.R.L. Webb:

Existence theorems for operators of monotone type 358

D.H. Wood:

Elliptic partial differential equations may be related by a change of
independent variables 363
